-- readme.txt      : standard ASCII file
```

About Raisin Hangman 1.00a:

   Raisin Hangman was written as a twist on the original, standard hangman game. As   the creator of the Raisins!! Home Page, I thought it was high time that someone stepped forward to advocate Raisins' rights... (yes, they're being persecuted everywhere!) It is up to **you** to free the raisins from their present bondage. Simply solve the puzzle in 6 guesses or less and score big points, as well as set the poor raisin free! The idea is simple; some of the puzzles are not... at any rate, try your best to save the raisin's life!
   Raisin Hangman will run on any Windows 3.11 or Windows '95 machine with vbrun300.dll present; it requires at least a 386 processor and 4 megs of memory, though a Pentium 100 with 8 megs is recommended.

What is the difference between version 1.00a and 1.00b?

   Version 1.00a of Raisin Hangman is the *shareware* version, whilst 1.00b is the *registered* version. You may use Raisin Hangman for a trial period of 21 days; if you decide you would like to keep the program, you must register it. Registering offers a slew of benefits and is extremely easy. Simply hit the *print* button found on the opening screen and About Raisin Hangman screen... fill out the printed order form and attach a check for $4.00* payable to Brady Fopma-- simple!

What are the benefits of registering?

   Registering removes the annoying "nag" screen, as well as adds numerous more words. There are less than 200 words in the shareware version. To find out more advantages of registering, see the Top Ten Reasons to Register listed on the program's help screen.
