Font-o-Rama 2.0

Welcome to Font-o-Rama!

I hope you are enjoying the Font-o-Rama template. If this is the first time you have downloaded and run Font-o-Rama, then you probably aren't interested in what is new for this version. For those of you who have used previous versions of Font-o-Rama, my thanks, because many of the differences are a direct result of suggestions from some of you.

New in Version 2.0:
- ✓ Added a form so that you can enter your own sample text instead of the default text.
- ✓ Altered the column widths so that the sample text column will display more text in fewer lines than before.

Thank You,
Eric Rice
