BLANK-IT

BLANK-IT is our popular DOS screen saver. A shareware (evaluation) version of *BLANK-IT* can be downloaded from either our own support BBS or our CompuServe Forum. *BLANK-IT* provides many unique capabilities not found in other screen savers, all packed into an exquisitely small amount of memory. This utility works on all types of monitors and provides all of the features you'd expect from a DOS-based screen saver, plus many more:

- * The time-out is user-selective
- * A "hot key" is available to instantly blank the screen (privacy, "Boss key" feature)
- * Options to enable/disable *BLANK-IT* from command-line, or even a batch file
- * Supports a DOS mouse
- * Technically sound product that works where others fail (high speed comm, etc.)
- * This single program works on all types of monitors
- * Safer than constantly turning a monitor on and off
- * And much more!

BLANK-IT provides the screen blanking features users have come to expect from a screen saver, plus a host of additional, advanced features not found in most other screen savers, such as a fully programmable API, and the ability to discard the reactivating keystroke. With *BLANK-IT* we have taken a simple task and tried to do it better than anybody else, and the small TSR footprint (less than 1K) will appeal to anyone who suffers from "RAM cram."

"BLANK-IT has met with world wide acclaim as the definitive DOS screen blanker"
-Alternative Computing Magazine, April 1992

"The ultimate expression of screen blanking"
-Public Brand Software catalog Vol. 7 #1, 1991
1st place [utilities], 10th PBS awards

Cost \$15.00 registered, \$20.00 registered with disk, \$29.95 for Deluxe package with printed manual, disk, quick reference card.

Rhode Island Soft Systems

Corporate Fact Sheet

- Positioning** Rhode Island Soft Systems, Inc. (RISS) is a software engineering company focusing on developing high quality mass-market, consumer software products.
- Mission** To leverage their speed, quality, and superior technological assets to develop the best consumer software products and services possible in the following areas: self-published titles, contracted development, promotional premiums.
- Founded** 1988, in Woonsocket, RI by Eric G. Robichaud
- Organization** RISS is a standard “C Corporation” governed by a five person board of directors. The current management team consists of Eric G. Robichaud, CEO, William J. Zitomer, VP of Software Engineering, and Rebecca L. Robichaud, CFO.
- Products** The Ovation Multimedia Development Toolset for creating high performance, interactive multimedia titles; the acclaimed Jixxa Jigsaw Puzzle game; Image Carousel, the premier still image screen saver utilizing sound (available for licensing); BLANK-IT, the original DOS screen Blanker; WinPak Volumes 1 - 3, the premier screen saver/ font/ icon collection for Windows; RISS Font Paks Vol. 1 - 3, TrueType Font Collections for Windows; RISS Icon Collection, 2001 Icons plus the icon Selector/Change utility for Windows; The Personal Screen Saver, a Windows screen saver utilizing one’s own picture.
- Contracting** RISS has been the development secret behind several successful companies, developing their products. Products include “The Free Willy 2 Interactive Multimedia MovieBook,” “The Little Rascals Interactive Multimedia MovieBook,” “T2: The Screen Saver,” “The Twilight Zone Screen Saver,” and “The Saturday Night Live Screen Saver.” In the past few years, RISS has developed all of Ziff-Davis Interactive’s exclusive screen savers (including the “Gates Does Windows 95” screen saver) as well as many of the Ziff Exclusive Utilities for ZDI On-Line and several of the ZD magazines.
- Services** Custom Screen Saver development (Promotional premiums, etc.); Custom product development (“Work for hire”); Custom Signature TrueType Fonts.
- Experience** RISS has a wealth of development experience in different areas: interactive multimedia development, animated screen savers; system utilities; large scale systems; technical, low-level development (telecommunications, low-level system programming, assembly code, etc.), graphic arts; multimedia authoring; and instructional design. Furthermore, RISS has extensive experience in developing commercial-quality, retail products such as “The Free Willy 2 Interactive

MovieBook”, the “Terminator 2: The Screen Saver,” many ZiffNet exclusive utilities, and more.

