## END USER LICENSE AGREEMENT PhotoDisc Product License

Please refer to the printed End User License Agreement which came inside your product packaging. Because we are always reviewing our agreements to ensure that your needs are served, that agreement may grant you additional rights not stated below.

THIS IS A LEGAL AGREEMENT BETWEEN YOU AND PHOTODISC, INC. (PhotoDisc). BY OPENING THIS PACKAGE YOU AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT. IF YOU DO NOT AGREE, PROMPTLY RETURN THE CD-ROM AND ALL ACCOMPANYING MATERIALS IN THE ORIGINAL CARTON FOR A FULL REFUND.

### GRANT OF LICENSE

PhotoDisc grants you a personal, nontransferable, nonexclusive, nonsublicensable right to use the PhotoDisc images on this disc and any derivatives or copies (collectively, the "Images") on one computer and with one user at a time. The Images may be used: in materials for PERSONAL, INTERNAL, COMPANY and TEST or SAMPLE use, including COMPS (i.e., rough or draft layouts for client review) and for BROWSING, in ADVERTISING and PROMOTIONAL MATERIALS, in ANY ONLINE or other ELECTRONIC DISTRIBUTION SYSTEM (including in your web page design) and in BROADCASTS, and in ANY PRODUCT except printed books, or music CD, album, cassette tape or software packaging, or any for-sale product produced in quantities larger than 100,000 units. (For information on how to license images for these restricted uses, please see "Additional Rights Available" below.)

The Images may not be sublicensed or made available for use or distribution separately or detached from your product or web page. For example, you may use the Images as an

integral part of your web page design, but you may not make the Images available for downloading separately or in formats designed or intended for permanent storage or re-use by web site users. Similarly, you may provide your clients with copies of the Images (including digital files) as an integral part of your work product, but may not permit them to use the Images separately. If your client wishes to use an Image separately, either you on behalf of your client or your client must license that Image for your client's separate use, either through our web site at [www.photodisc.com](http://www.photodisc.com) or by calling 1-800-528-3472 (U.S.A.) or 206-441-9355.

Except as specifically provided above, you may not copy this disc. Pornographic, defamatory, libelous or otherwise unlawful use of the Images is prohibited.

## ADDITIONAL RIGHTS AVAILABLE

If you are unsure of your rights under this agreement or would like to use an Image in a printed book, or in music CD, album, cassette tape or software packaging, or in any for-sale product produced in quantities larger than 100,000 units, please contact PhotoDisc at either of the telephone numbers listed above, or at [license@photodisc.com](mailto:license@photodisc.com) for more information.

## WARRANTIES

PhotoDisc warrants this disc to be free from defects in material and workmanship for 90 days from delivery. Your sole and exclusive remedy for a breach of this warranty is the replacement of the disc or refund of the purchase price, at PhotoDisc's option. PHOTODISC MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING, WITHOUT

LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some states do not permit the exclusion of implied warranties, and you may have other rights which may vary from state to state, NEITHER PHOTODISC NOR ITS LICENSORS SHALL BE LIABLE TO YOU FOR ANY GENERAL, SPECIAL, DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, OR OTHER DAMAGES ARISING OUT OF THE LICENSE OF THE IMAGES OR OTHERWISE.

## GENERAL

All rights to this disc and the Images are owned by PhotoDisc and its licensors and are protected by United States copyright laws, international treaty provisions and other applicable laws. PhotoDisc and its licensors retain all rights not expressly granted by this agreement. This disc is licensed only to you and may not be transferred without the prior written consent of PhotoDisc. The license contained in this agreement will terminate automatically without notice from PhotoDisc if you fail to comply with any provision of this agreement. Upon termination, you must immediately (i) stop using the disc and the Images, (ii) return the disc and all copies of it to PhotoDisc, and (iii) delete the Images and all copies from all magnetic media and destroy all other copies of the Images, or upon request of PhotoDisc, return all such copies to PhotoDisc. Your use of the Images must be in compliance with all applicable law, including, but not limited to, laws and regulations relating to currency and the law of moral rights. This disc and the Images are "Restricted Computer Software." Use, duplication, or disclosure by the U.S. Government is subject to restrictions as set forth in this agreement and as provided in DFARS 227.7202-1(a), and 227.7202-3(a) (1995), DFARS 252.227.7013 (OCT 1988), FAR 12.212(a) (1995), FAR 52.227-19, or FAR 52-227-14, as applicable.

