0. Who's who

My name is Emilie and this is my first realisation.I'm a french girl of 13 years old (my parents are greek) and I hope than Magic COLOR can change a "little bit" of the xx version of Tetris.I want to thank my daddy for his help to understand visual.

1. Overview

In this game you must changed some color pawn to an only one color without changing in black color.You must move in the game with arrow keyboard.

But it's not so simply :color are moving,special pawns appear when the level increase.

2. History

It's the first release with 22 levels,the 1.0 version contains only 12 levels and I've added 3 background screens and another background music,the 2.0 version had only 1 screen and music background.

I've a lot a ideas for the next versions, don't worry!

3. Peanutsware

If you are enjoy by this game please send me only one green paper of 1 dollar (I'm too young to have a bank card or a bank account) and if you please put on your envelope an pretty stamp for my collection and you receive all my congratulations and better the new version.
