

## [Kagi Handles All Of Our Registration Payments Apart From Site Licenses.](#)

Please use the enclosed Kagi Register application to register your copy of Learn To Type. Follow the instructions inside the application itself. As soon as Kagi receives your payment it will notify us. We will then contact you quickly with your registration code. When you receive your code you should select "Enter Code" from under the Help menu in the Learn To Type Application. You should then enter your name and code exactly as provided for you. The program will then personalise itself in your name and "unlock" itself, permitting you access to lessons covering all of the keyboard.

## [Site Licenses: Important!](#)

We welcome customers requiring site licenses though have made no provisions for site licensing in the Kagi Register application included with this program. This is because we negotiate site licenses on an individual customer basis. We make a point of making good value offers (especially to educational institutions) depending on the number of copies required. So [contact us](#) with your situation and requirements and we'll be pleased to see what we can do for you as quickly as possible.
