

EarthLink Network, Inc. EarthLink Dialer

The EarthLink Dialer is a new interface for Windows 95 Dial-Up Networking. It supports multiple accounts, locations, and access numbers, making connecting to EarthLink a quick and easy process. The configuration section contains an easy to use screen for access number updates and changes as well as an event log that will provide information regarding your connection attempts.

Configure Screens

Clicking the Configure button on the Connect to EarthLink window brings up the Dialer Properties window for the connection. This window offers three tabs for changing how you connect to Earthlink.

- Use the **Phone Numbers** tab to change the access number you use for connecting to EarthLink.
- Click the **Dial-Up Networking** tab to change your auto-dial and redialing options.
- Click the **Phone Number Update** tab to set you update options for the access phone numbers.
- Click the **Event Log** tab to view the event log that tracks your connection attempts.

Dial-Up Networking

Click on any field or button on the following screen to see a description of its use.

The screenshot shows the 'Dialer Properties' dialog box with the 'Dial-Up Networking' tab selected. The 'Dial-Up Connection' section is active, showing a checked box for 'Connect to the Internet as needed'. Below this, a dropdown menu is set to 'EarthLink lisa239'. There are three buttons: 'Add...', 'Properties', and 'Modems...'. Below these are four checked options: 'Prompt for information before dialing', 'Launch browser after connecting' (unchecked), 'Play sound after connecting and disconnecting', and 'Display connection monitor'. The 'Redial' section is also checked, with 'Before giving up, retry' set to 3 times and 'Between tries, wait' set to 0 mins and 5 secs. At the bottom are 'OK', 'Cancel', 'Apply', and 'Help' buttons.

Phone Numbers | **Dial-Up Networking** | Event Log

Phone Number Update

Phone number update enables you to define how often you want to update your EarthLink access phone numbers. You can update the phone numbers immediately by clicking the **Update Phone Numbers Now** button.

The screenshot shows the 'Dialer Properties' dialog box with the 'Phone Number Update' tab selected. The dialog has a title bar with a close button (X) and four tabs: 'Phone Numbers', 'Dial-Up Networking', 'Phone Number Update', and 'Event Log'. The 'Phone Number Update' tab contains a section titled 'EarthLink phone numbers' with four radio button options and one checkbox option. The first option is 'Update phone numbers every 14 day(s)', with '14' in a spin box. The second is 'Update phone numbers as-needed (EarthLink will update automatically)'. The third is 'Don't update phone numbers'. The fourth is 'Update phone numbers next time I'm connected to the internet', which is a checkbox. Below these options is a button labeled 'Update Phone Numbers Now'. At the bottom of the dialog are four buttons: 'OK', 'Cancel', 'Apply', and 'Help'.

EarthLink Dialer Connection Screen

The EarthLink Dialer is your gateway to the Internet. Use this connection screen to decide what Dial-Up Networking connections you want to use, select alternate access numbers to connect to, or even different dialing locations.

Phone Numbers

The Phone Numbers tab allows you to adjust all the access numbers used to connect to EarthLink. From here you update to the latest list of access numbers, adjust what numbers you will call and even the order they call in. You may also configure different access number for different locations if your one of those people who move your computer around.

Dial-Up Networking

The Dial-Up Networking tab gives you the ability to determine what Dial-Up Networking connection to use when AutoConnect is enabled. AutoConnect is the ability to bypass the manual dialing procedure. When you start a program that requires a connection to the Internet, Windows will automatically launch the Dial-Up Networking connection specified and connect for you.

Phone Number Update

The Phone Number Update tab give you the ability to set up the Dialer to automatically update your available access numbers list and to set the frequency for this update.

Event Log

The Event log is designed to show information regarding each connection you make to EarthLink. This information can be very helpful when having connection problems by providing the error messages reported by the dialer during the connection phase. If you are talking to an EarthLink Technical Support Representative, it is very likely they will go here and look at the logs to see the types of problems you have had connecting.

