This software is free. You may copy and distribute this program as long as all copyright notices remain intact.

#### Introduction

NoteBook is a small utility useful for keeping short notes and lists. The main window displays a table of contents built from the first line of each individual NoteBook page. Double-click on an entry in this table to display and edit the specific note.

NoteBook pages can be automatically saved when changes are made. You may cut, copy and paste entire notes from the table of contents page. The most commonly used menu commands are available on the toolbar.

Shift-click on an item in the Table of Contents to mark it as completed, or Control-Click to show importance.

Use Ctrl+D to insert the date and/or time in a page while your editing.

Up to four NoteBook pages can be printed on a single sheet of 8  $1/2 \times 11$  inch paper.

NoteBook was written out of a need for a means of keeping notes and lists about software development projects. NoteBook was originally designed and written for Macintosh and later converted to MS Windows as an exercise in portable C Language coding techniques.

## **Comments and Updates**

If you have comments, questions or find any bugs in NoteBook feel free to contact me on CompuServe or America Online.

If you would like to be notified when this application is upgraded send me an e-mail message with your online address. I'll send you a message when a new version of NoteBook for Windows is uploaded to CompuServe and AOL.

### **NBOOK.ZIP File Descriptions**

NOTEBOOK.EXE - The application program. NOTEBOOK.WRI - The documentation file.

#### Other Freeware from the Author

NoteBook for Windows (NBOOK.ZIP)
Reminders for Windows (REMIND.ZIP)
ToolBar for Windows (TBAR.ZIP)
Screen Loupe for Windows (LOUPE.ZIP)
File Editor for Windows (FXEDIT.ZIP)
Icon Extractor for Windows (ICONX.ZIP)
RGB Editor for Windows (RGB.ZIP)
Programmer's IDE (PMAN.ZIP)
Touch for Windows (WTOUCH.ZIP)
BattleStar for Windows (BSTAR.ZIP)

All of these applications and utilities can be found on CompuServe, Ziff and America Online.

I upload the latest versions to the WINSHARE, WINUTIL, PCUTIL and WINAV forums on CompuServe, AOL's Software Center and Ziff's Hot of the Presses sections.

### **BBS and Internet Operators**

Please upload the original ZIP file intact and title the submission "NoteBook for Windows v1.9" Author Gregory Braun

### **NoteBook Release History**

- v1.0 In-house development and testing.
- v1.1 Added splash box for release.
- v1.2 Included CTL3DV2.DLL in the Zip file.
- v1.3 Fixed a memory bug in the printer routines and added a dialog box to cancel printing.
- v1.4 Added "Save As" and "Get Info" options. Fixed several minor bugs.
- v1.5 Added editing and startup options.

  Compressed bitmaps to shrink program size.

  Fixed several minor bugs.
- v1.6 Fixed "small" printing problem and added

facility to print a range of notes.

- v1.7 Increased NoteBook size to 40 pages and added scrollbars for TOC and editing.
  Printing decreased to 4 notes per page.
  Removed CTL3DV2.DLL from the zip file.
  This DLL is no longer required.
- v1.8 Added "Always on Top" and "Edit Selection" menu items, a document icon for Win95 users and a print button to the toolbar. Added facility to open NoteBook documents as Read-Only. Fixed several minor bugs.
- v1.9 Added edit menu items to show importance and completion state of selected notes, as well as place dates and times in notes. PgUp/PgDn now work correctly when editing individual notebook pages. Ctrl+PgUp/PgDn are now used for Next/Previous menu items. The DEL key now deletes the character to the right of the cursor when editing. Added program option to use Gray Windows. Large Fonts are now displayed properly. Moved all strings to the resource segment for future foreign language translations.
