

Chat Options (Personal Info tab)

Provides a space for you to type your real name. Your name is displayed in the list of users on the chat server in the **User List** dialog box.

Provides a space for you to type your nickname.

Microsoft Chat uses your nickname to identify you to other people inside a chat room.

Provides a space for you to type information about yourself.

If other people ask Microsoft Chat for your personal profile, they will see this information.

Create Chat Room dialog

Provides a space for you to describe the room's topic.

The topic description appears in the Chat Room List dialog box next to the room's name.

Specifies whether the room is moderated.

In a moderated chat room, only a room host and the speakers the host designates can send messages. All other room members are spectators. Only a room host can select this box.

Specifies whether anyone, or only a room's host, can set the room's topic. Only a room host can select this box.

Specifies whether an invitation from the room host is required to enter the room. Only a room host can select this box.

Specifies that only people in this chat room will see the room in the Chat Room List dialog box. Only a room host can select this box.

Specifies whether information about who is inside the room is available to people outside the room. Only a room host can select this box.

Specifies whether the number of people allowed into the room is limited. After selecting the **Set maximum users** check box, type the greatest number of people allowed. Only a room host can select this box.

Chat Options (Comics View tab)

Specifies the number of comic strip panels to be displayed in a single row.

Chat Options (Settings tab)

Specifies whether Microsoft Chat-specific information will be sent to the people you're talking to. This feature is useful when chatting with members using text-only chat programs.

Specifies whether you want to be prompted to save a copy of your conversation whenever you close a Microsoft Chat window.

Specifies whether you want to be able to receive "whispers."

Whispers are messages that only you and the person who sent the message can see.

Chat Options (Character tab)

Lists the available cartoon characters. Click a character to see what he, she, or it looks like.

Displays the cartoon character you selected from the character list, with the expression you selected by using the emotion wheel.

Adjusts the cartoon character's expression.

You can drag the large black dot around the emotion wheel to change the character's expressions.

Chat Options, Text View tab, Set Font Text dialog

Lists the available fonts.

Lists the available styles for the selected font.

Lists the available point sizes for the selected font.

Displays what the text will look like after the selected font options are applied.

Lists the available foreign language support installed on your computer.

Chat Options (Background tab)

Lists the available cartoon backgrounds.

Click a background to see what it looks like.

Displays the selected background.

Room List dialog

Provides a space for you to type words or a portion of a word that matches all or part of the room name you are looking for in the **Room** list.

Only room titles with words that match will appear in the Chat Room List dialog box.

Specifies whether you also want to search the **Topic** list for the words you typed in the **Display chat rooms that contain** box.

Only rooms that have titles or topics with words that match will appear in the Chat Room List dialog box.

Updates the Chat Room List by asking the chat server for a current list of rooms.

Takes you to the selected room.

Creates a new chat room.

You automatically become the host of rooms you create.

Chat Connection dialog (Connection tab)

Lists the available chat rooms you've added to your Favorites list.

Provides a space for you to type the name of a chat server you want to connect to.

Specifies that you want to enter a particular chat room and provides a space for you to type its name.

Specifies that you want to see a current list of every chat room that is available on the server.

Invite dialog

Provides a space for you to type the nicknames of people you want to invite into the room.

Kick dialog

Provides a space for you to type the reason you are removing someone temporarily from the room.

Microsoft Chat displays your reason to everyone in the room. "Kicking someone out" is effective only until the person rejoins the room.

Specifies whether you also want to ban the person you are kicking out of the room.

A banned person cannot re-enter the room until you remove the ban or until the room is recreated, at which time the ban list is cleared.

Provides a space for you to select or type the identity of the person you want to ban or readmit to the chat room.

Specifies that you want to ban the person whose name appears in the **Person to ban or unban** box. Only a room host can select this box.

Specifies that you want to remove the ban from the person whose name appears in the **Person to ban or unban** box. Only a room host can select this box.

Chat Options, Settings tab

Provides a space for you to type the locations of your sound files. Microsoft Chat can send or play only sounds it finds in these folders. You can list several folders, separated by semicolons—for example, **c:\windows\media;**
c:\windows .

Specifies whether to show the arrival and departure of people from your room.

Chat Options, Text View tab

Specifies that a blank line should appear between each message in text-only mode.