Identifies where you are calling from, such as Default Location, Home, Office, On the Road. All of the settings on this screen relate to the location shown here. Having more than one location defined enables you to set the access numbers and dialing properties for each location. For example, at your office you may need to dial 9 to get an outside line and the access number may be different than the access number you use from home.

You can select a different location by clicking the  and highlighting the desired location.

To change the dialing properties for the selected location, click .

To add a new location, click .

Opens the Dialing Properties dialog so you can set the area code for the selected location, enter any numbers/codes needed to get an outside line or disable call waiting, or enter a calling card number. Any settings on this screen will be used automatically each time you try to connect to EarthLink from this location.

Displays the name of the country you are dialing from (for the selected location).

You can select a different country by clicking the  and highlighting the desired country.

Displays the two character code for the state or province you are dialing from (for the selected location), if applicable. Not all countries have states or provinces relevant to selecting an EarthLink access number.

You can select a different state or province by clicking the  and highlighting the desired state or province.

Lists the phone numbers you selected for connecting to EarthLink. The numbers will be dialed in the order listed until a successful connection is established.

You can change the order of the phone numbers in this list by selecting the number you want to move and clicking the  or

Select the number(s) you want to [add](#) to the **Phone number to dial for current location** list then click . You can [remove](#) numbers from the **Phone numbers to dial for current location** list by selecting the number you want to remove and clicking

Displays a list of access numbers available for the selected country and state/province.

Select the number(s) you want to [add](#) to the **Phone number to dial for current location** list from the **Available EarthLink**

phone numbers list then click . You can [remove](#) numbers from the **Phone numbers to dial for current location** list by selecting the number you want to remove and clicking

Dials a toll-free number to connect to EarthLink, logs you in, downloads an updated phone number list, loads these numbers into the **Available EarthLink phone numbers** list and logs you out.

Select the desired phone number(s) from the **Available EarthLink phone numbers list** then click

Add

Select the phone number(s) you want to remove from the **Phone numbers to dial for current location** then click

Remove

Select a phone number in the **Phone numbers to dial for current location** list then click this button to move it up in the list.

Select a phone number in the **Phone numbers to dial for current location** list then click this button to move it down in the list.

Displays a list of message received from the dialer during the connection phase.

This is useful if you are having connection problems and want a list of error messages reported by the dialer. The information shows the date, time, description of message, and phone number dialed.

Check to disable the Event Log – prevent it from capturing connection attempts.

Clears the Event Log.

Shows the name of the account you are using to connect to EarthLink.

Type your EarthLink username. Remember, your username should be preceded by **ELN/**.

Type your EarthLink password. Remember, passwords are case sensitive. If you don't want to type your password each time you connect, check **Save Password**.

Check this box to save your password so you don't have to type it each time you connect. If other people use your computer to access the Internet, you may want to leave this box empty.

You must establish a successful connection before the password will be saved. The password will only be saved for this connection icon and this user name.

Displays the phone number your computer is calling to access the EarthLink Network.

This is the number you entered when you set up your account. To change the number **temporarily**, type a different access number here. To change the number **permanently**, click  and select a different number.

If you want to use a calling card, or if you have changed your dialing location, click  .

Identifies where you are calling from, such as Default Location, Home, Office, Mom's, Jacksonville Hotel One. All of the settings on this screen relate to the location shown here. You can have more than one location so you can set the phone numbers and

dialing properties for each. You can select a different location by clicking the  and highlighting the desired location.

To define a new location, click

Opens the screen where you specify how the call will be dialed.

This is useful if you want to charge the call to a calling card, use your computer from different locations, or add a dial-prefix, country code, or area code to the access number automatically.

Dials the specified access number to connect to EarthLink.

Adjust connection settings related to the selected account.

This is useful if you want to change the access numbers used in connecting, adjust auto-dial and redialing options, and view your event log.

When this option is checked you try to view something on the Internet but have not yet established a connection, a prompt asks if you would like to connect. You can then click  to connect to the Internet using the selected Dial-Up Networking connection.

