Congratulations on your receiving of the **Virtual BookMaker** demo.

QUICK START

Double-click on INSTALL.EXE. Follow the onscreen prompts. Less than 400 K of hard disk space is needed.

Double-click the left mouse button on the VBOOKPCD icon. Select a group of 20 images from the FILES menu.

After the thumbnail images load, double-click the left mouse button while pointing at an image.

The image appears on your screen in the highest color format your system supports.

Press the right mouse button. A ZOOM box appears. After selecting an area, click the left mouse button. A 4X zoom of the image appears on your screen.

No jaggies! No pixelation! Fantastic color!

Welcome to **VIRTUAL BOOKMAKER** and Kodak Photo CD!

The demo version included on this CD disc will only display Photo CD images from the disc that you received it on. The VBOOK presentation program will display a great variety of multimedia images in scripts that are easy to create and use.

We hope you enjoy the programs. See the ORDER.WRI file for information on getting the full version of Virtual BookMaker that can be used with your own Photo CD graphics
