

KAI'S POWER TOOLS 3 DEMONSTRATION VERSION

This demonstration version of Kai's Power Tools will allow you to explore the entire set of filters enabling you to see all the the features in action "before you buy." You will be able to open and run all of the features, but your changes will not be applied to your image.

Since Kai's Power Tools 3 (for Windows 95/Windows NT) is a set of plug-ins, a "Host Program" is required to run this demo. At this time, versions of Adobe Photoshop, Fractal Design Painter, COREL PhotoPaint, Micrografx Picture Publisher and many others are compatible with Kai's Power Tools. To install this demo version, double click on or run setup.exe. You will then be asked to locate the destination directory in which to install Kai's Power Tools. Select the "Plug-ins" or "Filters" directory of your "Host Application" and click Install. Kai's Power Tools will then appear as one of the sub-menus within the "Host Application".

If you would like more information regarding Kai's Power Tools, please call MetaTools inside sales at **(800) 472 9025** or contact your favorite reseller for pricing and availability.
