

WinNavigator v1.76

Powerful but easy-to use file manager -- a good replacement of Windows Explorer or Norton Commander. Besides usual file management (copy/move/delete etc), it contains built-in viewer for 9 most-popular graphic formats, and 11 sound/music format, as well as video clips (Microsoft AVI). In addition, it supports all compressed files like zip, arj, rar etc (showing them as regular folders), has the SysInfo panel, internet dialer, clipboard viewer, calculator, audio CD player, and resource explorer. As a bonus, the program contains two simple games (tetris-like one, and Life). Multi-language support is also there (now available: English, Italian, Polish, Russian, Czech, Hungarian, Spanish, Lithuanian, German).

Features of WinNavigator:

- * 32-bit file manager for Windows95/98, WindowsNT 4.0, Windows2000
- * Tested and optimized for Windows2000
- * Compiled under WindowsNT platform
