## Sheet1

### NOTES,C,254

Players no longer receive extra resources when canceling building construction multiple times, exploiting lag in a multi-player

Changes include: Ack bursts no longer grow as they dissipate. The smoke and explosion effects in 3D mode have been improved

Changes include: Increased fortification costs that decrease every year. Prevention of river boats from moving past forts. Increased

All known crashes have been fixed. Units will now deploy on geysers when ordered to. Joystick configuration is now saved correctly

Patch fixes Unsupported RGB Mode error. Random crashes associated with setting music volume to zero, Rune (gem) puzzle

Final patch to add support for Voodoo Graphics and Voodoo Rush 3D accelerators.

Add support for NEC's PowerVR 3D accelerator.

Fixes bug that sometimes ends the campaign of a leader reported as wounded or kept alive a leader reported as captured or

Improved overland and combat artificial intelligence. Game speed can be altered on the Option Panel. Many other changes.

Designating targets for the gunner now functions properly. Neither friendly nor enemy vehicles will fire on targets through forests

All of the known Add-Card Assertion Errors in Shandalar have been fixed. Alchor's Tomb now has the correct card text. Lich r

Fixes cheat that allowed one player in a multi-player game to see the map. Fixes bug that allowed players to receive extra resources

This patch is only intended for users experiencing difficulty installing the game on Cyrix 6x86-based PCs.

This patch file is only for users experiencing difficulty with Starship Titanic on certain video cards like the Intergraph Intense 3

Fixes problems with and adds features for 3Dfx-based accelerators. Also improves Internet gameplay.

This patch corrects certain problems with 3Dfx Voodoo- and Voodoo 2-based graphics accelerators.

Modification to Cluster code to prevent Cluster Bomb abuse. Works for all Cluster weapons (Cluster Bomb, Banana Bomb, M

Allows you to reverse those infamous backwards rudders and addresses joystick centering issues. Pressing Enter or ESC wh

Faster framerates, more weapons in network games, network messaging and optimization, better joystick control, detachable

New team rosters and various fixes.

Corrects a nasty crash bug in the Hammer & Anvil scenarios.

No crashes during game saves, airplanes don't dive into the ground as much, computer pilots bail out of dead-engine airplanes

Fixes a bug in version 1.13 that incorrectly introduced the Spitfire IX in 1939.

Fixes mission structure in certain scenarios.

Fixes many small problems and addresses the Win95 city construction problem.

Allows the use of IRQ 10. Separate patches for MIDI and Digital Sound (\digi10.exe).

Includes various fixes and enhancements.

This is the original \modemdb.txt file that came with ATF, modified to fix the commands for Sportster modems.

Adds better compatibility with 8-bit sound cards when Afterlife is played directly through Windows 95.

Bodyguard units are now disbanded between turns if they no longer have leaders assigned to them. Players of the English ve

Has improved AI and campaign game.

Fixes range indicator, adds some new menu functions, and makes a few rules changes.

Fixes Help button in Ship Editor as well as a bug that resulted in bow/stern chasers being reloaded "endlessly" when all available

Improves the movie play and fixes some general sound problems.

Adds printouts, the ability to import from spreadsheets/databases, a map "fill" feature, and new symbol editing tools.

Fixes bugs causing garbled CPIDs in certain situations and in-flight disconnects. Adds more visible planes, so that in offline p

Update corrects the Cleash General "Null Jig Token" Crash, as well as adding command line switches for many sound boards

Addresses various crashes and bugs.

All Win95 display resolutions are now supported, auto-scroll has been added, and some E-mail bugs fixed.

Fixes E-mail bugs and makes it more stable.

Speeds up play for users with 8MB RAM, as well as adding a new history function and improving gameplay overall. A new ma

This update fixes a lot of the slowness problems with the game in 8 meg, adds a new history function, and improves overall g

Fixes almost all of the speed problems with the game on 8MB machines and in Windows 3.1, as well as improving AI.

This update fixes a problem with the Sony CDU-33A CD-ROM Player addressing Disk 2 of Angel Devoid.

General maintenance patch.

Addresses the problems with the preferences screen and "invincible" mode (no modem fixes in this patch).

