Contents

New Amida

Selecting New menu item lets you start amidaring by displaying New Amida dialog box.
Input the number of entries, or decisions, which you want to decide in the dialog box.
In the next window, you can draw branches, and enter entry names as you like. If you want to input decisions, or selections, choose Set Decisions menu item.

Set Decisions

By choosing this menu item, you can enter the selections, or decisions you will make. The decisions are automatically, and randomly assigned at the bottom of each entry line. They are invisible until you choose Make Decision menu item.

Make Decision

If you want to decide the relations between entries and decisions, choose Make Decision menu item. After choosing this menu item, you will see the entries and decisions at the both ends of entry lines.

By double clicking an entry, Amidar program will trace the entry lines and branches to reach a designated decision. Once you make a decision for an entry, you won't be able to make a decision for the entry any more. The relations between entries and decisions you have made are accumulated in the decision list which can be seen by choosing List Decisions menu item.

List Decisions

If you want to see the relations between [entries](#) and [decisions](#) which have been decided, choose [List Decisions](#) menu item. A list of decisions contains a series of [decision](#) : [entry](#) relationship.

Quit

By choosing <u>Quit</u> menu item, you can exit Amidar program.
Please note that you won't be able to retrieve any decisions after exiting the program.

Help

By choosing this menu item, you will find a poor help texts which you are looking at. I'm very sorry about that.
Another sub menu, [About](), shows you a description of Amidar program.

branch

A connecter which bridges between entry lines. Amidar program traces an entry line and branches to reach a decision.

About

About menu item enables you to get the copyright information of Amidar Program. If you want to know more about copyright information, select Legal Notice in this help file.

[Entry](#)

Entries are placed at the top ends of [entry lines](#). From them Amidar Program traces entry lines and [branches](#) to reach [decisions](#).

Decision

By selecting Set Decisions menu item, you can input decisions to be made. Decisions are automatically and randomly placed at the bottom of entry lines.

Entry Line

Entry Lines are the vertical lines drawn in the main window of Amidar Program. There are an entry and a decision placed at the each end of an entry line, so the number of entry lines are equal to the number of entries, and the number of decisions.