Specifies that a blank line should appear between messages that are not of the same type in text-only mode. Actions, thoughts, and whispers are examples of different message types.

Specifies that a blank line should not appear between messages in text-only mode.

Click this to change the fonts used to display messages on your computer.

Resets the fonts used to display messages to their default settings.

Specifies whether to display room host message headers with a bold font.

Specifies whether to display room host messages with a bold font.

User List

Specifies that you want to search for every person connected to the server.

Lists the nickname and identity of every person that matches the search criteria you specified.

Specifies that you want to search for every person having a nickname that contains the text you type in the **Names containing** box.

Specifies that you want to search for every person with an identity that contains the text you type in the **Names containing** box.

Invites the person you selected from the **Nickname** list to enter the current room you are in.

Opens the Whisper Box, in which you can "whisper" to the person you selected from the **Nickname** list.

Whispers are messages that can be seen only by the person sending the message and the person receiving it.

Set Text Font dialog (??--not hooked up, or if hooked up, not exactly this text??)

Specifies whether a line is drawn through the selected font.

Specifies whether the selected font is underlined.

Lists the available colors for the selected font.

Shows how the different message and header types will look.

Lists the available message and header types.

Play Sound dialog

Lists the available sound files.

Provides a space for you to type a message that will be sent with the selected sound.

Plays the selected sound.

Chat Options, Settings tab

Specifies whether you want to be able to receive invitations to join other chat rooms.

Chat Options, Auto tab

Specifies that you do not want to automatically send greetings to people as they enter the room.

Specifies that you want to automatically send a whispered greeting to individuals as they enter the room. Type the message you want whispered in the text box.

Specifies that you want to automatically send a greeting as people enter the room. Type the message you want sent in the text box. Everyone in the room will see the greeting.

Provides a space for you to type a message that will automatically be sent to people as they enter the room. You can use variables for the name and room as indicated in the sample text.

Lists the available key combinations you can use to run a macro. Select a key combination, and then type the message you want to associate with it in the text box.

Provides a space for you to type a message you want sent whenever you press the key combination associated with it.

Provides a space for you to type a name for a macro you create. A macro consists of a message you type plus the key combination associated with it.

Saves the macro identified in the **Name** box. You must add the macro before you can use it.

Deletes the macro identified in the **Name** box. You need to select the macro in the **Key combination** box before deleting it.

Chat Options, Personal Info tab

Provides a space for you to type your e-mail address. The e-mail address must be in the format name@company—for example, someone@microsoft.com.

If other members want to send you e-mail, Microsoft Chat provides this e-mail address.

Provides a space for you to type the URL (address) for your World Wide Web home page.
If other members want to view your Web page, Microsoft Chat provides this URL.

Chat Options, Settings tab

Specifies whether to display the identity of each of the members when they enter the chat room (text view only).

Specifies whether to play sounds sent by other members.

Specifies whether you want to be notified of incoming Microsoft NetMeeting calls. If you clear this check box, your computer ignores other members' attempts to place a NetMeeting call to you.

Room List

Specifies that you want to display only rooms that are registered.

Rooms are usually registered by the administrator of the chat server or the Internet service provider.

Administrators can choose not to register rooms that might contain objectionable or offensive names or topics.

By displaying only registered rooms, you might avoid objectionable or offensive chat rooms.

Provides a space for you to type the smallest chat room you want to display in the Chat Room list.

Provides a space for you to type the largest chat room you want to display in the Chat Room list.

Provides a space for you to type the name of the room you want to create.

Provides a space for you to type a password that others must use to access this chat room. The password is case sensitive, so members must type the password with the same characters and the same case as you have typed them.

Specifies whether you want to be notified when someone attempts to send you a file. If you do, Microsoft Chat will ask you whether you want to receive the file and where you want to store it on your computer. If you clear this check box, your computer ignores other members' attempts to send you files.

Specifies whether rich text formatting (for example, color, bold, and italic) in a sent message is displayed in Comics view. If this is box selected and the message sent to you has been formatted, it will be displayed as such. Otherwise, all messages in Comics view are displayed in a uniform format.

Specifies that you want Chat to automatically ignore a person who sends a flood of messages, multiple lines of text sent in rapid succession. You define exactly what constitutes a flood by setting **Message Count** and **Interval**.

Specifies the number of messages that constitute a flood.