ATi Rage Pro frame rate slowdown during rain has been fixed. ATi Rage Pro TADS/EO/night vision noise problems have fixed

## Sheet1

Stabilizes modem play.

Adds support for Voodoo Graphics- and Voodoo Rush-based cards. Requires version 1.120 (ADUPDATE.ZIP).

Allows you to use CD-ROMs with drive letters higher than H.

Threat mode targeting has been improved. Adds keys for systems that can't use Print Screen or Scroll Lock. 'Alt-A' for Air Support.

This optional patch beefs up the digital music.

Baldur's Gate now checks the cache size and gives a warning if the user is running out of hard disk space. Also checks hard disk space.

Corrects the 1954 schedule (the Baltimore and Boston schedules were reversed).

The list of fixes for this bug-ridden game is about 3,000 words long (that's about five PCG pages to you and me), so I'm not going to list them all.

At this point, does anyone still care?

Fixes the tractor beam lock problem and one or two minor bugs. Now aren't you sorry you bought from a store without a software manual?

Fixes PBEM replay crashes, melee bug related to automatic victory vs. routed units, and adds missing woods artwork 3D map data.

Internet play has been added, and a number of play changes have been made.

General maintenance patch.

Internet play has been added, and a number of play changes have been made.

Includes Play-by-E-mail, hot-seat (for two players on the same PC), fog-of-war, and any gameplay changes made with the expansion packs.

This update is only for the original Ardennes game, not Bulge or the Ardennes Expansion CD.

Some further rules changes and bug fixes.

Various fixes and enhancements.

More stability and gameplay issues have been addressed.

Fixes PBEM replay crashes, melee bug related to automatic victory vs. routed units, map data for path on south edge of the Veldt.

Some enhancements, including new optional rules.

Added network play, "Next Stack" hot key, Extreme Fog-of-War Option Rule, red-highlighting of strength value if units not at full strength.

Fixes "bases-off" highlighting bug, AI reporting bug when artillery is limbered, melee bug that resulted in double losses for the defender.

Re-crewed artillery batteries get a morale value of F, reinforcements arriving in objective hex cause change of ownership, extra units.

Rule changes.

Fixes various bugs and play balance issues, as well as unit performer and behavior.

Internet play has been added, and a number of play changes have been made.

Rule changes.

Fixes the PBEM reply problem and problems with leaders not being fully replaced (this could cause random crashes when playing).

Corrects numerous bugs, including incorrect resolution of melee attacks, skirmisher losses, various combat modifiers, and other.

Fixes various bugs and play balance issues, as well as unit performer and behavior.

Further refinements to the game system.

Fixes palette corruption in leader faces, melee effects when video option is turned on, and PBEM replay crashes.

Fixes bugs that sometimes awarded points for recapturing one's own uncrewed artillery, that allow skirmishes in a hex with another.

Adds Internet play.

Main roads are now called pikes, horse artillery may unlimber in the movement phase, non-skirmishers do not suffer disorder.

Now detects available memory based on physical RAM & swap file space. Fixes "Error: Could not initialize VESA 15 bit 640x480 mode."

The Red Odyssey v. 1.2 (McMillian Publishing): Chinese Armory now deploys repairs and weapons properly. Chinese Rocket Artillery.

The Windows CD audio volume is no longer maxed on game exit. The screen no longer goes black on a 3Dfx card while a mission is running.

This patch fixes cheating in multi-player, reduces the number of different Battlezone versions out there, and fixes issues with the game.

Primarily for users who are having problems loading chapters.

Fixes music only, but not the digital sound effects.

Mistakes in some spells have been fixed. The death of a regent no longer ends the game. Various multi-player features (sync play).

Fixes several minor bugs. Adds code support for the Deluxe Tools. Now supports only DirectX 5.0. There is also a Windows 95 version.

Adds modem play and fixes some known quirks in the game.

Climbing slopes greater than 60 degrees is not allowed. Fixed bug where wrong team was given credit in the text message when a unit is killed.

Fixes problems with Brigand on Level 3 and improves modem play. Previously saved games will be lost.

Adds animated crowds and support for the Virtual Open, as well as correcting the rendering bug in the view cone, ball physics.

This patch fixes a large number of minor bugs and adds a few user-requested features.