## Keyword Strategy

### Get the most out of your keyword search...

PhotoDisc keywording is a simple, intuitive and accurate way to find photographs by using logical descriptive terms. We've even included abstract issues—such as focus, orientation, vertical or horizontal, etc. — in our keywording process.

### Some tips for quick success

- **Use singular words.** However, words commonly known in their plural form (e.g., "fireworks," "chopsticks," "rapids") should be used in their plural form.
- **Use lowercase letters.** Use capital letters only for proper nouns or names.
- **Don't use punctuation.** When searching for hyphenated words, try the word with or without a space (e.g., "x ray" or "xray").
- **Use gerunds (words ending with "ing") to describe activities.** Try words such as "shopping," "running" and "playing."
- **Try more than one word.** You'll increase your number of hits if you say "highway," "free-way" or "road." Be specific and you'll narrow the field quickly; for instance, say "Chicago" and "skyline" rather than just "skyline." (Note: Sometimes a keyword may show up as parts of other words: e.g. "man" may also come up in "Roman", "woman" and "management.")
- **Describe types of people.** Race, gender and age are included in every image depicting

GLOSSARY

people. For images with only one person, words such as *child, woman, man* are included. For groups, use words such as *children, women, men*. Age categories include: *baby, toddler, child, teen, adult, elderly*.

- **Search by color and perspective, too.** Primary colors used in the images are listed in the keywords. Perspectives are defined as: *overhead, below, closeup, detail, aerial*.
- **Look for specific orientation of subject.** Type *center, right or left*.
- **Keywording is an evolving strategy.** Our goal is to be consistent and make it as easy as possible for you to find the images you need.

GLOSSARY

## Clipping Paths!

In an effort to reduce your workload, PhotoDisc OBJECT SERIES images include clipping paths. What is a clipping path, you ask? Well...

Simply put, a clipping path is a carefully crafted outline around an object that allows you to “mask” the object and separate it from its background. This feature is particularly useful for dropping images into white space or onto a background image. Each image in the Object Series has a custom path embedded into all resolutions found on the disc.

A clipping path renders the smoothest edge definition possible around your object, constrained only by the resolution of your output device. Although the clipping path allows for extremely smooth masking, the quality of the masked edge still ultimately depends on the output device used. A masked object sent to a 3600 dpi imagesetter has a much cleaner defined edge than if it were printed on a 600 dpi laser printer.

To use the clipping path, first open the image in Photoshop. (Note: You must use version 3.0 or newer to use the imbedded paths in the JPEG format.) In Version 3.0 “Show Paths” can be found in the “Palettes” submenu under the Window menu. The name of the path, OUTLINE, will then be visible in the paths palette. Click on the “OUTLINE” path and the path will appear superimposed on the opened image. Next, in the paths palette use the triangle pull-down menu to select the “Clipping Path” option. Then select OUTLINE in the path pop-up menu and click OK. Your clipping path has now been activated.

Within the “Clipping Path” submenu, we have established an appropriate flatness option for each object. The flatness option allows you to specify how smooth the outline will be

# Features & Tips

QUICK START

LICENSING

FEATURES  
& TIPS

ONLINE

CD-ROM  
PRODUCTS

CONTACT US

GLOSSARY

rendered when processed for output. The lower the value, the smoother the edge of the outlined image. A blank setting instructs the output device to render the smoothest path possible. However, in complex documents a blank setting may cause PostScript errors on your output device. A slightly higher flatness setting may be required to print your image. Typically, a flatness setting of 3 to 5 is adequate. Most images can be set to a flatness of 5 to 8 without visible degradation of path quality. We have left the setting flatness blank to allow your output device to render the smoothest edge possible.

**As a final step you must save your image as an Encapsulated PostScript (EPS) file** onto your hard drive. The resultant EPS file can then be imported into any popular page layout or high-end drawing program.