Agenda

With new products and services continuing to be released, RISS is working to leverage its experience in order to cultivate diverse revenue streams for continued growth. These measures include increasing its presence in the retail channels, putting greater emphasis on direct-mail marketing, and aggressively pursuing OEM contracts.

RISS is growing by focusing on what it does well, and then expanding that radius. RISS has extensive experience developing animated screen savers and interactive multimedia titles. RISS intends to continue to cement itself as “the screen saver people.”

At the same time, it is leveraging experience in other areas: utilizing its multimedia and animation experience to develop games and animation development products. Similarly, it’s converging these areas of expertise with its technical and large-scale abilities, to develop interactive, multimedia authoring systems and accessories. RISS will continue expanding its promotional premiums offerings, and will look to grow the licensing business by licensing the “Image Carousel” screen saver engine.

Support

RISS operates a support area on CompuServe (GO RISS, Section/Lib 5). Customers can post messages to RISS staff and/or other customers, and download the latest version of RISS files. RISS also operates its own 24-hour, free electronic Bulletin Board System (BBS) at 401-767-3931. Customers can post messages and download the latest RISS files. RISS is available via a 24-hour dedicated fax (401-767-3108) and via telephone (401-767-3106) during standard business hours.

Rhode Island Soft Systems

HOT PRODUCTS

Rhode Island Soft Systems, Inc. has developed several commercial, retail products such as T2: The Screen Saver, The Animated Screen Saver Pak, and more. In addition, RISS makes several of its products available on an evaluation, "shareware" basis. The products listed below have shareware versions available through our [CompuServe Forum](#) as well as our own [electronic bulletin board service \(BBS\)](#), or on the [World Wide Web](#).

Rhode Island Soft Systems Announces *RISS Solitaire Pak*

--Go Beyond the Standard Desktop Game With Choice of 5-Pak or 8-Pak--

WOONSOCKET, RI, January 29, 1996 — Rhode Island Soft Systems, Inc. (RISS), announces the release of the ***RISS Solitaire Pak***, a collection of single-player card games. Available in a ***5-Pak*** quintet of games and an ***8-Pak*** octet of games, ***RISS Solitaire Pak*** goes beyond the standard single game that is common to Windows programs in terms of variety and level of challenge.

"Everyone who has a PC has played solitaire," says Eric Robichaud, CEO of RISS. "But after awhile, it becomes the same old, stale game. Our new collection takes solitaire and turns it into a fresh series of cerebral challenges, with a variety of different set-ups and schematics, instead of a time-wasting card flip."

RISS Solitaire Pak 5-Pak features the following games: Golf Solitaire, Frog Solitaire, Klondike Solitaire, King Albert Solitaire and The Vanishing Cross; it is available for \$19.95. ***RISS Solitaire Pak 8-Pak*** features the aforementioned five games plus Pyramid Solitaire, Canfield Solitaire and Friday the 13th; it is available for \$29.95.

RISS Solitaire Pak is also available in a shareware version containing King Albert and Frog Solitaire. The shareware version can be downloaded via the RISS BBS (401-767-3931), the RISS Support area on CompuServe (GO RISS, Lib 5), or through the company's new Web Site (<http://www.RISoftSystems.com>), or they can be purchased on diskette directly from the company

Rhode Island Soft Systems

Custom Screen Savers

- New Marketing Tool: Screen Savers Burn Brightly -

Rhode Island Soft Systems can create a custom screen saver that displays a company logo or other ideas that capture the essence of one's business. Most marketing savvy companies realize that their logo can be their most important asset. Instead of leaving either their own (or a customer's) screens displaying some random data screen, they should let the computer be a "silent salesman" and promote their logo! The animation in these custom screen savers can range from simple to very complex. Other applications for these screen savers include:

- * **OEM Bundling** Businesses that ship computers with Microsoft Windows pre-loaded can have their own custom screen saver pre-loaded also, and automatically display their logos for customers -- the ultimate marketing tool!
- * **In House Corporate Use** Display one's own company logo on in-house systems. Also excellent for remote "field offices," showrooms, etc. where customers may see the computer. A corporate logo is a much more useful subliminal salesman than a data screen!
- * **Premiums** Use these screen savers as a give-away to potential customers to spread one's business presence, or as a special promotion. The possibilities for a custom screen saver, as a premium, are boundless. This computer software can be given cheaper than most custom logo "trinkets" such as key chains and mugs.