## Sheet1

Fixes small bugs and makes numerous changes to the weapons database.

Fixes numerous small errors and adds new weapons to the database.

Includes new 16-bit Windows executable, fixes the exploding wall problem in Chateau Galliard and the Alien Hallway lockup.

Elapsed Time (ET) no longer includes Reaction Time (RT). Your ET is calculated from the moment your front tires unbreak the

For 1967-68, 1964-65, and 1954-55 team disks there are separate patches to correct stats and other data.

Fixes crash that occurred when using the zoom feature.

There is now a warning when the building sprite limit is reached. The governor's name will no longer be reset to 'The New Go

Corrects the tattoo parlor animation "sparkle" and the "dead-end" when talking to the Gypsy in Transylvania, and adds specif

Fixes the factory layout plan as well as problems with presidents.

Early patch for 3Dfx cards.

Adds 3Dfx support.

Improved AI. Increased frame rate. Game controller null-zone. Pit lane auto-pilot. Gamma control for object brightness. Rain t

Corrects problems with gaining more than \$40,000 in chips, corrects the "Dealer's calls" in Craps, as well as problems with Vic

Fixes all known video card conflicts with Rendition-based 3D cards.

Fixes some video card problems.

Corrects a number of problems.

Patch that adds full modem support.

Adds better mouse control.

Improvements to Chessmaster Live and some other changes.

The AI now always follows the line of sight rule. Version 1.03 introduced a bug wherein the AI enjoyed the advantage of full vi

Corrects some scenarios' errors and crashes. There is also a Windows 3.1 version of the patch on The CD -- \CWG23111.ZIP

This patch installs the latest files needed for connecting to WON.net (formerly SIGS). It also fixes all known connection, stabil

Addresses both the Campaign and Battle AI as well as updating naval battles, city supply, and route planning.

Fixes crashes regarding naval units.

Computer controlled switching between AI Personalities (AIP) no longer causes random crashes. The game no longer crashe

The Game Profile now appears at the beginning of a multi-player game, just as a reminder. During the game, the Game Profil

In general, the scenarios were balanced for better gameplay. New icons were added to some of the scenarios, primarily to the

This update will fix the problems encountered by people with no sound cards.

Countless changes in this one, including protection-fault fixes and patches to the AI, which was damaged in v. 1.04. Here are

Fixes behavior of smart settlers, allows better contact with other leaders no matter what their current attitude is, takes "ignore

Solves various auto settler problems, crash with SS MODULE HELP, Cruise Missile attack values, and various other glitches.

Heralds will now animate if you are using 32-bit video for Windows.

This upgrade is mostly to make hot-seat play more secretive, but it also addresses some multi-player tech issues.

Fixes the "Cannot write to AUX" error that some people have encountered.

You can no longer deduce enemy placements during deployment mode by watching for the targeting cursor while dragging a

German infantry will no longer use their Panzerfaust anti-tank weapons against Allied infantry.

Multi-player connection stability is greatly improved. Several crashes that occurred in multi-player games are fixed. An issue t

Fixes some Win95 support and corrects general Windows bugs as well.

Corrects various problems and adds the map editor left out of the last patch.

This primarily addresses modem compatibility issues.

Includes a SPEEDLOCK option for fast 486 computers and Pentium computers.

Provides greater compatibility across Local Area Networks and modem connections. Players can no longer ally with the comp

Fixes various crash bugs.

Fixes all known bugs and makes some game balance changes.

Fixes the "Infinite Minigunner" bug (in which you can sell structures and retain the troops). Also contains a shortcut for Window

Fixes various gameplay bugs and lockups.

General maintenance patch.

Fixes various problems.

For problems with low sound output.

Fixes various problems and contains the Windows Scenario Editor.

Fixes more general protection faults.

Fixes General Protection Fault problems and adds the Windows Scenario Editor.

This version fixes all known program problems, such as General Protection Faults, and adds several user-requested enhancements.

Fixes all known protection fault errors and includes the latest Windows Scenario Editor.

General maintenance, only for PG-13 version with all the naughty words beeped.

New driver for the VFX1 virtual reality headset.

The patch fixes some joystick and gamepad issues. If you do not have a problem with your joystick or gamepad, you do not need this patch.

