Acrobat Reader Installers and Instructions
```
===================================
```
This hybrid CD-ROM contains Acrobat Reader 3.0 installers (with and without Acrobat Search) for
Macintosh, Windows, and Unix. Here are the installation instructions for each platform:

Windows   Run the SETUP.EXE program in the 16BIT (for Windows 3.x systems) or 32BIT
                (for Windows 95 and NT systems) folder for the desired configuration:

```
                ACROREAD / WIN
                        |___ READER          Acrobat Reader
                        |     |___ 16BIT          Windows 3.x
                        |     |___ 32BIT          Windows 95 and NT
                        |     |___ QUICKTIM        QuickTime 2.12 Installers
                        |
                        |___ RDR_SRCH        Acrobat Reader + Search
                        |     |___ 16BIT          Windows 3.x
                        |     |___ 32BIT          Windows 95 and NT
                        |     |___ QUICKTIM        QuickTime 2.12 Installers
                        |
                        |___ DISKS           Acrobat Reader (Disk-based Installer)
                        |     |___ 16BIT          Windows 3.x
                        |     |___ 32BIT          Windows 95 and NT
                        |
                        |___ ONEFILE         Acrobat Reader (One File Installer)
                              |___ 16BIT          Windows 3.x
                              |___ 32BIT          Windows 95 and NT
```

                For example, the Acrobat Reader + Search installer for Windows 95 is:
                ACROREAD / WIN / RDR_SRCH / 32BIT / SETUP.EXE
                QuickTime installation is only required if you are viewing PDF files with linked QuickTime
                movies or sounds. See the README.WRI file in the QUICKTIM folder for installation
                details.

                The DISKS folder contains the Acrobat Reader 3.0 installer files that may be copied to
                empty, DOS-formatted HD floppy disks.

                The ONEFILE folder contains the Acrobat Reader 3.0 installer files that are most suitable
                for online distribution (email, web, bbs, etc.).

Macintosh   Run the "Install Acrobat Reader 3.0" program in the "Reader" folder of the
                desired configuration:

```
                ACROREAD / MAC
                        |___ Reader          Acrobat Reader
                        |     |___ Reader          Reader Installer
```

```
|          |___ OLE            OLE Plug-in Installer
|          |___ QuickTime      QuickTime 2.5 Installer
|
|___ Reader+Search    Acrobat Reader + Search
|          |___ Reader         Reader + Search Installer
|          |___ OLE            OLE Plug-in Installer
|          |___ QuickTime      QuickTime 2.5 Installer
|
|___ Disks            Acrobat Reader (Disk-based Installer)
           |___ Reader         Reader Installer
           |___ OLE            OLE Plug-in Installer
           |___ QuickTime      QuickTime 2.5 Installer
```

For example, the Acrobat Reader + Search installer for Macintosh is:
ACROREAD / MAC / Reader+Search / Reader / Install Acrobat Reader 3.0

QuickTime installation is only required if you are viewing PDF files with linked QuickTime movies or sounds. Most likely, your Macintosh system already has QuickTime 2.0 or later installed, which is required to play back QuickTime movies and sounds added to Portable Document Format (PDF) files.

Installation of the OLE plug-in is only required if you need to view PDF documents embedded as OLE objects in another application, such as Lotus Notes.

Unix   For installation instructions, see the INSTGUID.TXT file in the directory for the desired configuration (all configurations are in the same directory):

```
ACROREAD / UNIX
           |___ READER        Acrobat Reader
           |
           |___ RDR_SRCH      Acrobat Reader + Search
```

For example, the Acrobat Reader + Search install script for Unix is:
ACROREAD / UNIX / RDR_SRCH / INSTALL. For more information, see the "Acrobat Reader Installers for Unix" section below.