Specifies the interval in seconds at which the number of messages specified above must be sent to constitute flooding.

Connects you to the same chat room as the person whose nickname you have selected.

Displays a message published by the chat server you are connecting to. The message typically contains information about server status and other news.

Specifies that you want to display the Message of the Day from the chat server each time you connect to the server.

Specifies whether you want the speaker's name on one line and the message on the next. If you clear the check box, the speaker's name appears on the same line as the message.

Help is available for each item in this group. Click  at the top of the dialog box, and then click the specific item you want information about.

Provides a space for you to type a message that is sent to all of the rooms you are in, indicating that you are away. Your icon in the list of members changes to a teacup.

Provides a way to help you control the types of content that your computer can access on the Internet.

Click this to turn Content Advisor on and off.

[Click this to modify the Content Advisor settings.](#)

Specifies whether your name appears in the list of all the users on the server.

Introducing Microsoft Chat

Microsoft Chat is the only Internet chat program that gives you the option of conversing inside a comic strip. As with a standard chat program, you can enter a chat room on an Internet server and conduct real-time conversations with other people. But with Microsoft Chat, you can also pick a cartoon character to represent you, and your conversation appears as word balloons inside the frames of a comic strip. As a cartoon character, you can express a wide range of emotions, send "thoughts," whisper to a single recipient, and save the chat session for offline viewing.

- Send hyperlinks in your conversation—for e-mail addresses, Web pages, FTP sites, and newsgroups.
- Send and receive requests to play sounds.
- Send and receive files.
- Use another program, such as Microsoft NetMeeting, to communicate using video and audio outside the chat room with a chat room member, while also conversing in the chat room with them.
- Save or print your chat conversation for publication or offline viewing.
- Filter which chat rooms are displayed on your computer by size, content, or ratings.
- Host your own chat rooms, and control access, size, and content.

Note

- For more information on Microsoft NetMeeting, go to the [NetMeeting](#) Web site.

Getting started with Microsoft Chat

Microsoft Chat provides a place for you to talk with other people on the Internet, using either text or cartoon characters to convey your thoughts. To get started, you must have an Internet connection, which links you to a computer (that is, a server) that contains chat rooms. You follow these basic steps to enter into a chat:

- Log onto a chat server.
- Select the room you want to go to on that server.
- Start typing a chat message.

The following topics explain how you get started using cartoon characters to talk in a comic strip.

Basic setup

{button ,Jl(`,`cchat_profile') } [Provide information about yourself](#)

{button ,Jl(`,`CCHAT_SPEC_CHAR') } [Choose a character](#)

{button ,Jl(`,`CCHAT_DEF_BACK') } [Choose a comic background](#)

{button ,Jl(`,`cchat_connect_server') } [Connect to a chat server](#)

Chatting with someone

{button ,Jl(`,`cchat_find_right_room') } [Finding a chat room to join](#)

{button ,Jl(`,`cchat_change_place') } [Enter a chat room](#)

Exiting a chat room

{button ,Jl(`,`cchat_exit') } [Leave a chat room](#)

{button ,Jl(`,`cchat_save') } [Save a conversation](#)

To connect to a chat server

- 1 Establish a connection to the Internet via your modem or a local area network.
- 2 On the **Start** menu, point to **Programs**, point to **Internet Explorer**, and then click **Microsoft Chat**.
- 3 In the Chat Connection dialog box, type or select the name of the chat server in the **Server** box.
- 4 Either click **Go to chat room** and type the name of the chat room, or click **Show all available chat rooms** so you can select one.

If this is the first time you are using Chat, you should indicate your personal information, your character choice, and a comic background on the other tabs in the Chat Connection dialog box. For more information, click Related Topics below.

Note

- If Microsoft Chat is already open, you can click the **Room** menu and then click **Connect** to connect to a chat server.

{button ,AL("charspec;profile;background")} [Related Topics](#)

To provide information about yourself

- 1 On the **View** menu, click **Options**.
- 2 In the **Nickname** box, type a name you'd like to be known by.
- 3 In the **Brief description of yourself** box, type something that you'd like other people to know about you.
This information appears when other people request your profile.

Tips

- You can make it easy for others to send you e-mail or visit your World Wide Web home page by including your e-mail address and home page URL (address) in your personal information.
- For Help on an item, click  at the top of the dialog box, and then click the item.