Random Map Generator has been added. All single scenario maps may now be loaded in the editor. Sound and Video support has been added.

Evens out some glitches in combat wherein the computer didn't have to fight enemies the human player had to fight. The CD-ROM version of the game has been updated.

Fixes haunted mine bug, cleans up the music, and addresses some TCP/IP problems. There is also a Windows 95 version of the game.

Seer's Hut allows you to choose between troops if your party is full. Necromancer Skill updated to give the player 2/3 of skeleton's strength.

Improves compatibility with some sound cards and memory configurations, and also resolves a dialing problem with some modems.

Should fix some problems with modem connects and some random crashes.

For problems when running a modem or network game between the DOS version and the Win95 version of the game.

Fixes some deathmatch crashes and save-game bugs,; modifies some weapons and damage issues.

Necromancer's Bone Shards (powered up) now do more damage. The Assassin's ability to Hide in Shadows doesn't last as long as before.

Should address any crashes associated with sound cards. (Separate patches for floppy and CD-ROM)

Various gameplay fixes.

Update makes the game a bit easier to play.

Fixes traverse bugs, enemy bomb detonation, hand pickup, and some other bugs, as well as adding some new features such as the ability to use a hand pickup.

Post-mission crashing eliminated. Cloud 'bleeding' fixed. Joystick calibrator fault fixed. CH Products' Win95 coolie-hat bug eliminated.

Concentrates on increased frame rates and decreased hard drive access pauses. Also: a more-realistic Radar Cross Section. The game is now available on CD-ROM.

Allows users to play the Persian Gulf Theater, displays clouds at correct heights, improved waypoint drag-and-drop and mission planning.

Enhancements and revisions to mission planning, along with AI and flight model improvements.

Dossiers will no longer freeze up if your default name is longer than 15 characters, even if our default Windows 95 name is longer than 15 characters.

Memory leak, crashes, and some interface issues fixed. AI tightened and much needed unit summaries added.

In the rank of Commander, the traders leaving the Zeuson planet (if it was under blockade) did not have the correct text appear on the screen.

Lobby technology is now supported (making it Mplayer-ready). Works with PCs that have partitioned hard drives and/or multiple hard drives.

Fixes digital sound and speech on the CD version.

This should help people having problems with installation.

For Rendition Verite 1000 and newer.

Corrects a bug where a stripe down the center of the car may not be painted. This problem only occurs in version 1.0 of Paint and is fixed in version 1.1.

Host now has the ability to eject cheaters from multi-player games. Also, minor internal optimization changes have been made to improve performance.

Corrects host getting double-kill scores in multi-play and other multi-play glitches, as well as some 320x200 graphics mode crashes.

Currently supports: Diamond Monster 3D, Orchid Righteous 3D, Deltron RealVision Flash, Hercules Stingray 128 3D, Creative Labs 3D.

Provides new sound drivers and adds six new scenarios.

Fixes some Windows NT problems, adds elevation info to the status bar in the course editor, increases net play speed, and fixes some net play problems.

Net games will no longer be able to get out of sync because of blocked messages (e.g. taking a drop with a menu item displayed).

Gives you new options for dealing with turn limits: keep them on, increase them, give yourself extra exploring time after a mission.

Fixes "No Turn Limit" problems, some single player campaign bugs, the final campaign mission, and other problems. A patch for the final mission of the game is included.

Fixes many minor problems, including some "No Turn Limit" problems, rare speech crashes, and a fix for the final mission of the game.

General maintenance patch.

On some machines, the radar line of sight code could cause a crash when unexpected terrain height data was loaded. This has been fixed.

Patch includes Internet server kicking/banning, Clan support, bad language filter and JCS level passwording for added level security.

Added a Progress Meter for the Downloading screen. Fixed seeing two characters when finishing a level. If server has the flag, the game will end.

Fixes a bug that occurs at the Race Winners' Circle after a race. At the Race Winners' Circle screen, if the trophy presenter dies, the game will end.

Includes better throttle, rudder, and joystick calibration, support for sound in Windows 95, sound board autodetect, programmable buttons, and a new sound driver.

The Maphack program that was inadvertently left out of MC Plus.