Cost Custom screen savers are priced on an individual basis, based upon quantity, number of screen saver modules ordered, complexity, etc. Please call for additional information.

Rhode Island Soft Systems

TrueType Signature Service

- Put Your John Hancock in Your Computer ! -

Rhode Island Soft Systems can now create a TrueType font that contains a person's own signature and initials. As with all TrueType fonts, these signatures and initials are fully scalable and may be used in any application supporting the use of TrueType fonts.

Productive uses for these signatures include:

- * Allow secretaries to type memos and letters and have the ability to apply the boss' signature as appropriate.
- * Add signature(s) and/or initials to memos and print them directly to the printer eliminating the need to sign the document later and fumble with the copy machine if more than one copy is required.
- * No more cutting and pasting signatures onto the bottom of documents for making copies.
- * Multiple original documents can be printed without having to sign each one individually.
- * This can help increase productivity in the workplace or at home with no learning curve required -- it's a true, immediate productivity tool.

Cost The base price for a signature TrueType font is \$75. Add \$20 for initials also. Quantity discounts are available. Contact RISS for specifications, details, and instructions.

Rhode Island Soft Systems

EMERI

Rhode Island Soft Systems, Inc. has released *EMERI*[™] Version 1.3, a DOS program for viewing Windows' cardfiles from DOS. This program is a handy, convenient DOS program that no "part-time Windows user" should be without.

EMERI[™] provides the complimentary features needed to make the Windows Cardfile a truly useful product:

- * As a DOS program, it doesn't require Windows. Great for accessing cardfiles on a laptop that doesn't have Windows -- copy cardfiles from desktop to laptop, and use *EMERI*[™].
- * Auto dialer features better than Windows' own -- *EMERI*[™] dials **any** number on the card!
- * Case insensitive searches
- * Partially qualified searches
- * Remembers last search for fast re-searching
- * Quick Reference help screen
- * Fast "pick lists" for moving among multiple cardfiles
- * Quick and easy installation and configuration utilities
- * User can pre-configure *EMERI*[™] so that it "remembers" settings every time

The Windows Cardfile program offers a great means of organizing phone numbers, addresses, and other types of information in an index card format, but is almost useless to "part-time Windows users" -- the majority of users who bounce in and out of Windows. Whenever in DOS, simply use *EMERI*[™] to look up cards instead of getting frustrated while waiting for Windows to boot, solely to look up a card.

Coming soon: pre-stocked cardfile databases for use with *EMERI*[™] containing phone numbers of Airlines, Hotels, Car Rental Agencies, etc. across the U.S. and world.

Cost \$16.95 (U.S.). All orders add \$5.00 shipping and handling.

Rhode Island Soft Systems

RISS Font Paks

With the advent of Windows 3.1, Windows now offers built-in support for new and improved scalable typefaces called TrueType fonts, which give a fairly accurate representation (on screen) of what a document will look like once printed. Because they're scalable, these fonts can be sized to be as big or small as desired.

Rhode Island Soft Systems, Inc. has released a line of three (3) TrueType Font Paks. Each RISS Font Pak contains ten (10) unique and interesting TrueType Fonts, yielding thirty (30) fonts in all. Once these fonts are installed, they become an integrated part of Windows, and can be used from any application that supports TrueType fonts (just about all do).

The fonts in this package are original, unique fonts that will spruce up any document, and provide the appropriate look for professional quality documents. Unlike the "dime a dozen" script typefaces, we strive to produce highly ornamental, unique fonts that a user wouldn't necessarily have. Because of their striking, decorated nature, these fonts are great for headlines.

In addition to the TrueType Font Paks, Rhode Island Soft Systems, Inc. also offers its Custom Signature Font service. Please refer to the Custom Signature Font section of this catalog for more information on having your signature turned into a computerized font.