{button ,AL("charspec ")} [Related Topics](#)

To chat using text only

- 1 On the **View** menu, click **Plain Text**.
- 2 In the text box at the bottom of the window, type what you want to say, and then click one of the buttons to the right of the text box, or press ENTER.

If you click this **Your message appears with your nickname, followed by**

Say The word "says" and your message.

Think The word "thinks" and your message.

Whisper The words "whispers to" and the other person's nickname and your message. The message is sent only to people you have selected in the list of members.

Action Your message, displayed in italics.

Play Sound Your message and the name of the sound file. Other chat members must have that sound file on their computers in order to hear it.

{button ,AL("whisperto;comictalk;sound;soundset;textfont;a-mschat-format-text")} [Related Topics](#)

To change fonts used in text-only conversations

- 1 On the **View** menu, click **Options**.
- 2 On the **Text View** tab, click **Change Font**.
- 3 In the **Choose a message type to change its font** list, click a message type.
Examples of message types and their current font settings appear in the box below the list.
- 4 Click the font and other settings that you want.

Tip

- For Help on an item, click  at the top of the dialog box, and then click the item.

{button ,AL("talk;a-mschat-format-text")} [Related Topics](#)

To choose a character

- 1 On the **View** menu, click **Options**.
- 2 Click the **Character** tab.
- 3 In the **Character** list, click the character you want. Your character appears in the **Preview** area.

Tip

- To see your character with different emotions, drag the black dot in the center of the emotion wheel to different positions.

{button ,AL("wheel;gesture")} [Related Topics](#)

To choose a comic background

- 1 On the **View** menu, click **Options**.
- 2 Click the **Background** tab.
- 3 In the **Background** list, click the background you want. The background you select appears in the **Preview** area.

Customizing comic strip text

You can change the look of the text in the comic strip balloons in a number of ways:

{button ,jl(`,`mschat_font_comic')} [Change the comic strip font](#)

{button ,jl(`,`mschat_format_text')} [Format message text](#)

{button ,jl(`,`cchat_rtf')} [Display rich text in the comic strip](#)

To change the comic strip font

- 1 On the **View** menu, click **Options**.
- 2 On the **Comics View** tab, click **Change Font**.
- 3 Click the font and other settings that you want.

Tips

- You can view formatted text (for example, bold or colored) in the comic strip by selecting the **Show rich text formatting** check box. For more information, click [Related Topics](#) below.
- For Help on an item, click  at the top of the dialog box, and then click the item.

{button ,AL("comictalk;a-cchat-rtf")} [Related Topics](#)

To format message text

► In your message, select the text you want to format, and then use one or more of the commands on the

Format menu to add these effects:

- **Color** (choose from the palette)
- **Bold**
- *Italic*
- Underline
- Fixed pitch font
- Symbol font (Σψμβολ. φοντ)

To display rich text on your computer

- 1 On the **View** menu, click **Options**.
- 2 On the **Comics View** tab, select the **Show rich text formatting** check box.

Notes

- Earlier versions of Microsoft Chat cannot display rich text.
- If the **Show rich text formatting** check box is clear, you can still send formatted text; you will just not see in it your own comic strip.

Using sounds with Chat

You may want to use sound to accent the messages you send. You cannot actually send a sound file, but rather a request to play a sound file, specifically a .wav file, located on the recipient's computer. Conversely, if someone wants to include a sound with their message to you, the sound file must already be located on your computer.

When Windows was installed on your computer, several sound files were also installed. Most Microsoft Chat room users will have a similar set of files on their computers also. When you send or receive a request for a sound, Chat is limited to the .wav files in the folder you have specified.

The following topics provide more information:

{button ,JI(`,`CCHAT_SEND_SOUNDS')} [Send sounds to other people](#)

{button ,JI(`,`CCHAT_SOUNDSET')} [Specify where sounds are located on your computer](#)

To specify where sound files are located on your computer

- 1 On the **View** menu, click **Options**.
- 2 Click the **Settings** tab.
- 3 In the **Sound search path** box, type the location on your computer where you want Microsoft Chat to look for sound (.wav) files.

You can have Chat look in more than one folder for sound files. Separate each directory with semicolons—for example, **c:\windows; c:\windows\media**.