## Sheet1

Cards from "Spells of the Ancients" are now available in towns in Shandalar. Black Vise and The Rack no longer do double damage.  
About 20 changes to card rules and values.

Improves AI, fixes lockups, corrects card-specific errors, and tweaks gameplay.

The AI now considers even more possibilities in a shorter time. This allows it to find better card combinations and generally improve its play.

Dozens of AI and card-specific changes have been made for this version. The computer also now plays faster, the win/loss ratio is better.

Various bug fixes.

Is another extensive overhaul and bug-fixer.

New custom race features, changes to ship refitting, and rules changes related to player movement, weapons characteristics, and ship combat.

Tactical combat ship initiative is now an option on the Game/Settings screen. When this option is enabled, ships in combat will be more aggressive.

Early patches for 3D card support. (MDKD3D.ZIP)

Beta patch for Direct 3D, 3Dfx (MDK3DFX.ZIP), Voodoo and Rendition.

Joystick Drivers Update provides non-interrupt-based drivers that clear up many joystick problems.

Fixes a long list of problems, including texture corruption, unclear objectives, screen flicker, and other stuff. For the Battlepack version, see the Battlepack patch.

Various bug fixes.

These don't fix all problems, but take care of drifting in many cases, as well as letting users have a joystick enabled and still play.

Various bug fixes.

Currently supports: Diamond Monster 3D, Orchid Righteous 3D, Deltron RealVision Flash, Hercules Stingray 128 3D, Creative Labs 3D.

Addresses such issues as the right side taking more damage than the other on some mechs, added joystick support, and Win95 compatibility.

Fixes VFX1 headset support.

Allows players to use Direct3D enhancements. Also includes many gameplay changes, such as changes to Salvage, continuous play, and more.

Resolves lockups with the Packard Bell version of Megarace and the Packard Bell sound cards.

It is no longer necessary to run the Cyrix helper programs (686\_p.exe or cpuiden.exe) for Might and Magic VI to run on Cyrix processors.

This tweaks difficulty levels, making the harder missions more difficult and reducing the difficulty of the first 'Elite' Mission. It also adds new missions.

Fixes lockup problems caused by some videos; newest version of FAQ file also included.

Fixes lockup problems caused by some videos. Also includes newest version of FAD file.

This is for anyone having problems retrieving GGORO.GRA upon having downloaded the MKFIX patch.

For speed-related problems (extremely slow or fast gameplaying) during the flight sequences.

Should speed up the game if you have a 3D card with at least 4MB RAM.

Provides increased stability during pre-game chat and when players enter or leave games. If you play multi-player Myth II (especially on LAN), this patch is essential.

This patch fixes the large but obscure bug in the uninstaller program with the shipping version of Myth II, which would wipe your hard drive.

Myth II now runs on machines with fixed-resolution monitors. "Tab" key can now only be assigned a single function. Fixed problems with the "Tab" key.

Fixes the Fetch chain lightning bug. Make sure you are playing with players who are using 1.2 or else the game will go out of sync.

There is a new check box in the preferences to make the second mouse button deselect units like it used to in v1.0. The word "Deselect" is now in the preferences.

Corrected leader facing problem caused by version 1.02.

Corrects the problem with the car jerking to one side, and other bugs.

Only necessary if you're having problems with modem play.

Allows PAS 16 users to have sound.

Fixes CD-ROM SEEK error.

Fixes a CD recognition problem with certain CD-ROM drives. You only need this patch if you are playing under DOS and the CD-ROM drive is not recognized.

This is mainly for anybody who needs pulse dialing during modem games or has problems with a non-standard IRQ port (like IRQ 5).

Updates NFL Gameday '99 to the latest version. Just unzip the contents to your Gameday directory (default C:/Program Files/NFL Gameday).

In-play fatigue for ball carriers tied to their end rating, fixes play-clock problems, updates rosters, and makes injuries and fumbles more realistic.

Specifically for playoff lockups or problems with playoff games saving to the hard drive.

Separate patches are available for DOS and Win 95.

Corrects the error message "speech driver not found" and allows Sound Blaster to use IRQ 5.

Replaces a BGL file, adding navigation aids and generally upgrading the program.

Addresses the problems with some Super VGA cards.