Click here to see some samples of the fonts.

(Note: This is just a sample of a few of the fonts — the RISS Font Paks contain many more. Print quality is always higher than what is displayed on-screen.)

Cost \$19.95 per RISS Font Pak. As a **special offer**, order RISS Font Pak #1 and #2 for \$39.90, and receive RISS Font Pak #3 **absolutely free!** All orders add \$5.00 shipping and handling.

WinPak

Rhode Island Soft Systems has released its *WinPak*[™] collection -- three volumes each containing unique Windows[™] screen saver modules, TrueType[™] fonts, and Icons. This inexpensive Windows[™] product will bring hours of enjoyment to Windows[™] users who like their systems to come to life both when working and while they are idle.

WinPak[™] includes the features one would expect from a quality Windows[™] screen saver:

- * Full integration with the Windows[™] desktop means easy setup for users who like to frequently change their screen savers
- * *WinPak*[™] modules fully support encrypted password protection as implemented in Windows[™]
- * Six *WinPak*[™] modules are included with each volume, each using quality graphics and animation to liven one's desktop
- * Imagine! 200 icons ship with each volume of *WinPak*[™]. Icons are conveniently stored within two simple .DLL files to help keep directories neat and orderly
- * Four TrueType[™] fonts are also included with each *WinPak*[™] volume. These fonts will help give any document a look of distinction.

WinPak[™] provides the screen blanking features Windows[™] users have come to expect, and more! The *WinPak*[™] products will help turn the average Windows[™] desktop into a source of humor and fun. The ease with which the product is installed is amazing, and the enjoyment one will receive from it in the months to come is tremendous. See what some people are already saying about *WinPak*[™]:

PC-Computing "*Best Bets*" May, 1993 Issue

"Windows[™] screen savers that will make MAC owners cry with envy"
- Shareware Express Magazine, Spring 1993

Cost \$19.95 per volume. This deluxe package includes six screen saver modules, four TrueType[™] fonts, 200 Icons, and user documentation. As a **special offer**, order *WinPak*[™] #1 and #2 for \$39.90, and receive *WinPak*[™] #3 **absolutely free!** All orders add \$5.00 shipping and handling.

Rhode Island Soft Systems

PUBLISHING THE FUTURE

Rhode Island Soft Systems Announces New Publishing Division

WOONSOCKET, RI, October 21, 1994 — Rhode Island Soft Systems, Inc. (RISS) has been staking a name for itself as a highly skilled, very technical computer software development company. Until now, all major products have been developed in conjunction with strategic publishing partners. "These alliances have been extremely important to us," says William Zitomer, Vice President of Product Development, "and we intend to continue strengthening these relationships."

However, outside publishers have their own agendas, and new RISS product concepts don't always meet them. "As our company has grown, it's become apparent that we need to start publishing some of our own products, while we continue to work with our partners," says Zitomer.

To this end, RISS has decided to spin off a second company, Ocean State Publishing Corporation, to handle the sales and marketing tasks, while RISS continues to focus on top notch software engineering. The first new products to be published are scheduled to be CD-ROM-based titles.

RISS is a developer of consumer and business software programs, specializing in development of Windows products such as multimedia titles, screen savers, utilities, games, and technologies that are licensed to software publishers such as its Image Carousel still image screen saver engine. For more information contact Rhode Island Soft Systems at (800) 959-RISS or (401) 767-3106, Fax to (401) 767-3108, or write to RISS at P.O. Box 748, Woonsocket, RI 02895-0784.

Rhode Island Soft Systems

Rhode Island Soft Systems, Inc. unveils CompuServe Support Forum

WOONSOCKET -- Rhode Island Soft Systems, Inc. has just announced the availability of its new Customer Support Forum on CompuServe. "The CompuServe Support Forum is an excellent complement to our own customer support BBS," says CEO Eric Robichaud, "because users already familiar with CompuServe can just come in and use the Forum. It's a lot easier to access than our BBS, and offers more services. Of course, all of our international customers can now access us via CompuServe where, before, international data calls to our BBS were too expensive, if even possible [due to noisy connections on many international calls]."

