

Nuke Snake is a one or two player arcade game. It is a cross between "snake" and "tank" games. It runs on any mac with System 6.0 or greater, in color where available. It looks really cool on a two page monitor! Shareware \$10.00.

Version 1.2 has the following improvements over 1.0: optional diagonals, exploding mines, fractal terrain, water barriers, rubber walls, rockets, clusters, a game counter, and a smarter computer opponent.