{button ,AL("sounds")} [Related Topics](#)

Finding a chat room to join

You can find chat rooms to join on a chat server. Or, depending on your service provider, you may be able to start your own chat room. On a chat server, you can look through the room list for a chat room, or you can type the name of a specific chat room. You can even look for a specific person on the server and join them in the room they are in. And when you find a chat room you'd like to return to, you can add it to your Favorites list.

If you don't find anything you like in your current chat server, you can check other chat rooms on different servers. Or you can host your own chat room.

The following are strategies for finding a chat room:

{button ,JI(`',`CCHAT_CHANGE_PLACE')}` [Enter a chat room](#)

{button ,JI(`',`CCHAT_WHOIS')}` [Find other people](#)

{button ,JI(`',`CCHAT_ADD_FAV')}` [Add a chat room to your Favorites list](#)

{button ,JI(`',`cchat_host_yourown')}` [Host your own chat room](#)

To enter a chat room

- 1 On the **File** menu, click **New Connection**.
- 2 In the **Server** box, type or select the name of the server that contains the chat room you want to enter—for example: **comicsrv1.microsoft.com**
- 3 If you know the name of the chat room you want to go to, click **Go to chat room**, and then type the name of the chat room you want to enter. If you type the name of a chat room that does not exist, Microsoft Chat creates a new chat room with that name.

If you want to pick a chat room from the room list, click **Show all available chat rooms**. You might be able to screen out chat rooms that might contain inappropriate or offensive names or topics by selecting the **Show only registered rooms** check box. Rooms are registered by the Internet service provider or system administrator, so depending on how closely they monitor names and topics, some inappropriate material may slip through.

Tips

- To find a specific chat room by room name, type a word or a portion of a word in the **Display chat rooms that contain** box, attempting to match all or part of the room name you are looking for. If you also want to search chat room topics, select the **Also search in room topics** check box.
- ▶ You can be in more than one chat room at a time as long as the chat rooms are on the same chat server. If you want to participate in a second chat on a different server, you must open another instance of Microsoft Chat.
- ▶ For Help on an item, click
- ▶ at the top of the dialog box, and then click the item.

{button ,AL("a_cchat_find_right_room;favorite")} [Related Topics](#)

To enter a favorite chat room

- ▶ On the **Favorites** menu, click **Open Favorites**, and then double-click the room that you want to enter.

{button ,AL("a_cchat_find_right_room;change")} [Related Topics](#)

Hosting your own chat room

If you cannot find a chat room that's just right for you, it's easy to create and host your own. When you host your own chat room, you can decide the topic, control access, and limit the number of members in the chat room. You can even kick out or ban members who are disruptive or offensive.

{button ,JI(`',`cchat_create_new')}} [Create a chat room](#)

{button ,JI(`',`cchat_customize')}} [Customize your chat room](#)

{button ,JI(`',`cchat_make_admin')}} [Allow others to host your chat room](#)

{button ,JI(`',`cchat_ban')}} [Ban someone from a chat room](#)

{button ,JI(`',`cchat_kick_out')}} [Kick someone out of a room temporarily](#)

To create a chat room

- 1 On the **Room** menu, click **Create Room**.
- 2 Type a name for the chat room.
- 3 In the **Chat room topic** box, type a description of the chat topic for your room.

Note

- ▶ You automatically become the host of any room you create.

{button ,AL("a_cchat_host_yourown")} [Related Topics](#)

To customize your chat room

You must be the host of a room to customize it.

- ▶ On the **Room** menu, click **Room Properties**, and then select the room properties you want.

Tip

- ▶ For Help on an item, click
- ▶ at the top of the dialog box, and then click the item.

{button ,AL("a_cchat_host_yourown")} [Related Topics](#)

To keep everyone's backgrounds in sync

- ▶ On the **Member** menu, click **Host**, and then click **Sync Backgrounds**.

From this point on, the background in the comic strip will be the one you, the host, have chosen, overriding the individual choices of the other room members.

To send automatic greetings to new room members

- 1 On the **View** menu, click **Options**.
- 2 Click the **Automation** tab.
- 3 In the **Automatic greeting** area, select how you want to send the greeting.
 - To send the greeting only to the person entering the room, click **Whispered**.
 - To send the greeting to everyone in the room each time someone new enters, click **Said**.
- 4 In the text box, type the message you want to send.