By typing GO RISS, and accessing section 5, users can access the three major services of the Rhode Island Soft Systems, Inc. Support Forum: messaging, files, and conferencing. Through the messaging section, which is analogous to a large, public Bulletin Board System, customers can communicate directly with RISS personnel, almost in real-time. "The messaging section is an invaluable asset," says Glenn Miller, the Manager of Technical Support at RISS. "Through this facility, our customers can quickly and easily ask questions and seek support at any time of the day or night. The public nature of the message section is a major asset, because it instigates conversations involving other customers as well as our staff, which not only helps us achieve better results, but also provides a lot of good brainstorming on recommendations and features that we can use for future versions of our products."

The file library of the forum will undoubtedly be the most traveled section of the forum. The file library is kept stocked with product samples, product information, update information, answers to frequently asked questions, program patches, help files, and the like.

The conferencing area provides a place for people to talk with one another "live," in real-time, and is expected to be the site of special meetings and presentations, as well as a place for users to directly interact with technical support personnel for immediate answers to pressing questions. The conferencing area is not expected to be the most

heavily utilized section of the forum, but will certainly be a benefit to users. "I originally met my wife on a conferencing system, " notes Eric Robichaud, "so it can't be all that bad!"

RISS Icon Pak

The graphical, point-and-click nature of Windows goes a long way towards making computers easier to use. The use of graphical elements, to represent features and functions, helps us to recognize what we want to do and be able to do it without memorizing commands, key sequences, and menus.

Fortunately, users are able to customize Windows by installing their own graphical symbols, called **icons**. This allows users to customize Windows with symbols that are meaningful to each individual user. It also allows people to personalize their computer system.

Unfortunately, most of us are either not very artistic, or don't have the time to sit around drawing new icons. Enter the RISS Icon Pak.

The RISS Icon Pak is a package containing 2001 unique and interesting Icon images for use with Windows. The icons are conveniently arranged, categorized, and divided into separate libraries for quick and easy location of icons.

The RISS Icon Pak comes complete with its own **Icon Viewer** utility, for quickly and easily perusing the icon libraries and installing or changing icons in Windows.

A completely automated "SETUP" program performs installation on "auto pilot."

Cost \$16.95. This deluxe package includes 2001 icons, plus an enhanced Icon Viewer utility which offers easy point-and-click changing of any icon. All orders add \$5.00 shipping and handling.

MULTIMEDIA NEWS

*FOR IMMEDIATE RELEASE * CONTACT: MARK BANKINS (805) 494-9996*

SOUND SOURCE INTERACTIVE, RHODE ISLAND SOFT SYSTEMS ANNOUNCE CO-DEVELOPMENT RELATIONSHIP

Following the release of T2: The Screen Saver, Sound Source Interactive has announced a co-development relationship with Rhode Island Soft Systems, Inc. to create screen savers, games and utilities for DOS and Windows 3.1.

Sound Source, based in Westlake Village, CA, holds multimedia licenses with Paramount Pictures, Carolco Pictures, Turner Home Entertainment, Lucasfilm Ltd, New Line Cinema and other studios.

Rhode Island Soft Systems' background includes development of large- and small-scale software and networking projects, both mini- and micro-based. Their current focus is on delivering DOS and Windows-based consumer software products, via the retail channels and through OEMs, according to Rhode Island Soft Systems CEO Eric Robichaud. Current products include screen savers, TrueType font packages and telecommunications software.

The two companies collaborated in the first quarter of 1993 to develop one of the most popular utilities of that year: a screen saver based on Terminator 2: Judgment Day. Featuring the voice and likeness of Arnold Schwarzenegger, plus special coded morphing effects, the product is still experiencing high sales, and has attracted the attention of film studios interested in developing screen savers, games, and interactive educational tools.

Armed with a license from Carolco Pictures, Sound Source developed the sci-fi-themed utility with the East Coast firm, communicating only via telephone and modem.

