

## SummaryFieldDefinitions Collection

The **SummaryFieldDefinitions** Collection is a collection of summary field definitions. Can be from either **CrossTabObject** Object or **Report** Object. Access a specific SummaryFieldDefinition Object in the collection using the Item property.

### Properties

**Application** - Returns a reference to the Application Object this object is associated with. Read only.

**Count** - Returns the number of summary fields in the collection. Read only.

**Item** - Returns SummaryFieldDefinition Object. Item has an index parameter that is a numeric, 1-based index (i.e., Item (1)). The items in the collection are indexed in the order they were added to the report. Read only.

**Parent** - Reference to the Parent object CrossTabObject Object or Report Object). Read only.

**Report** - Reference to Report Object. Read only.

### Remarks

Instead of using the Item property as shown, you can reference a summary field directly, for example, SummaryFieldDefinitions (1).
