Thank you for trying Turbo Video Poker for Windows 95. This game is true 32 bit program and will not run under Windows 3.1.

This computer card game is based on the Video Poker games popular in most casinos. The game is played with standard poker rules, but is much faster and more **exciting** than typical poker because you can win many times your original bet. The players goal is to have a hand value of two Jacks or better.

Video poker gives you a good value for you gambling budget, but proper play is essential because each wrong decision will cost you money long term. This computer game will give you the tools you need to develop and track your game so you make the correct decisions when it counts. This game is shareware, and when you order all limitations on the advanced features will become available to you. Shareware allows you to try software before buying, so you insure that it works well and suits your needs.

This game was developed natively on Windows 95 for Windows 95 using a true 32 bit rocket fast program. This program uses no DLLs, no Vbrun or other external programs. All the work is done from the one program including the card displays, so you will see a speed difference between our games and most others which is why they are named Turbo. We have another version for Windows 3.1 if you wish to run the game on non Windows 95 PCs.

How to Play:

1. The player makes a bet, the shareware version is limited to \$20 maximum bet.
2. 5 cards are dealt face up for the player.
3. Player must now decide which of the 5 cards to discard or hold, in this computer game you hold a card by mouse clicking on the box underneath the card or on the card itself. After holding the cards you draw replacements for the cards you did not hold.
4. The player wins with a poker hand of two Jacks or better. For high hands like two pair or better he receives a *bonus* payment which is a multiple of the amount bet. The higher the hand the more you receive. In casinos these multiples vary from machine to machine, Turbo Video Poker will allow you to simulate these real machines.
5. Additional options allow you to set the payout multiplier and sound associated with hands. Any sound .WAV file may be used, windows comes with a few and thousands of them exist and can be downloaded. This will help keep the game fun. This game allows you to be creative, by using any sound file you make (Soundblaster with Microphone allows this) or download, the WAV file can be on any drive or directory on your PC.

Default Bonus Payouts :

Two Pair	2X
Three of a Kind	3X
Straight	4X
Flush	5X
Full House	8X
Four of a Kind	12X
Straight Flush	50X
Royal Flush	100X

For the shareware version betting is limited to \$20 Maximum and the game will end if your total goes over \$300 or less than 10 after playing at least 20 hands. This allows you to fully test the game without crippling any features or excessive nagging. Once you have paid for the game, you get a new disk or a code to promote you up to a registered version.

The registered version removes the limits, saves your settings, and allows you to change your total. You can also save \$5 by skipping the disk, and receiving a registration code which will turn the game into a full registered version. All orders are handled promptly and as with most shareware you are dealing directly with the owner so we care.

The two picture buttons on the left of the screen allow you to register by cash, check, or credit card. Outside of the US, please use the credit card button for Non US checks. The credit card option takes your information and creates an order which you can then email or fax to a company we use to process these payments. Using this company allows us to take orders 24 hours a day. The built in order form should be used for cash or check orders, and this goes directly to us by regular post office mail.

Registration is currently only \$15 + optional Disk and Shipping (\$5) all countries. For the \$15 registration you will receive an email unlocking code which turns your current program into the full version. For \$20 you will receive a disk with the latest full version.

Registration Benefits

- Our undying Gratitude.
- 30 Day full Money back guarantee.
- All the shareware messages will be turned off.
- Betting limits are removed.
- You will be able to set the total.
- Your last total and current bet are saved between games.
- All of the color changes you make are saved between games.
- Full Web support. Any fixes will be available from FTP or the WWW.
- ASP Shareware. ASP is a professional organization with high standards.

Registered users Receive a disk with the current Registered version plus other shareware. All the shareware messages will be turned off, betting limits are removed, and payouts will work on all hands. Registration is currently only \$15 or \$20 with disk and Shipping Worldwide.

This program is provided at no charge for evaluation purposes only. While the game has been extensively tested and computer games are generally safe and harmless the author is not responsible for any damage caused by the program through direct or indirect use.

[Additional Registration Form](#) Additional Registration Form can be copied and pasted.

Windows Installation Instructions

1. Run Setup.EXE from the directory or floppy which you unzipped the zip file.

Example from File Manager: Select RUN and enter A:Setup or the correct path name of the SETUP.EXE. Or double click on the file name Setup.