"We finally met, nearly a year after starting the project and six months after finishing it," said Sound Source CEO Vincent Bitetti. Before embarking on their next effort -- a science-fiction game -- Bitetti said the two companies' creative teams met "the old-fashioned way."

Robichaud acknowledged the crucialness of meeting face-to-face, "...especially before a project, just to set some parameters for each other," he said. "It's really about making our respective jobs easier. The methods in which they work are a mystery to us, and vice-versa. This isn't about setting limits; it's more about opening doors to other possibilities."

For games, screen savers and other utilities, the actual graphics work and coding will take place at a 3,000-plus mile distance. Concepts and structure will likely be discussed in a similar manner, both developers agree.

Well into the Information Age, such working relationships have become matter-of-fact. With an onslaught of fast and inexpensive telecommunications devices, as well as the proposed Information Superhighway and other technological advances, the need for “in-person” contact should diminish.

In early 1993, Sound Source consulted with several programmers to create a screen saver based on the hit film “Terminator 2: Judgment Day.” Rhode Island Soft Systems stood out from a crowded pack, say Bitetti.

After several weeks of telephonic meetings, says Robichaud, Sound Source set him a contract. “From then on, our modem was inundated with graphics and storyboard animation. There was no need for us to be in the same building.”

Thrilled with T2’s outcome, Bitetti and Robichaud soon agreed to further the relationship. “They delivered the project on time and on budget,” says Bitetti. “That’s a rarity in this business.”

Regarding the working distance, Bitetti and Robichaud agree that it’s a positive situation. “Space is a good thing, even when it’s three thousand miles away,” Bitetti said. They need to breathe, and so do we.”

“Distance will allow each of our companies to focus on our tasks,” said Robichaud. “We tend to communicate very well, anyway. For these projects, the phone is just as good as being there in person. Plus, this way we can make faces at each other.”

Ocean State Publishing Corp. Proudly Debuts JIXXA™ As the World's First CD-ROM Jigsaw Puzzle Game

— Say "So Long, Solitaire!" For a New Standard in Desktop Entertainment —

WOONSOCKET, RI, February 15, 1995 — Ocean State Publishing Corp. is proud to announce the availability of *JIXXA™ - The Premier Edition*, the world's first CD-ROM jigsaw puzzle game. This unique collection of 12 full-color jigsaw puzzles—for beginner, intermediate, and expert levels—provides the most challenging brain game ever devised for the PC user.

"I dare anyone not to become addicted to *JIXXA*," said Eric Robichaud, CEO of Ocean State Publishing. "You can say: 'So long, Solitaire!' because *JIXXA* offers a state of mental stimulation you can never achieve by flipping cards around."

JIXXA inaugurates a new world of jigsaw puzzles, combining the traditional excitement of uniting hundreds of interlocking pieces into a picture with the wizardry of CD-ROM technology. Games can be saved for extended periods, allowing a challenge which can carry over days, weeks, or even months. Features include three different sizes of puzzle pieces, a "pick-up-and-drop-a-few" option to work a limited number of pieces at a time, an on-screen bin for holding pieces not in use, a challenge timer to pit the player against the clock, rotating pieces to provide further concentration for expert game lovers, and auto-solve to bring the puzzle to a speedy close. *JIXXA* pieces can be manipulated with a mouse and solidly interlock with an option musical note of affirmation; players have the option of featuring the puzzle's picture on-screen during the game.

JIXXA - The Premier Edition and the complimentary *Jixxa - World Travel Edition* are designed for PCs featuring either Windows 3.1 or Windows 95, 4MB of memory, 1MB of hard drive space, and a CD-ROM drive. They are now available at a suggested retail price of \$29.95 each, or purchase both for \$49.90 for a savings of \$10.00. Please add an additional \$5.00 for shipping and handling to all orders.

