1.2 df_lib - Introduction

Introduction

df_lib is a small library for the Amiga version of PureBasic. Currently it only has two commands; LSL() and LSR(). It may support more in the future.

1.3 df_lib - Copyright and distribution

Copyright

This program is designated as Freeware and not Public Domain. As such it is the copyrighted property of the author.

Distribution

This program may be freely copied and distributed provided that no charge is made for the copy and that none of the files are altered, omitted or added to in any way.

PD companies are permitted to charge for the program in order to cover any costs or overheads provided that no more than £5.00 (sterling) is charged per copy (this includes postage and packaging). None of the files may be altered, omitted or added to in any way without the prior consent of the author.

1.4 df_lib - Note to magazines and CD-ROM publishers

Note to magazines and CD-ROM publishers

If you intend to include this program on a coverdisk or CD-ROM please contact me first so that I can ensure that you have the latest version of the program.

1.5 df_lib - Disclaimer

Disclaimer

This software is provided "as is". I make no guarantees about the performance of this program and I will not under any circumstances accept responsibility for any loss of data or damage to equipment as a result of using this program. This software is to be used ENTIRELY AT YOUR OWN RISK.

1.6 df_lib - System requirements

Minimum system requirements

An Amiga with a full working installation of PureBasic.

1.7 df_lib - Installation

Installation

To install simply copy the PureLibraries folder to your PureBasic directory.

1.8 df_lib - A message from the author

A message from the author

If you find this program useful, I would greatly appreciate any comments or suggestions you may have regarding it. This will also let me know if it is worthwhile supporting and updating this program.

1.9 df_lib - Instructions

Instructions

LSL(number,shift)

Logical Shift Left where 'number' is the starting number and 'shift' is the number of times it should be shifted.

LSR(number,shift)

Same as LSL(), only it shifts to the right.

1.10 df_lib - Frequently asked questions

Frequently asked questions

None at present.

1.11 df_lib - Program history

Program history

Version 1.0

First release.

1.12 df_lib - Contacting the author

Contacting the author