Lists the Dial-Up Networking connections that you have set up. This option is only available when the **Connect to the Internet**

as needed box is checked to connect to the Internet by clicking

and selecting the desired connection.

When checked, the dialer displays selected account information before dialing.
When not checked, the dialer automatically dials.

When checked, the default browser will load after the dialer finishes establishing a connection.
When not checked, you must manually start your browser to browse the Internet.

When checked the dialer will make several attempts to establish a connection if the line is busy, doesn't answer or if the connection attempt is disrupted.

Specifies how many redial attempts will be made.

Specifies the interval, in minutes, between each redial attempt.

Specifies the interval, in seconds, between each redial attempt.

Opens the Windows Make New Connection dialog so you can create a new Dial-Up Networking connection.

Shows the access phone number and modem selected for the selected Dial-Up Networking connection so you may change them.

Plays a .wav (sound file) when you connect or disconnect from EarthLink Sprint.,

Displays the Control Panel Modems screen so you can verify you modem properties and run modem diagnostics.

When checked, displays the connection monitor.

Click this button to display the Control Panel Properties for the selected connection.

#Automatically updates your access phone number every X days.

#The number of days between automatic updates of your available phone number list.

#Automatically updates your access phone numbers as needed (defined by EarthLink Network).

#Do not update my available phone numbers list automatically. I prefer to manually update my list.

#Update my available access phone number list immediately.

Dialer Error Messages

Too many errors occurred because of poor phone line quality [RAS 115]

Try another phone outlet. If you still have this problem, you may need to contact the phone company so they can check your phone line.

Cannot negotiate a compatible set of network protocols

This error message is one of the few errors that Windows reports that can be the result of many different problems. Some of the most common problems that cause this error message are related to your modem and the installed network components on your

system. Click here to  [start the EarthLink Support Wizard](#) to OR...

Try to connect again.

Reboot your computer. This sometime clears any internal conflicts, enabling you to connect.

Verify that the modem is installed correctly. {button How to Verify Modem Installation,JI('win95.hlp','IDH_WIN95_VER_MODEM_INST')}

Try connecting again to EarthLink. If you still get the same error you need to check your installed network components. These should include: Client for Microsoft Networks, Dial-Up Adapter, and TCP/IP -> Dial-up Adapter. {button How to Verify Protocol Installation,JI('win95.hlp','IDH_WIN95_VER_PROTO_INST')}

If you have other components installed, they might be causing your connection problems. If you are part of a LAN check with your Network Administrator before removing any components. If you have another ISP, the components might be needed for their software.

If you see only those listed components, one or more may be corrupt, therefore you might need to reinstall the components. You need your Windows 95 installation software to remove and reinstall these components. {button How to Re-install Networking Components,JI('win95.HLP','IDH_WIN95_REINST_NETWORK_COMP')}

Try to connect again. If you still can't connect, call Technical Support at (800) 395-8410.

The server does not have a DNS entry. Check the server name in the Location (URL) and try again

This error is most commonly caused when your Internet connection has been lost. It is possible that your connection has been lost even if your modem appears to be connected. To check for a live connection:

- Try to access our web page: <http://www.earthlink.net> OR
- Send a test email message to yourself.

If you were able to successfully connect, the site you were trying to access may be busy. The Internet is made up of many servers hooked up together. Sometimes the connection between you and the server you are trying to connect to is temporarily broken or excessive traffic prevents you from accessing the site. Try the site again at a later time. If you are still unsuccessful, the URL may be invalid.

If neither check works:

1. Log on to EarthLink by executing the Dialer program (from your EarthLink folder or desktop).
2. Once connected, start your Internet software.

If you cannot reconnect, shut down your computer (and your external modem, if you have one), wait a few seconds and reboot. Then try to log on again.

If are having problems connecting click here to [start the EarthLink Support Wizard](#) to OR...