Distributing the Acrobat Reader Installers
====================================
You may make and distribute unlimited copies of the Acrobat Reader or Acrobat Reader + Search software on this CD-ROM, including copies for commercial distribution, as long as each copy that you make and distribute includes the following:

   1. Acrobat Reader or Acrobat Reader + Search installer, as provided by Adobe;

   2. Acrobat Reader Electronic End User License Agreement;

   3. Copyright and other proprietary notices included in Acrobat Reader; and

   4. The following attribution statement on any media and packaging that includes Acrobat Reader: "Acrobat(R) Reader copyright (C) 1987-1996 Adobe Systems Incorporated. All rights reserved. Adobe and Acrobat are trademarks of Adobe Systems Incorporated."

You are expressly prohibited from modifying the Acrobat Reader installer program provided by Adobe or creating your own installer for the Acrobat Reader software. You may, however, customize the Acrobat Reader installer as described in "Customizing the Acrobat Reader Installers" below. If you distribute the Acrobat Reader installers as provided on this CD-ROM or customize them as described below, you will be in compliance with item 1 above.

The Acrobat Reader Electronic End User License Agreement, copyright notices, and proprietary notices are contained in the Acrobat Reader installer program. If you distribute one of the Acrobat Reader

installers provided on this CD-ROM you will be in compliance with items 2 and 3 above. Details on the terms of use for the Acrobat Reader products are found in the Acrobat Reader Electronic End User License Agreement presented during installation.

You may not distribute the Search or QuickTime installer components separately; they must be distributed along with an Acrobat Reader installer. Adobe Systems Incorporated has licensed QuickTime for Macintosh and Windows to incorporate in Adobe products, including Acrobat Reader. You may make copies of QuickTime only as incorporated for use with Acrobat Reader. Any distribution of QuickTime apart from the Acrobat Reader is subject to the restrictions specified by Apple Computer, Inc.

There is not a Reader + Search installer that will fit on HD floppy disks.

Acrobat Reader Installers for Unix
==============================
ACROREAD/UNIX/READER - This directory contains files for installing Acrobat Reader onto the following platforms: SunOS, Solaris, HP-UX, AIX, or IRIX. A single installation script senses what platform's components are present and lists those platforms as choices. The required files are the following:

INSTGUID.TXT	The Reader installation guide
INSTALL	The installation script
LICREAD.TXT	The End-User License Agreement which is required by the installation script
READ.TAR	The platform-independent files (on-line documentation, fonts, etc.).This file is required by the installation script.

The following files contain the platform-dependent components. If you do not want to distribute the Reader installation for a particular platform, such as Solaris, then do not inlcude that platform's file in the same directory as the other components of the installer.

AIXR.TAR	The AIX platform-specific files
HPUXR.TAR	The HP-UX platform-specific files
IRIXR.TAR	The IRIX platform-specific files
SSOLR.TAR	The Solaris platform-specific files
SSUNR.TAR	The SunOS platform-specific files

For example, to include the Reader installer for only AIX, the following files are needed in the same directory:

INSTGUID.TXT
INSTALL
LICREAD.TXT
READ.TAR
AIXR.TAR

ACROREAD/UNIX/RDR_SRCH - This directory contains the above listed files *plus* files specific for Acrobat Search. The additional files are:

SEARCH.TAR	The platform-independent files for Acrobat Search
AIXS.TAR	The AIX platform-specific Search files
HPUXS.TAR	The HP-UX platform-specific Search files
IRIXS.TAR	The IRIX platform-specific Search files
SSOLS.TAR	The Solaris platform-specific Search files
SSUNS.TAR	The SunOS platform-specific Search files

For example, to include the Acrobat Reader + Search installer for HP-UX, the following files need to be in the same directory:

INSTGUID.TXT
INSTALL
LICREAD.TXT
READ.TAR

```
        SEARCH.TAR
        HPUXR.TAR
        HPUXS.TAR
```

Re-use of Acrobat Reader 3.0 Documentation
=======================================
You may copy and re-use text and illustrations from any or all of the Acrobat Reader documentation (including Online Guides and ReadMe files) in your own publications associated with the distribution of Acrobat Reader 3.0 software. If you do so, you must include the following attribution line: "Some portions copyrighted to and reprinted with permission from Adobe Systems Incorporated."

