

Before opening the IYF CD-ROM:

1. Set your color depth to 8-bit (256 colors). The IYF CD-ROM will not run properly otherwise.

IYF runs exclusively from the CD-ROM and does not install to your hard drive. For optimal playback of the floppy disk projects (located in the "splashf" folder), you can copy the projects to your hard drive.

To play the IYF CD-ROM:

1. Choose "RUN" from the File menu. Type: (the letter of your CD drive) i.e. D:\IYF.EXE and then click "OK" You can also choose the "browse" function at the right of your "RUN" dialog box, and then choose your CD-ROM drive letter to designate the correct pathname.

2. After the IYF starts you can bypass the opening by clicking the mouse button.

The "Help" button on the main contents page will show you how to navigate interface "one". Click on the "Interface two" button to navigate through the CD-ROM using an alternative interface.

To play specific floppy disk projects located in the "splashf" folder: Choose "RUN" from the File menu and type:

D:\IYF\SPLASHF\filename.exe

1. angus.exe
2. fry.exe
3. imedia.exe
4. mofo_ref.exe
5. syn.exe
6. type.exe
7. wblol.exe
8. woods.exe
9. zion.exe