Verify that your Network control panel settings are correct by verifying that the following network components are installed:
: Client for Microsoft Networks, Dial-Up Adapter, and TCP/IP -> Dial-up Adapter. {button Verifying Protocol Installation,JI('win95.hlp','IDH_WIN95_VER_PROTO_INST')}

Verify your TCP/IP Settings. {button Verifying TCP/IP Settings ,JI('win95.HLP','IDH_WIN95_VER_TCPIP_SETTINGS')}

Try to connect again. If you still can't connect, call Technical Support at (800) 395-8410.

All rights reserved.

You have been disconnected by the computer you dialed. Double-click the connection to try again.

If you were recently connected to EarthLink with no problem, try connecting again. Sometimes a reboot of the computer may be needed before you can reconnect.

You may wish to add another local number to your dialing list. {button How to Select Another Access Phone Number,JI('win95.hlp','IDH_ELN_SEL_ALT_PH_NO')}

Note: Before using your EarthLink access number, check with your local phone company to ensure that the number you select is a local toll free call for you, it is **your responsibility**. EarthLink makes every attempt to provide local toll free access numbers in most US cities. However, EarthLink assumes no responsibility for phone company toll charges incurred by EarthLink subscribers.

If the problem persists, this error has been known to occur when Dial-Up Networking becomes corrupt. This is usually the case when you try to logon to the pop and never reach the authentication phase (where we verify your username and password) of the logon process.

Try uninstalling and reinstalling Dial-Up Networking. You will need your Windows 95 installation software. {button How to Re-install Dial-up Networking Components,JI('win95.HLP','IDH_WIN95_REINST_DNS')}

Try to connect again. If you still can't connect, call Technical Support at (800) 395-8410.

Copyright © 1994-9 EarthLink Network, Inc.

All rights reserved.

The computer you are dialing cannot establish a Dial-Up Networking connection. Please check your password and try again.

This error usually is the result of incorrect information in your **username** or **password** fields for your connection.

Verify that the username field has an **ELN/** before your username. (i.e. ELN/username)

In the password field, clear all the characters in it and carefully retype your password. Remember usernames and passwords are case-sensitive. Make sure the **Caps Lock** key is not on and that you are using the correct case.

Try to connect again. If you still can't connect, call Technical Support at (800) 395-8410.

TotalAccess has detected that your machine is missing some or all of the components needed to connect to the Internet.

This message appears when you are installing a new version of TotalAccess and you do not have Client for Microsoft Networks, Dial-up Adapter and TCP/IP -> Dial-up Adapter installed properly. TotalAccess will install these networking components for you once you click Yes. You must reboot your system in order for the changes to take effect.

Click here to [start the EarthLink Support Wizard](#) to OR...

Verify that your Network control panel settings are correct by verifying that the following network components are installed:
: Client for Microsoft Networks, Dial-Up Adapter, and TCP/IP -> Dial-up Adapter. {button Verifying Protocol Installation,JI('win95.hlp','IDH_WIN95_VER_PROTO_INST')}

Try uninstalling and reinstalling Dial-Up Networking. You will need your Windows 95 installation software. {button How to Re-install Dial-up Networking Components,JI('win95.HLP','IDH_WIN95_REINST_DNS')}

Domain Name Server (DNS)

A computer that converts Internet names, such as www.earthlink.net or news.earthlink.net to their corresponding IP numbers, such as 206.250.94.20 or 206.250.94.20.

Usenet

A world-wide system of discussion groups, with comments passed among hundreds of thousands of machines. Not all Usenet machines are on the Internet, maybe half. Usenet is completely decentralized, with over 10,000 discussion areas, called newsgroups.

Email

(Electronic mail) Messages, usually text, sent from one person to another across a computer network.

Username

Your username will uniquely define your identity at EarthLink. While your username can be anything you wish, it is most common to use a combination of your first and last names. For example, if your name is Bob Smith you may want to consider the username "bsmith" or "bobs". However, another EarthLink user may have already taken a common username so you may need to be creative in your choice. Your username can be up to 12 characters long. It can consist of any combination of lowercase letters and numbers, but must begin with a letter. A username CANNOT contain any uppercase, punctuation, or special characters.

