iMac

Still the easiest route to the Internet, the new iMac delivers blazing speed, gets you online in under 10 minutes, and introduces a clearly amazing new keyboard and mouse. It's available in four new models, including three—iMac DV, iMac DV+, and iMac DV Special Edition—that feature Apple's groundbreaking digital video technology. Now everyone can enjoy a faster, cooler iMac experience—more affordably than ever before.

iMac

Features

Affordable high performance
- Up to 500-MHz PowerPC G3 processor
- ATI RAGE 128 Pro accelerated graphics
- 64MB or 128MB of SDRAM; supports up to 1GB
- High-capacity hard disk drives up to 30GB[1]
- Slot-loading CD-ROM or DVD-ROM drive
- Quiet, no-fan design
- Apple Pro Keyboard and Apple Pro Mouse

Fast, easy Internet access
- 30 days of free Internet service from EarthLink
- Setup Assistant that gets you on the Internet in less than 10 minutes and automatically signs you up for iTools, a suite of free Internet services from Apple
- Preinstalled Internet software for browsing the web and sending and receiving email
- High-speed 56K V.90 modem[2]
- Built-in 10/100BASE-T Ethernet, ready to connect to a DSL or cable modem
- Support for AirPort wireless networking on all DV models[3]

Plug-and-play digital video (DV models)
- Two FireWire ports let you connect DV camcorders, hard disks, and other high-speed peripherals
- Preinstalled iMovie software makes it quick and easy to create high-quality DV movies

Easy setup and use
- All-in-one system includes everything you need—just plug in the computer and you're ready to go
- The Mac OS provides you with the world's easiest-to-use system software
- Preinstalled applications let you begin working and playing right away
- Interactive tutorials help you get started with your new computer
- Comprehensive online help is available whenever you need it

Meet the most beautiful iMac models ever. Featuring refined curves, a highly polished surface, and luscious new colors—Ruby, Indigo, Sage, Graphite, and Snow—they're a pleasure to behold. The new Apple Pro Keyboard and Apple Pro Mouse make the iMac even more appealing. But iMac isn't just beautiful on the outside. Inside, there's a lightning-fast PowerPC G3 processor and a massive hard drive to store movies, photos, and other brilliant creations. And our revolutionary no-fan design makes this exceptional computer exceptionally quiet.

iMac is still the best, simplest computer for the Internet. With a built-in 56K modem[2] and Ethernet port, it lets you surf the web via dialup, Ethernet, DSL, or cable modem. The Setup Assistant can get you on the Internet in under 10 minutes and automatically signs you up for iTools, a suite of free Internet services from Apple. What's more, with the optional AirPort Card and AirPort Base Station, you can surf without wires from almost anywhere in your home, school, or office, within a 150-foot radius of the base station.[3]

Want to play movies? Slide your favorite titles into the slot-loading drive on your DVD-ROM–equipped iMac and enjoy high-resolution movies with the heart-thumping stereo sound of Harman Kardon audio technology. Want to make classics of your own? Simply connect your digital camcorder to a DV model via the FireWire port, then launch the newest version of iMovie—Apple's easy-to-use digital video editing software—to create professional-looking titles, transitions, and special effects. Play your masterpieces full-screen, email them to friends, or make copies on videotape. Using HomePage, a feature of iTools, you can even post your movies to the web.

The new keyboard and mouse let you work with precision and grace. Extremely comfortable and accurate, the Apple Pro Mouse is uniquely designed to fit any hand and let you click virtually anywhere on its top. Its optical tracking sensor offers precise cursor control and won't skip, stick, or need cleaning. The full-size Apple Pro Keyboard, with programmable function keys, lets you launch applications, adjust sound, navigate documents, and play video games.

For those who want it all plus a little more, we offer the powerhouse iMac DV Special Edition. It comes in two unique colors—Graphite and Snow—and features everything you'll find in the other iMac models, in addition to a faster processor, twice the standard RAM, and a larger hard drive.

Beautifully enhanced, unabashedly innovative, and more affordable than ever, these are the hottest—and coolest—iMac models yet.

