Mplayer is the first multiplayer game service that brings the excitement of realtime, fast-action multiplayer games to the Internet's World Wide Web.

Wander through Mplayer's web pages, sampling the virtual arcades until you find a game you want to play. Check out the latest multiplayer games and test your skills against millions of potential opponents. Meet other players who want to play the same game you do. Participate in contests, tournaments, and special events all oriented toward meeting other gamers and encouraging friendly competition.

And if this isn't enough, Mplayer is speech-enabled, so you will be able to taunt your opponents and hear them scream with laughter as they match their wits, intelligence, and dexterity against you. In addition, text, scribble, and voice-based chat areas will provide a place to hang out with friends, meet other players, and even plot winning strategies with their teams.