Your Internet e-mail address will be your username followed by "**@earthlink.net**". Therefore your full Internet e-mail address might be "**bsmith@earthlink.net**".

To connect to EarthLink you must add **ELN/** (in uppercase) to your username. Therefore your username might be "**ELN/bsmith**".

Password

Your password must be between 6 and 8 characters long. It can consist of any combination of letters and numbers. However, your password cannot contain any punctuation or special characters. For security reasons, avoid using your username or the word “**password**” as your password. Passwords are case sensitive, therefore if you choose to use uppercase characters, be sure to make a note.

Frequently Asked Questions

A. How can I change my dialup number?

Use the [Phone Numbers tab](#) on the EarthLink Dialer Configure screens to change your dialup number.

B. How can I check to see if there are any new EarthLink access numbers?

Use the [Update Phone Numbers tab](#) on the EarthLink Dialer Configure screens to find new access numbers, or go to: <http://help.earthlink.net/access.html>

C. Can I give the software to a friend?

You may loan your TotalAccess software to anyone. Your friend can use the software to create a new account.

D. How can I get a free month of access by referring a friend to EarthLink?

During the TotalAccess installation, the Referral screen prompts for the username of the EarthLink user who made the referral. Have your friend type in your username. You will be credited one free month each time another friend signs up with EarthLink.

E. How can I update my version of TotalAccess?

TotalAccess updates can be obtained from our World Wide Web page:

http://www.earthlink.net/assistance/ta_update.html

F. How can I change my username or password?

You may update your username and password at any time, without any charge. Use either the TotalAccess **Update Account** option, or the online form at: <http://help.earthlink.net/billing>

You will know your request has been completed when you are no longer able to log in with your old account information.

G. How can I change my billing information?

Use either the TotalAccess **Update Account** or the online form at: http://www.earthlink.net/assistance/payment_options.html

Please allow 24 hours for your request to be processed.

H. How can I contact EarthLink?

See the information listed on the following page: **EarthLink Network Support** or online at <http://help.earthlink.net/contact>

I. What are EarthLink's hours of operation?

EarthLink Sprint technical support is open 24 hours a day, 7 days a week including all holidays.

EarthLink Network, Inc. business hours are 9am to 6pm, Pacific Time.

Copyright © 1994-9 EarthLink Network, Inc.

How To...

Change Account Information

At some point during your use of EarthLink it may become necessary for you to update some aspect of your account. This option is for users who already have an EarthLink account and need to update information regarding their account (credit card, billing information, password, etc.) EarthLink allows you to update your account information at any time, 24 hours a day, 365 days a year.

Change Password

Changing your password regularly is a good security precaution. A password should always be something that is hard to figure out but easy to remember.

Change Username

Your username is your Internet identity and part of your email address. It should be changed only if absolutely necessary.

Manually Add Phone Number

It might be necessary to add an EarthLink access number to the Dialer that is not on the list. Here you will find the steps to help you add this number.

Remove TotalAccess 2.0

Removing TotalAccess from a computer system is as easy as installing it. The remove TotalAccess walk through has three steps to follow for deleting TotalAccess from your system.

Copyright © 1994-1999 EarthLink Network, Inc.

All rights reserved.

How To Change Account Information

You can use the TotalAccess 2.0 software Update Account option (credit card number, expiration date.)

to change your account information. (i.e. address,

Or you can change the account information online, use the form at:
<http://help.earthlink.net/billing>

Please allow 24 hours for your request to be processed.

**Copyright © 1994-1999 EarthLink Network, Inc.
All rights reserved.**

How To Change Password

You may change your password at any time. You can use the TotalAccess software Update Account option to change your password or you can change the password online, use the form at: <http://help.earthlink.net/billing> This form will reset both your password for logging in to EarthLink and for e-mail.