## Sheet1

For video incompatibility problems.

Includes support for 3Dfx-based 3D accelerator cards, improved networking performance, bug fixes, and a few new features.

Updates Outlaws and includes nine new levels.

Adds three scenarios and fixes some mission structure and stability problems. (Pack #2 \OP2UPDT2.ZIP)

Bomber defensive fire has been reduced in effectiveness. A new menu option, "Easier Computer Player," reduces effectiveness.

Similar to Achtung Spitfire!: no crashes during game saves, airplanes don't dive into the ground as much, computer pilots bail out.

Weather effects have been refined. Bicycle and ski unit icons are now displayed only if local conditions are appropriate. Airbornes.

Updates to the latest version. Note: First, locate and delete the OPART 2.ICD and OPART 2 300.ICD files from your \TOAW2\CDROM.

Contains a new version of the file 1942CD.COM, which will correct problems on copies of the game with a volume label of PAW2.

After losing the 4th scenario in the American campaign, the victory ending has been fixed to go to the loss screen. During the American.

Fixes several problems that were found in version 1.14.

Adds new morale factors, "shoot and scoot" options, and much more.

Corrects a few small problems and adds eight-way facing.

Fixes the involuntary dismount bug.

Fixes a few small bugs and database errors.

Fixes about 60 minor errors and implements several user-requested changes.

Fixes small bugs and makes numerous changes to the weapons database.

Fixes many small errors and adds a few weapons.

Tons of fixes and improvements, including formation pathfinding; autopilot driving; brake; lack of machine gun tracers; lots more.

Club SSI fixes, as well as corrected value and replay turn button.

Fixed bug where horizontal formation order wasn't working. Fixed bug where telling a fighter base to stop auto-attacking wasn't working.

General maintenance patch.

General maintenance patch.

Fixes a sorting problem with an average league team stats, average league not being able to play all of the games, fixes the 'average league'.

Updates scenarios, including a resign feature as well as other small fixes. If you destroy an enemy and take all the towns, you win.

Eliminates "error 47, not an object" bug when clicking on the door to the computer room in Chapter 5, as well as the possible "error 47, not an object" bug.

Fixes crashes in Episode Five.

Fixes incompatibility between DirectX and some sound cards and shortens the time before hints are offered. Read the included README.

Adds the ability to restore saved games while in the lab and other minor changes.

This features faster gameplay, compatibility with all sound cards, full voice, improved sound effects, and so on.

Corrects the video lockup problem.

This patch provides network play for Power Poker for Windows.

Added the ability to perform GameGauge speed-profiling tests, via a command-line option. Support for higher resolution modes.

Adds new aircraft: Cessna 172R. The new C172R replaces the C172 as the default "trainer" plane. Normal glides can now be performed.

Includes new front end graphics, new sounds, a pause function, and fixes many bugs and graphics card problems.

Allows anyone with the DOS version to play as a native Win95 program. IMPORTANT: The Microsoft DirectX 2.0 components are required.

Includes the latest version of UniVBE V5.2.

Includes new front-end graphics, new sounds, a pause function, and many bug fixes.

Fixed rare nudge bug. Fixed Time Drive scoring bug. Modified high score code. Many other changes included from previous patches.

A native version of Quake for Win 95 and NT.

Fixes bugs in multi-player.

This upgrade addresses several features, including security, playability, and enhancements. Also includes a new deathmatch mode.

Fixed a network problem where an oversize packet could cause a client crash. Fixed the long-standing Quake II bug where you couldn't see through portals.

Adds enhanced OpenGL 3D card features from GLQuake to the mission pack.

An OpenGL version of Quake that allows for new visual effects and drastically smoother graphics on 3Dfx-based 3D accelerators.

You can enter the Dragon Blood Pool multiple times. Larger import saves can be imported to the game. You can cut and burn.

Creates versions that work around European copy protection flaws, which were crashing with some Pioneer CD-ROM drives, and other.

Gunfire combat model chart deleted by patch (fixes shotgun problems). Shooting through portals should be corrected. Players can't see through portals.

## Sheet1

Intended to fix "Unexpected Interrupt" errors, joystick jumpiness, problems when running on dark monitors, running sound card. This patch turns the full version of Red Baron II into Red Baron 3D. Changes include: 3D hardware acceleration for a more realistic look. Addresses several known bugs (Only works for the 60MB install of the game.).