Customizing the Acrobat Reader Installers
==================================
You may customize the Acrobat Reader installers to install additional files such as plug-ins and help files. You cannot change the components that are built into the Acrobat Reader installer and its archives.

Windows -- The Acrobat Reader installers for Windows have the ability to copy files that are external to the installer application and archives. To trigger the blind-copy mechanism, a file named ABCPY.INI (Adobe Blind CoPY initialization file) must exist in the same folder as the installer program (SETUP.EXE) for Acrobat Reader. The ABCPY.INI file specifies the source and destination locations for each file that is copied. Details for modifying this file can be found in ABCPYDOC.INI which is in the same folder as the installer (SETUP.EXE) for Acrobat Reader. An actual example of using ABCPY.INI can be found in the Acrobat Reader + Search installer on this CD-ROM.

Macintosh -- The Acrobat Reader installers for Macintosh have the ability to copy files that are external to the installer application and archives. This is done by placing them in specially named folders, within the same folder as the installer application. In this way, files can be automatically copied to the Adobe Acrobat 3.0 folder on the destination hard drive. Standard folder names are:

        Plug-Ins
        Optional Plug-Ins
        Help

1. Create a folder named (one of the choices above, exactly) at the same level as the installer application in the "Reader" folder.

2. Put the appropriate files or folders (yes, it's recursive) into the folder you've created. Please put only the same type of files as the folder name. For example, plug-ins in the Plug-Ins folder, PDF files in the Help folder, etc.

Note: The Installer checks to see if there is enough room on the target disk before installing the files in these external folders, but the copy will fail silently if there isn't enough room on the target disk. Also, the amount of space taken up by the additional files is --not-- included in the required space number in the Easy Install portion of the Installer.

Unix -- You can add your own plug-ins or documents to be installed by the Acrobat Reader for Unix installer. To do so requires you to add one or more .tar files to the directory containing the installer components containing the additional elements you would like to install .

Situation #1
=========
You have additional PDF files you would like installed into Reader/Help. Follow these steps:

1. Create a directory structure of Reader/Help and place your additional files in the Help directory. Do NOT use your Reader installation area because any files in the Help directory when you make your .tar file will overwrite files of the same name that already exist in the installed image on the user's machine.

For example, you've got a file, foo.pdf, you'd like to install into the Help directory. On your machine, set up a directory of Reader/Help/foo.pdf.

```
mkdir Reader/Help
cp -p foo.pdf Reader/Help
```

2. Change to the Reader directory.

```
cd Reader
```

3. Create a .tar file of that directory and name it CUSTOM.TAR.

The name CUSTOM.TAR should be used for any files to be installed that are platform-independent, such as help files. It is **very** important the files in the CUSTOM.TAR file are platform-independent.

4. Place the CUSTOM.TAR file in the same directory with the other files of the installer.

Situation #2
=========
You want to install plug-ins for a specific platform.

1. Create a directory for that particular platform and place the correct plug-in in the directory.

```
mkdir Reader/<platformdirectory>/plug_ins
cp -p fooplug.api Reader/<platformdirectory>/plug_ins
```

The *<platformdirectory>* must be one of the following:

hppahpux	For HP-UX
mipsirix	For IRIX
rs6000aix	For AIX
sparcsolaris	For Solaris
sparcsun	For SunOS

2. Change to the Reader directory.

```
cd Reader
```

3. Create a .tar file of that directory and name it one of the following (appropriate for the platform):

HPUXC.TAR	For HP-UX
IRIXC.TAR	For IRIX
AIXC.TAR	For AIX
SSOLC.TAR	For Solaris
SSUNC.TAR	For SunOS

4. Place the .tar file in the same directory as the other files of the installer.

"Includes Adobe Acrobat" Logo
===========================
A special "Includes Adobe Acrobat" logo is available from Adobe for use when distributing Acrobat Reader. See http://www.adobe.com/acrobat/acrodist.html for more details.
