

## **Audio**

In this section you can choose the type of music to be played in **HELICOP**. There are three pre-set styles. Choose from Classic, Ambient or Children's. It is also possible to have a Custom setting. To hear the music, click on the corresponding Play icon.

Click in the Audio Control box to determine whether Sound Effects and/or Music will be played.

If you choose Custom, click on each level to change the music to be played. Please note that Custom does NOT indicate that additional music can be added to the program.

In this section it is also possible to change the voice of HELICOP's controller. Choose from US Sergeant or Biplane Pilot.

Before quitting this screen, save Music Settings by clicking on the appropriate icon. Then click on Back to return to the main Control Screen.
