# CyberSpeed™

CyberSpeed is the televised motorsport of the future. A high-tech, high velocity racing game that makes Formula One racing look like a leisurely Sunday afternoon drive. It is watched by millions all over the globe on the popular WorldScape TV channel.

Each racing craft in CyberSpeed is attached to the course by a guidance beam. High velocity is maintained by keeping the tension on the beam low as you turn fiendishly tight corners, dodge obstacles and blast other racers out of your way.

# CyberSpeed™

CyberSpeed is a real-time fully texture-mapped 3D racer, offering a choice of 1st and 3rd person viewpoints during races.

# CyberSpeed™

There are two levels of difficulty in CyberSpeed, the harder requiring you to play the tracks in the opposite direction. It is also faster and your opponents are more aggressive.

# CyberSpeed™

MINDSCAPE®

You can choose to fly any one of eight different ships, each of which handle differently. There are also hidden ships to be found. Temporary power-ups can also be collected on the tracks.

# CyberSpeed™

MINDSCAPE®

Each ship has its own pilot, with their own individual style. These pilots have travelled from all over the world for the CyberSpeed races.

# CyberSpeed™

There are 10 tracks (plus 5 bonus tracks) to choose from, with a wide range of scenic themes including water and an asteroid belt. Claustrophobia-inducing tunnels feature prominently in many of the tracks.

# CyberSpeed™

Between races, advertisements appear from the CyberSpeed sponsors. These were created using SoftImage Creative Environment and feature original and amusing products.

# CyberSpeed™

CyberSpeed boasts a spectacular introduction sequence which emphasises the aggression and skill needed to be a successful pilot in the races.

# CyberSpeed™

Windows '95 version available from all good retailers in November '95.

Also available for Sony Playstation.
