Odometer for Windows 95
Version 2.0 - 16 05 97
Copyright © 96/97 - Frederic Ribau

What is an ODOMETER?

An Odometer is just a sample program who gives you the distance you travel with your mouse. At this time, it's only designed for Windows 95. This program can be accessed from the Windows taskbar just like the sound control.

What do I need to run Odometer?

A standard PC where you can run Windows 95 and, of course, a mouse! You need also the Visual Basic 32 bit files (VB40032.DLL and OLEPRO32.DLL) to execute this program. If you don't have this one, you can download it on the Microsoft ftp site (ftp.microsoft.com) or on the Web site of my homepage (http://perso.club-internet.fr/boudin/).

Installing Odometer.

Open the directory where you previously unzipped the files. Copy the EXE file in you Windows directory, for example. Then add a shortcut you tour startup menu using the
Star/Control Panel/Taskbar.

To start the program.

When you computer starts, Odometer will also start, normally. There's a shortcut in your Start Menu. If the program doesn't start by itself, point to the directory where Windows is installed (i.e.: c:\windows) and then click on the file: Odometer.exe

Uninstalling Odometer.

To uninstall this program, simply open your explorer, and then erase Odometer.exe from the directory where you put it. Don't forget to erase the shortcut if you have created it!

What's the shareware version doing?

As part of the shareware group, this program is limited. You can only use this program for the first 100 connections. If you appreciate Odometer, please send to me your registration form (see Register.txt), and you'll receive as soon as possible the keycode to remove this protection.

DLL Required.

- VB40032.DLL (706 Ko)
- OLEPRO32.DLL (32 Ko)

Shareware notice and licensing terms.

This program is being distributed as shareware. This means that you may use it for a short trial period, but you must register if you choose to use it for more than a few days.

The registration fee covers a one person, one site, one computer and one eternity license.

The license covers all versions of this software: past, present and future! When new versions comes out, registered users will automatically have the legal right to use it. The license is personal and may not be transferred to another person or institution.

When you have paid you registration fee, a personal registration keycode will be sending to you, that will remove all imposed limitations of this software.

What's New (16 & 32 bit)?

- <u>Version 1.0.0</u>:   32 bits : Original Program.
- <u>Version 1.4.0</u>:   32 bits :   remove some bugs using the "miles" distance.
- <u>Version 1.5.0</u>:   32 bits : Add the "Statistic Menu".
- <u>Version 1.6.0</u>:   32 bits : Change some modifications about the "Statistic Menu".
- <u>Version 1.9.0</u>:   32 bits : Rewrite completely the source code. Add some menu.
  16 bits : Create the 16 bits version of Odometer, with the same options and controls.