Helpful Tips:

- Never give your password to anyone, with one exception. EarthLink Technical/Customer Support may ask for it when you call EarthLink Network for support.
- Make your Password hard to guess but easy to remember.
- Your Password must be between 6 and 8 characters, the first of which must be a letter. You can use uppercase characters but remember – passwords are case sensitive. If you forget that you've included uppercase characters, you may not be able to log in. Therefore, we recommend all lowercase characters.
- Password changes normally take 5 minutes but, on rare occasions, may take longer.
- Once your new Password takes effect, your old one will be completely useless.

Before changing your password, consider the following changes that you will also have to make:

- Change your password as saved in your dialup networking software configuration.
- Change your password as saved in your email software configuration.
- Change your password as saved in any other software configuration, such as 'chat' packages, Internet phone packages, etc.

Complete and submit the Update Account form. Once you receive notification that your form has been received by the server you can disconnect. Wait approximately 3 to 5 minutes for the change to take effect then make the password changes described above.

Copyright © 1994-1999 EarthLink Network, Inc.

All rights reserved.

How To Change Username

Your username is your Internet identity and it is also your email address. You may change your username at any time using the

TotalAccess software Update Account option

Before changing your username, consider the following changes that you will also have to make:

- Before making the change you need to send messages to all automatic mailing lists to delete your old username from their list. Most mailing lists will not process this request unless the request comes from the e-mail address that is to be deleted..
- Change your username as configured in your dialup networking software.
- Change your username as configured in your web browser software.
- Change your username as configured in your email software.
- Change your 'Reply-to' username as configured in your email and web browsing software.
- Change your username as configured in your news group software.
- Change your username as configured in any other software you use such as 'chat' packages, Internet phone packages, etc.
- If you use PGP you will need to generate a new public/private key-pair since your current key is tagged with your old email address.

Complete and submit the Update Account form. Once you receive notification that your form has been received by the server you can disconnect. Wait approximately 3 to 5 minutes for the change to take effect then make the username changes described above.

How to manually add a new phone number to the access phone numbers list

EarthLink provides many phone numbers in the phone numbers tab, but at some point it might be necessary to add a number manually to this list. Use the following procedure to manually edit the phones.txt file.

A [Open the Phones.txt file for editing.](#)

1 How To:

B [Edit the Phones.txt file with the new number.](#)

1 How To:

C [Select the new number.](#)

1 How To:

Opening Phones.txt

To open Phones.txt:

1. Double-click the **My Computer** icon.
 2. Double-click the **C:** drive.
 3. Double-click the **Program Files** directory.
 4. Double-click the **EarthLink** directory.
 5. Double-click the **Phones.txt** file.
- This will start your notepad program so you can [edit the file](#) .

Editing Phones.txt

To edit Phones.txt:

1. Scroll down through the file until you find your state, then select it.
2. The city entries are in alphabetical order. Find the city that is alphabetically after the one you are going to enter.
3. Place the cursor at the beginning of the line for that city and press **Enter**. This creates a new blank line.
4. The Phones.txt file follows a specific format.
1|CA|Pasadena|626|639|0630|V.34|Active|ELN| A [pipe](#) follows each entry in a line.
5. The Phones.txt follows this type of format:
1|CA|Pasadena|626|639|0630|V.34|Active|ELN|
These entries are in the order you need to enter them: **1|state|city|Area Code|Prefix|Extension|Type or Dial Up** (i.e. V.34, ISDN, X2, K56)|**ELN**
6. Complete your entry.
7. Click **File/Save** then **File/Exit**.

Pipe

The pipe key (i.e. |) is the one above the backslash key on your keyboard between the plus/equals and the backspace key. Hold down the **Shift** key and hit the **backslash** key to create a pipe.

Selecting the New Number

1. Start the **EarthLink Dialer** and click the **Configure** button.
2. From the **Available EarthLink phone numbers** section find the newly added number.
3. Click the **Right Arrow** button in the middle of the window to add it to your **Phone Numbers to dial** section.
4. Click the **Up arrow** until the newly added number is on the top of the calling order of the to dial phone numbers.
5. Click the **OK** button.
6. Click the **Connect** button to connect to EarthLink.
