**Thankyou for downloading and trying out Tank Tracker for Windows!**

Remember to support the Author efforts if you like to own this game or decide to keep this game on your Hard disk.  This game is not free to keep without mailing in your registration form and the Author requested shareware fee of only $5.00 + .52 cents for s/h. I'll mail you the latest copy of this game to you on a 3.25 disk unless you request 5.25 disk is also available.

Please to register this game so I can continue bringing you some fun and easy games to play under Windows!

It is such small request for so much features, and I know you'll like the special sound effects you hear in this game.
If you got your computer system w/ sound card hookup to a Dolby Pro Logic Surround Sound system well you better turn it up and hear the expanded real actual tank wave sound effects. If you got just the plain Dolby Surround Sound System, it will also works well.  If not, your mini amp computer speaker will burst with this sound.

This game offers a few new stuff that you haven't seen in my other popular games like BRATS,  WINSHOOTER, CRIME ALLEY, 3D CUBE BLOCKBUSTERS, FLIPACES, TIMEBOMB,  and SMILEE!

All my games like above and the new Tank Tracker all have these new features. More games will follow, base on Space,  Medieval,  Westerns, Bombs, Triple 3D Simulated Skyscapers, and more funny games like feed crying baby Brats etc.. Much more animation in both graphics and mouse cursor actions.

To find out more you should register today and if you would like to get my latest game catalog just send in a self-address envelope to the author which is me. See the enclosed ORDRFRM.WRI  file for a mini sneak preview of what is coming up in the future. Or take a peek at my all new Windows  Game Catalog under the file name GAMECAT.TXT.

**New feature!**

Fast game play access with your mouse, no more going through pull down Game menu drop access to start the game. Just click on Play to play the game right now or Pause the game if you got a phone call or etc..

The word Continue will appear when you click on Pause then click on Continue to play on! Reset the game anytime you want during a game or even on pause by hitting Play again to start a new game! Stop the game now and bring up the introduction screen for a full game restart. This will happen anyway when your game is over then click on play again to start.

Also when you do a full Exit out while playing a game whenever you want instead of double clicking on the left bar. This comes in handy if your boss is coming near your work area! For each time you use any of the above menu  items you'll hear wave

sound effects just like you hear from Windows.

**Note: Under this ShareWare version Options is disable and game
play is set by the Author. When you register this copy Options will
be enable for you to change speed, target count, time!
This is why your strongly encourage to mail in your registered
fee to the author.**

**New feature!**

**GAME OVER**

Is back just to let you know when the game is over!

**New feature!**

When you see this label Wave System Sound, is available only if you have either
of the following;  Sound Card or Board installed or Speaker.drv to play the wave
sound through your build in Pc speaker. Sound Card option is better, since you can
play the wave sound through you mini amp spks or through your home stereo unit.

**Note:** The Tank Tracker sounds are real sounds effects and are not computer generated, or
fake arcade sounds!  Click on any main menu item from Options thru Help and you will hear
tank wave sounds also.  Now you'll also get  real female voice announcement when you click
on Exit that will be address to you.

Since this game is a **ShareWare Copy** and is only for evaluation purposes only
**OPTIONS is not available**, and  I already setup the game time to 2:00 minutes,
speed is just slow and the number of open targets is less. This will give
you a good idea  what you can get when you send in your **Register fee** of only
$5.00 plus .52 cents for shipping/ handling.

Under the registered version target windows are set to the max, game speed
is normal an game time is set to 3.5 minutes game play. You may change
these setting if you like and game play can even be set to 1 second to 10 minutes.
You also get higher scoring than the shareware version.

On the main menu Register is replace with Hints on the game. Also when you register
this game you'll can also get a none sound version & this sound version for the same
shareware fee if you like. Registered users get,  TipNews Letter when it's available,
coupons off your next order of games.

**Tank Tracker Plot:**
Tank Tracker is  base on the old arcade game rooms in malls back in the 80's.
This is a Tank Simulator for Windows, which puts you behind the wheel of the
tank and also as the tank gunner.

Tank Simulator  gives you the feel actual tank movement, explosions sounds. You view
the enemy targets in a 3D 3 sided display windows while you see your tank controls in
a 3D view in front of you. Colorful explosions, 3D mini tanks in more  targets to shot at in
this game. 3D background outside your tank viewing area of a mountains, sunset and clouds.
Your mouse will become a tank target sight aimier cannon and will give off real tank fire sound
when you click now on your mouse.

More info on the main menu line under **Help**

**Installation
Game
Step 1**
1.To install this game you should not place it in your C:\WINDOWS or C:\WIN31 or C:\W31 directory,
but into it's own subdirectory like in this example:

C:\WINDOWS\GAMES

This way you don't have to clutter up your main Windows directory with all these games.

**Step 2.**
Just copy either one to your game directory or whichever you choice to place them.
In this example it would be  COPY TANK.EXE C:\WINDOWS\GAMES

**Step  3.**
Now that the file contains is dump out, you can use the FileManger and Program Manager to drag
and drop the Shooter.exe to your favorite program goup. This is one way you can do this!  The
other way is that you can use the Program Manager New item feature and insert Tank.exe that way.

**Step 4.**
Add the game to one of your ProgMan Manager Group files  or  leave it as a Icon button by  doing a drop
and drag in Norton Desktop, Pc Tools for Windows, or run it from DashBoard quick icon launcher or
Program Menu.

**Wave Sound Files**
To install the wave files for this game place them in your Windows directory or better yet create
a SOUND directory and copy all your current wave files to that directory. Add this SOUND directory
to your PATH line in the autoexec.bat file.

Also make sure your using a sound card, like Sound Blaster or any other wave form compatible
card. Also for PC speakers users only you can download SPEAKER.ZIP and use your PC speaker
to pick up Wave sound file also. But having the Sound Card is the better route to go!

Wave files included are:

TANK.WAV,   KABOOM.WAV,  EXPLOD.WAV,  GDBYTANK.WAV

## Don't forget to Register Tank Tracker  Today!

## Don't forget to take a peek at GAMECAT.TXT

## Don't forget to use ORDRFRM.WRI  to register this game.
