

Alchemist is a font by Jay Pierstorff of **Computer Safari**. It is loosely based on symbols from early chemistry. It works best at larger point sizes and in programs that support kerning. It has upper and lower case characters as well as all numerals and punctuation marks. In addition, it contains many of the original alchemy symbols. If you use *CorelDraw!* you can select the characters from the 'Symbols' roll-up.

The following chart will help you locate and identify the symbols included in this font.

Symbol	Keystroke	Represents:	Symbol	Keystroke	Represents:
	{	Precipitate		Alt + 0155	White Lead
		Lye		Alt + 0157	Lead
	}	Iron		Ctrl + 6	Vinegar
	~	Minium		Ctrl + -	Potash
	Ctrl + 1	White Arsenic		Alt + 0161	Glass
	Ctrl + 2	Wax		Alt + 0161	Copper saffron
	Alt + 0129	Tartar		Alt + 0165	Lime
	Alt + 0130	Water		Alt + 0166	Metal Lime
	Alt + 0131	Lead		Alt + 0168	Urine
	Alt + 0133	Antimony		Alt + 0169	Copiapite
	Alt + 0140	Amalgam		Alt + 0170	Borax
	Alt + 0142	Alum		Alt + 0171	Azurite
	Alt + 0143	Olive Oil		Alt + 0172	Orpiment
	Alt + 0144	Arsenic		Alt + 0174	Aquafortis
	Alt + 0153	Wood		Alt + 0179	Steel
	Alt + 0154	Talc		Alt + 0180	Sublimate
	Alt + 0181	Brimstone		@	Subacetate of copper
	Alt + 0167	Subacetate of copper crystals