Technical Specifications

Processor and memory
- 350-, 400-, 450-, or 500-MHz PowerPC G3 processor
- 512K backside level 2 cache
- 100-MHz system bus
- 64MB or 128MB of PC100 SDRAM (3.3-volt, 64-bit-wide, 168-pin, running at 100 MHz); two DIMM slots support up to 1GB using 64MB, 128MB, 256MB, or 512MB DIMMs

Storage
- 7GB, 10GB, 20GB, or 30GB Ultra ATA hard disk drive[1]
- Slot-loading 24x-speed (maximum) CD-ROM drive; or slot-loading 4x-speed (maximum) DVD-ROM drive (plays DVD-Video discs; plays CD-ROMs at up to 24x speed)
- Support for external FireWire and USB storage devices (FireWire on DV models only)

Display
- Built-in 15-inch shadow-mask CRT (13.8-inch diagonal viewable image size); 0.28-mm dot pitch
- Onscreen geometry adjustment to keep display images properly aligned throughout its lifetime
- Theater Mode for enhanced brightness of full-screen video
- Flip foot for 17° tilt

Graphics support
- ATI RAGE 128 Pro graphics accelerator with 8MB of SDRAM graphics memory and AGP 2X support
- Three crisp, flicker-free screen resolutions: 640 by 480 pixels at 117 Hz, 800 by 600 pixels at 95 Hz, and 1024 by 768 pixels at 75 Hz
- 24-bit true color at all resolutions for displaying millions of colors

Communications
- Built-in 56K V.90 modem (RJ-11 connector)[2]
- 10/100BASE-T Ethernet (RJ-45 connector)
- Optional 11-Mbps AirPort Card; IEEE 802.11 DSSS compliant (DV models only)[3]
- Optional AirPort Base Station containing 56K modem and 10BASE-T Ethernet port (DV models only)[3]

Peripheral connections
- Two USB ports (12 Mbps each)
- Two 400-Mbps FireWire (IEEE 1394) ports (DV models only)

Audio
- Integrated high-performance Odyssey audio system from Harman Kardon
- Built-in microphone for speech recognition and audio recording
- Front-mounted dual mini headphone jacks
- Analog audio input and output minijacks; up to 16-bit stereo and 44.1-kHz sampling rate
- Support for external USB audio devices

Video (DV models)
- Standard VGA output port (15-pin mini D-Sub connector)
—Support for video mirroring: external devices display an image identical to that shown on the built-in display

Keyboard and mouse
- Apple Pro Keyboard with full-size function and navigation keys, audio controls, and media-eject key
- Apple Pro Mouse
—Optical sensor provides precision cursor control
—Features a comfortable design that allows virtually the entire surface to be clicked
—Works on a wide variety of surfaces
—Has no mouse ball to require cleaning

Electrical requirements and agency approvals
- Line voltage: 100V to 260V AC
- Frequency: 47 to 63 Hz, single phase
- Maximum continuous power: 150W
- EPA ENERGY STAR compliant

Environmental requirements
- Operating temperature: 50° to 95° F (10° to 35° C)
- Storage temperature: –40° to 116° F (–40° to 47° C)
- Relative humidity: 5% to 95% noncondensing
- Maximum altitude: 10,000 feet (3,048 m)

Size and weight
- Height: 15.0 inches (38.1 cm)
- Width: 15.0 inches (38.1 cm)
- Depth: 17.1 inches (43.5 cm)
- Weight: 34.7 pounds (15.8 kg)

Visit the Macintosh Products Guide at www.apple.com/guide for the latest information on more than 17,000 hardware and software products for your new computer.

Apple offers a free suite of Internet services, including iReview, iCards, and iTools, to help you get more out of using the web. Visit www.apple.com to sign up.

Safeguard your iMac for three full years with the optional AppleCare Protection Plan. You'll benefit from a host of services, including powerful diagnostic software tools, online support, regular email updates, and Apple's toll-free helpline. And for most problems, no problem: We'll fix your hardware for the next three years. You have the assurance of being helped by Apple certified technicians using genuine Apple parts—and the reassurance of knowing that your iMac is covered. For more information, visit www.apple.com/support.

Build-to-Order Options

In addition to choosing from Apple's preconfigured systems, you can order iMac DV models with factory-installed options such as additional RAM and AirPort wireless networking from your authorized Apple reseller or through the online Apple Store (www.apple.com/store).

Other Options

Product	Order no.
AirPort Card	M7600LL/B
AirPort Base Station	M7601LL/B

[1] For hard drive capacity measurements, 1GB = 1 billion bytes; actual formatted capacity less.

[2] Actual modem speeds lower; speed depends on connection rate and other factors.

[3] Wireless Internet access requires AirPort Base Station and Internet access (fees may apply). Some ISPs are not currently compatible with AirPort, including America Online. Range may vary with site conditions.
