How To Play

Don't Worry Be Happy is not very complicated. Basically, your objective is to shoot as many smile faces as you can in the 60 second time period. You score 5 points for each successful hit. There are also 4 special characters that will appear at a certain point in the game. Three of these characters will increase your score a great deal. However, one of these characters will steal away a margin of your points. You'll have to find out which character does what.