Tips

- ▶ You can use the special text %name and %room to personalize your greeting. Microsoft Chat substitutes the person's nickname wherever it finds %name, and your room's name wherever it finds %room.
- ▶ For Help on an item, click
- ▶ at the top of the dialog box, and then click the item.

{button ,AL("customize")} [Related Topics](#)

To kick someone out of a chat room temporarily

- 1 In the list of members, select the person you want to "kick out" (remove temporarily).
- 2 On the **Member** menu, click **Host**, and then click **Kick**.
- 3 In the **Why are you kicking (nickname)** box, type the reason you are removing the person from the chat room. The reason you type will appear to other members of the room.

Notes

- ▶ "Kicking someone out" does not prevent them from re-entering the chat room. If you want to permanently ban someone, click Related Topics below.
- ▶ Only a chat room host can kick someone out of a room.

{button ,AL("a_cchat_host_yourown")} [Related Topics](#)

To ban someone from a chat room permanently

Banning someone prevents that person from re-entering the room until you "unban" them.

- 1 In the list of members, select the person you want to ban.
- 2 On the **Member** menu, click **Host**, and then click **Ban / Unban**.

Notes

- ▶ Only a chat room host can ban someone from a room.
- ▶ If everyone leaves the room and then someone creates the room again, the ban list will be clear.

{button ,AL("a_cchat_host_yourrown;a-mschat-remove-ban")} [Related Topics](#)

To remove the ban on someone

- 1 On the **Member** menu, click **Host**, and then click **Ban / Unban**.
- 2 Select the name of the banned person from the list, and click **Unban**.

To find other people

- 1 On the **Member** menu, click **User List**.
- 2 In the **Search for** area, define what you want to search for; to narrow down the search, you can type text to search for in the **Names containing** box.
- 3 Click **Update List**.

Tips

- ▶ If a person is listed in the User List dialog box, you can whisper to them, send invitations to them, or join them in their chat room—even if they are in a different chat room than you are—by clicking the appropriate button at the bottom of the dialog box.
- ▶ You can click the column headings in the User List to organize the listing alphabetically by room name or topic, or numerically by number of members in a room.
- ▶ For Help on an item, click
- ▶ at the top of the dialog box, and then click the item.

{button ,AL("a_cchat_find_right_room")} [Related Topics](#)

To get information about other people

▶ In the list of members, right-click the person you want to get information about, and then click **Get Profile**.

This information appears only on your screen.

{button ,AL("profile")} [Related Topics](#)

To chat inside a comic strip

- 1 On the **View** menu, click **Comic Strip**.
- 2 In the text box at the bottom of the window, type what you want to say, and then click one of the buttons to the right of the text box, or press ENTER.

If you click this Your message appears like this

- ▶ Say Inside a word balloon.
- ▶ Think Inside a word balloon with "thought" bubbles leading to it.
- ▶ Whisper Inside a word balloon surrounded by a dotted line. The message is sent only to people you've selected in the list of members.
- ▶ Action Inside a box across the top of the comic-strip pane. Your message begins with your nickname.
- ▶ Play Sound Inside a box across the top of the comic-strip pane. It begins with your nickname, followed by your message and the name of the sound file. Other chat members must have that sound file on their computers in order to hear it.

Tip

- ▶ If you select someone in the list of members before sending a message, Microsoft Chat poses your character to appear to be talking directly to the other character.

{button ,AL("wheel;gesture;expchange;whisper;sound;soundset;talk;comicfont") } [Related Topics](#)

To use character gestures

When you begin a sentence with these words

I	Points to himself or herself
You	Points to the other person
Hello or Hi	Waves
Bye	Waves
Welcome	Waves
Howdy	Waves

Your character does this

When your sentence contains these words

are you	Points to the other person
will you	Points to the other person
did you	Points to the other person
aren't you	Points to the other person
don't you	Points to the other person
I'm	Points to himself or herself
I will	Points to himself or herself
I'll	Points to himself or herself
I am	Points to himself or herself

Your character does this

When you type this

All capitals	Shouting
!!!	Shouting
ROTFL ("roll on the floor laughing")	Laughing
LOL ("laugh out loud")	Laughing
:) or :-)	Happy
:(or :-(Sad
;-)	Coy

Your character displays this emotion

{button ,AL("wheel;expchange")} [Related Topics](#)

To whisper to other people

- 1 In the list of members, select the people you want to whisper to. To select more than one name, press and hold down the CTRL key while you click.
- 2 In the text box at the bottom of the window, type what you want to say, and then click the **Whisper** button.
Your message appears only to the people you selected.