This update only affects the Direct3D version of Requiem: Avenging Angel. It enables dithering in the Direct3D version for greatly improved visual quality. Additionally, this update enables dithering in the Direct3D version of Requiem: Avenging Angel for greatly improved visual quality. Additionally, this update is an upgrade for original FS to FS95, with new voice files.

Fix for some intermittent crashes to Windows due to a bug in the mouth-movement code. Book options now will save to disk.

Fixes jumpy mouse movement, switch problems in the billiard room, and the "player\_enters\_scene" fatal error.

Removes the 100-room limitation that causes the "Fatal Error" and "player\_enters\_scene()" errors near the end of the game.

Should be used only by those instructed by Take 2 Interactive to do so. It is meant to diagnose problems related to blank screens.

Corrects the black-screen problem after the introduction and similar problems on Compaq and Hewlett Packard computers. A new driver for the VFX1 headset.

New driver for the VFX1 headset.

For problems with QuickTime movies and some interface errors (rotating dome, etc).

Corrects retreat rule problems, allows Confederate recruiting in Kentucky and Missouri even if under Union control, and corrects several other problems.

1) History recorder fixed for E-mail and saves, 2) army commanders' ratings now slowly revealed in hidden-rating games, 3) e-mail messages now saved.

Contains alternate scenarios of two types. The 'AltX' scenarios are intended to allow balancing of the various battles in favor of the Confederates.

Fixes various problems, including one in which unit commanders being promoted after he is killed.

This patch for Tom Clancy's Rainbow Six will properly update Rainbow Six versions 1.00, 1.01, and 1.02. This patch file does not update the game itself.

Enables voice transmission during gameplay. Extract the included files into your Windows\System directory.

This patch fixes a multi-player problem that was reported by some after installing the version 1.10 patch. Additionally, this patch fixes several other problems.

Fixes various lock-ups and sync bugs. Also adds higher mouse sensitivity, re-words 50 play messages, and speeds up start of game.

Adds "really easy mode" and cheats.

Fixes CD audio playback problems, adds joystick calibration profile, new sound effects and dungeon art. For DOS, there are also new sound effects.

New DLL to fix Sidewinder support.

"Error Decompressing Tile Set" messages fixed.

Eliminates a problem with decompressing tile sets on hard drives larger than 1.6GB.

General update and bug fix.

For "Read Failure on Drive D" errors.

Removed DirectPlay and implemented less problematic TCP/IP driver -- this means ShogoSrv should work on NT. Gamespy is still required for multi-player.

This multi-player Point Release will update Shogo Version 1.0 (retail version) and Shogo 1.1 (alpha patch) to Version 2.0. The update includes several new features.

Adds GL support, fixes team play, adds a "Bugwar" mode (play as bugs), and other delights.

The v3.0 update to Sid Meier's Alpha Centauri includes several additions and enhancements, including the introduction of a new unit.

Improved multi-player and unit behavior modifications, option to keep textures on during scroll.

Temporary patch fixing "Phantom Ship" contact generation bug, compressed air usage bug, crew quality updates, limits depth of search.

Expands support to include many other MPEG cards and MPEG software drivers, including Ace MPEG cards.

Only get this one if you want to eliminate the "guys in swimsuits unofficial Easter egg."

Adds a "real flight" mode.

General maintenance patch.

Load times improved; long reloads after dying fixed. Sound compatibility issues fixed. Save-game from compact install now works.

New 3DNOW! optimized renderer. Fixed demos. Added in game camera scripting system. Fixed forcejoin for CTF. set ctf\_forcejoin to 1.

Disables motion tracker, enables equipment pickup in jeep, fixes flashing text during name/callsign input, fixes problem where jeep would not move.

Fixes modem connections and command string problems.

Fixes a "General Protection Fault" error message seen when you select a tour, and it adds the game "Double or Quite."

Fixes the "debug assertion error," decreases the size of the executable, and tweaks the interface.

Added Voodoo2 SLI mode support, gamepad support, mouse button configuration (3DFX only), joystick support (\*very\* beta).
