- **Disclaimer**

Overview

HTML Font and Body Tag Wizard is a **productivity tool** used to aid in the construction of valid FONT and BODY tags.
These tags can be created to be visually appealing using easy manipulation controls.
A preview area shows what the resulting FONT and BODY text would look like in a browser.
The tags can then be cut and pasted into an HTML document.

- **Easy** to use!
- **Experiment** with different colors using a pre-defined palette of most commonly used colors, including a floating palette of 215 standard "browser-safe" colors.
- Support for a **Background Picture** in .gif format
- Switch instantly between picture and color backgrounds
- Pop-up window of 100 special characters which can be copied to the clipboard.
- **Multiple Styles** may be saved
- **Font tag may be formatted** Bold, Italic and centered. Tags are updated automatically
- Alternate font names are supported
- HTML Font and Body Tag Wizard is **Freeware**!

Installation

1   copy 'fbw.zip' to an empty sub-directory on your hard drive

2   unzip the 'fbw.zip' file

3   Run 'FBWizard.exe'.   That's all there is to it!

- **No** Files are copied outside of this directory, everything that is needed to run the program is contained in the program's directory.   Enjoy!