Ocean State Publishing Corp. is a leading developer of CD-ROM entertainment titles. Among its recent titles is New Frontiers, a CD-ROM screen saver featuring more than 400 photographs from NASA celebrating the exploration of space. For more information, contact Ocean State Publishing Corp., P.O. Box 747, Woonsocket, RI 02895-0784; tel. (401) 767-3376; fax (401) 767-3108; world wide web

Ocean State Publishing Corp. Achieves Lift-Off With *New Frontiers* Screen Savers on CD-ROM

**— Over 400 NASA Space Mission Images, Many New to CD-ROM,
For Screen Saving, Desktop Wallpaper and Royalty Free Art —**

WOONSOCKET, RI, February 2, 1995 — Ocean State Publishing Corp. offers CD-ROM users a desktop exploration of the universe: *New Frontiers* screen savers, featuring over 400 full-color NASA images from historic satellite, orbital and lunar missions. Many of the images featured on *New Frontiers* have never been published on CD-ROM format before.

This CD-ROM celebration of space and those who seek to conquer it includes the popular *Image Carousel™* screen saver software, which is quickly becoming the new standard for this product genre. In addition to traditional screen saver and desktop wallpaper usage, *New Frontiers* allows the user to use its wealth of images for royalty free art in desktop publishing.

“Begging Neil Armstrong’s pardon, *New Frontiers* represents one small step for man and one giant leap for screen savers,” said Eric Robichaud, CEO of Ocean State Publishing. “By bringing the most exciting explorations of the century to the most exciting technology of the day, we have linked the infinity of space to the infinite possibilities of CD-ROM.”

New Frontiers retails for \$24.95 and requires PC compatibility of 386 or higher, 4MB of RAM, Windows 3.1 or Windows 95, 1MB of hard drive space, a CD-ROM drive and a VGA monitor supporting 256 colors. For more information, contact Ocean State Publishing, P.O. Box 747, Woonsocket, RI 02895-0784; tel. (401) 767-3376; fax (401) 767-3108.

Rhode Island Soft Systems

Create a Stunning Internet Presence With *WEB WHIZ* Home Page Creator

**--New CD-ROM Provides a Complete, User-Friendly Way
To Establish a Professional World Wide Web Site--**

WOONSOCKET, RI, October 30, 1995 — Ocean State Publishing Corp. announces the release of *Web Whiz*, a new CD-ROM which provides the most complete and user-friendly tool for designing a professional and graphically appealing Home Page for the Internet's fast-growing World Wide Web.

You don't have to be a computer technician or graphic artist to benefit from this product. Designed for the average computer user, *Web Whiz* contains over two thousand graphic files, plus two professional HTML editors, two Web browsers, and hypertext HTML reference materials. "I've never seen such a complete and organized Web graphics library. Besides all the software, this CD also contains thousands of professional graphics elements including stylized bullets, buttons, icons, dividing lines, symbols and background textures," says Eric Robichaud, CEO of Ocean State Publishing Corp. The CD-ROM also includes tutorials for getting the fullest potential from *Web Whiz* and tips for placing the completed Home Page on the Internet for maximum exposure.

Web Whiz is ideal for any organization or individual seeking a World Wide Web presence as a means of bringing information, products, services or ideas to the Internet community. Businesses, law firms, real estate brokerages, schools and universities, trade associations, non-profit groups, financial institutions, cultural organizations, government agencies, political campaigns, law enforcement entities, wholesale/retail operators, special event organizers and advertising/marketing agencies are just a few among the diverse sectors who can use *Web Whiz* to reach the online world.

"The real world gets smaller as the cyber world expands," says Robichaud. "The need for having a presence on the Web grows each day. *Web Whiz* will get you onto the Web by giving you the chance to design your own Home Page directly from your PC."

Web Whiz is designed for PCs featuring either Windows 95 or Windows 3.1, 4MB or more memory, 1MB of hard drive space, a 256-color monitor and a CD-ROM drive. It is now available at a suggested retail price of \$24.95.

Ocean State Publishing Corp. is a leading developer of CD-ROM entertainment titles. Among its recent titles are *Jixxa*, the first CD-ROM jigsaw puzzle game, and *New Frontiers*, a CD-ROM screen saver featuring more than 400 color photographs from NASA celebrating the exploration of space.
