Travel Icons

If you're working on anything related to "travel"-- especially vacation travel-- you'll find these "objects from around the world" invaluable design-helpers. Whether it's a coconut from the tropics, a sombrero from Mexico or bocci balls from Italy -- these items are selected because they immediately establish "destination". Drop them into your text or build around them. You'll also find some fully-clipped "travelers" to add the human touch.