Tip

► You can also send whispered messages by using the **Whisper Box**. This enables you to keep track of several whispered conversations at the same time. For more information, click [Related Topics](#) below.

{button ,AL("a_cchat_meet_beyond")} [Related Topics](#)

To send sounds to other people

- 1 Click the **Play Sound** button at the bottom of the Microsoft Chat window.
- 2 In the **Sound file to play** list, click the sound file you want other people to hear.
- 3 In the **Accompanying message** box, type a message to send with the sound you selected.

Notes

- ▶ To hear your sound before you send it, click **Test**.
- ▶ Other people can hear sound files only if the files are already on their computers. For more information, click Related Topics below.

{button ,AL("sounds")} [Related Topics](#)

To leave a chat room

- ▶ On the **Room** menu, click **Leave Room**.

After you leave a room, you are still connected to the chat server.

To save a conversation

- 1 On the **File** menu, click **Save**.
- 2 Double-click the folder you want to save the conversation in.
- 3 In the **File name** box, type a name for the conversation, and then click **Save**.

Tips

- ▶ When you are in Plain Text view, you can save a conversation as an .rtf (Rich Text Format) file. All character formatting is saved, including font, color, size, and style.
- ▶ By saving conversation files offline, you can view and print chat-room sessions and share them with your friends.

To send e-mail to a chat room member

► In the list of members, right-click the person you want to send an e-mail message to, and then click **Send E-mail**.

{button ,AL("a_cchat_meet_beyond")} [Related Topics](#)

To send a file to a chat room member

- 1 In the list of members, right-click the person you want to send a file to, and then click **Send File**.
- 2 Specify the file you want to send.

Notes

- ▶ File transfer may not work across some corporate “firewalls.” If you have difficulty sending files, consult your system administrator.
- ▶ You can set Microsoft Chat to refuse all incoming file transfer requests. For more information, click Related Topics below.

{button ,AL("cchat_dcc_refuse;a_cchat_meet_beyond")} [Related Topics](#)

To place a NetMeeting call to a chat room member

▶ In the list of members, right-click the person you want to place a Microsoft NetMeeting call to, and then click **NetMeeting**.

Currently, placing a NetMeeting call to a chat room member is possible only if you both are using Microsoft Chat version 2.0 or higher.

Notes

- ▶ Both you and the person you are placing the call to must have NetMeeting installed.
- ▶ You can set Microsoft Chat to ignore incoming NetMeeting calls. For more information, click [Related Topics](#) below.

{button ,AL("a_cchat_ignore_netmeeting_call;a_cchat_meet_beyond")} [Related Topics](#)

To view the Web page of a chat room member

- ▶ In the list of members, right-click the person, and then click **Visit Home Page**.

{button ,AL("a_cchat_meet_beyond")} [Related Topics](#)

To send a link in a message

► In the text box at the bottom of the window, type what you want to say, using the appropriate syntax for the type of link.

To link to a Web page, type **http://website** where *website* represents the URL (address) of the Web page.

To link to an FTP site, type **ftp://ftpaddress** where *ftpaddress* represents the URL (address) of the FTP site.

To link to a newsgroup, type **news: newsgroup** where *newsgroup* represents the name of the newsgroup.

To send a link to a new mail message, type **mailto:someone@company.com** where *someone@company.com* represents the e-mail address of the person the message is to be sent to.

To have multiple whispered conversations

You can have multiple whispered conversations with members in your chat room and with other people on the chat server.

▶ To whisper separately to several people in your chat room, in the list of members, right-click the name of a person, and then click **Whisper Box**. Repeat for each person you want to whisper to.

If you want to have a single whispered conversation with several members at the same time, select each member, type your message, and then click the **Whisper** button to the right of the text box at the bottom of the window.

▶ To whisper to someone on the chat server, in the **User List**, click that person's nickname, and then click the **Whisper Box** button.

Tip

▶ In the Whisper Box, you can easily switch between whispered conversations by clicking the name of the person you want to whisper to.

To create a message macro

You can use macros to send the same message many times without retyping it each time—for example, "Where are you from?"

