

Welcome to your PS CD-ROM.

We are the PowerSource CD production group and we will bring you the finest in international, interactive CDs. We have complete production studios for art, design, audio and video, sound and music, and are writers, artists, graphic designers, musicians, and authors. We currently work in seven languages and plan on adding others as you request them. We are the only CD producer with an MPEG system on disk that does not require additional hardware to enable your viewing of full motion interactive movies.

We are actively soliciting your ideas, suggestions and/or data for future productions and collections. You bring the data and we will produce the CD; we do it all. Any additional CD production services, as needed, are available.

Please write or fax to us at:
PS CD-ROMS
10032 San Pablo Avenue
El Cerrito, California 94530, USA
Fax: (510) 527-3823
