Educational

WANTED: Teachers, Tutors and Trainers for participation in a unique software project. *ARK ANGLES* announces a new multi functional educational software product for review, testing and diagnosis. Dubbed "CRAM", this suite of programs enables the creation of practice exercises, drills, worksheets, informal tests and formal exams, either printed out or done on the PC. It is also capable of marking, summarising and scaling results, and providing meaningful help and feedback to students and teachers. CRAM is in the final stages of development, and a public Beta Test version will be released on our web site shortly. You can be a part of it! Simply download and use the product absolutely free. It has no crippling and no time limit. By giving us feedback you can help make this product a great tool for schools, teachers and parents. In addition, educators can also write original "topics" to include with CRAM, and earn royalties on every copy sold. See our web site for further details. Send us an e-mail if you would like to participate in this innovative educational project.

Ordering Information

Users must register software if used beyond the allowed evaluation period. Registered users receive many extra benefits for example extra powerful features, printed manuals, extended support and/or bonus programs.