- 1 On the **View** menu, click **Options**.
- 2 Click the **Automation** tab.
- 3 In the **Key combination** list, select the key combination you want to use to run the macro.
- 4 In the **Name** box, type a name for the macro.
- 5 In the **Macros** box, type the message you want to send.

{button ,AL("keyboard")} [Related Topics](#)

To send a cartoon character expression without talking

- 1 In the emotion wheel, drag the black dot to an emotion.
- 2 Right-click the emotion, and then click **Send Expression**.
The expression appears in the most recent comic strip pane.

{button ,AL("wheel;gesture")} [Related Topics](#)

To ignore a person

- ▶ In the list of members, right-click the person you want to ignore, and then click **Ignore**.
You will no longer see messages from this person. Other members of the chat room will still continue to see them.

{button ,AL("whisperto")} [Related Topics](#)

To invite others into a chat room

- 1 On the **Member** menu, click **Invite**.
- 2 Type the nicknames of people you want to invite into the chat room.

Tip

- ▶ To invite more than one person at a time, type a comma (,) between nicknames.

{button ,AL("a_cchat_host_yourown")} [Related Topics](#)

To add a chat room to your Favorites list

- ▶ While in the chat room, click the **Favorites** menu, and then click **Add to Favorites**.

{button ,AL("a_cchat_find_right_room")} [Related Topics](#)

To read conversation files offline

- 1 On the **File** menu, click **Open**.
- 2 Double-click the conversation file that you want to read offline.

Note

- ▶ You can only read previously saved conversation files.

To define the size of the comic strip

- 1 On the **View** menu, click **Options**.
- 2 Click the **Comics View** tab.
- 3 In the **Page layout** list, click the number of comic strip panels you want to display across the window.

To change a character's emotion

▶ Drag the black dot in the center of the emotion wheel around the wheel. The closer to the edge of the wheel you move the dot, the stronger the emotion.

You can choose eight different emotions for your character:

Shouting	Angry
Happy	Laughing
Bored	Scared
Sad	Coy

The pane above the emotion wheel displays your character's current emotion.

Tip

▶ Not all characters can display the full range of emotions.

{button ,AL("expchange;a-mschat-freeze-emotion;gesture")} [Related Topics](#)

To freeze a character's emotion

▶ Right-click your character in the self-view pane and then click **Frozen**. The expression will not change until you click **Frozen** again or drag the black dot in the emotion wheel to a different location, at which time this new emotion is frozen.

Freezing an emotion is useful if you want to lock one of several neutral expressions (if your character has more than one), or avoid the default expressions associated with various grammatical structures (click [Related Topics](#)).

{button ,AL("gesture")} [Related Topics](#)

To allow others to host your chat room

- 1 In the list of members, select the person you want to make a host.
- 2 On the **Member** menu, click **Host**, and then click **Host**.

Notes

- ▶ Only a chat room host can select other people to become hosts.
- ▶ A chat room can have any number of hosts; all of these hosts are then able to change room properties.

{button ,AL("a_cchat_host_yourown")} [Related Topics](#)

To ignore incoming NetMeeting calls

- 1 On the **View** menu, click **Options**.
- 2 On the **Settings** tab, make sure the **Receive NetMeeting Calls** check box is clear.

{button ,AL("a_cchat_place_netmeeting_call")} [Related Topics](#)

To refuse all incoming file transfer requests

- 1 On the **View** menu, click **Options**.
- 2 On the **Settings** tab, make sure the **Receive file transfer requests** check box is clear.

{button ,AL("a_cchat_dcc")} [Related Topics](#)

To track activity in multiple chat rooms

- ▶ Take note of a color change in a room's tab in the main window.

If you have several open chat rooms that overlap, you can see when there is activity in a room because the color of the room name on the tab will change.

To notify others when you are away

- 1 On the **Member** menu, click **Away from Keyboard**.
- 2 Type the message you want to publish to members currently in the room and to new members when they enter the room.

A coffee-cup icon now appears next to your name in the list of members.

Note

- ▶ Repeat the procedure above to notify members of your return to the chat room.

To ignore a person sending floods of messages

- 1 On the **View** menu, click **Options**.
- 2 On the **Automation** tab, select the **Auto ignore enabled** check box to ignore a person who is sending a flood of messages to you.
- 3 Define what you want to constitute a “flood” by setting the **Message Count** and **Interval** dials.