You may also use the supplied path to create drop shadows and glow effects behind your image. These techniques are explained in depth in many of the third-party books that discuss techniques for enhancing images with Photoshop. We hope the supplied paths will save you many hours of tedious work and increase your creative options when using these images. Enjoy!

## Online!

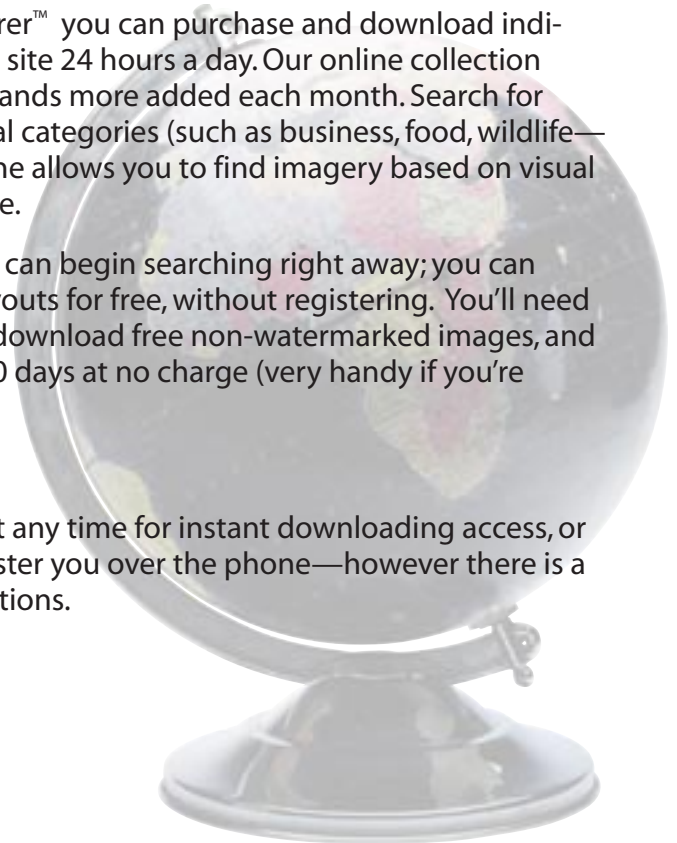

**[www.photodisc.com](http://www.photodisc.com)**

With Netscape Navigator™ or Internet Explorer™ you can purchase and download individual images directly from PhotoDisc's web site 24 hours a day. Our online collection boasts more than 50,000 images, with thousands more added each month. Search for images by using specific keywords or general categories (such as business, food, wildlife—you get the idea). Our Visual Matching Engine allows you to find imagery based on visual cues such as color, composition and structure.

Once you arrive at [www.photodisc.com](http://www.photodisc.com), you can begin searching right away; you can download comping images for preliminary layouts for free, without registering. You'll need to register, however, to purchase images, to download free non-watermarked images, and to re-download any purchased images for 90 days at no charge (very handy if you're interrupted during a download).

### About Registration

Registration is free. You can register online at any time for instant downloading access, or you can call 1 800 528 3472 and we can register you over the phone—however there is a 24-hour activation period for phone registrations.

## PhotoDisc's web site at a glance

- **Registered customers can get comping images for free:** Download any comping image (at 150K) for a closer look or to use in layouts. (These free comping images are not legal for web or onscreen use; a basic license must be purchased first.)
- **Buy licenses for individual images:** Purchase and download single images (600K or 10MB file size) directly from the web site.
- **Easy searching tools:** Keyword searching makes it easy to find the perfect image; our Visual Matching Engine offers an intuitive mechanism based on visual cues, such as color, composition, texture and structure.
- **Browse by CD-ROM title using Adobe Acrobat® PDF catalogs in the Image Collection section.**
- **Tips and tricks:** See our *Design Mind* section for features, examples and tips from top designers.
- **Photographer news:** In our *In the Loupe* section, read profiles on our photographers and preview their newest work.

# CD-ROM Products

PhotoDisc™ brings you thousands of high quality images, grouped thematically into six product lines:

**BACKGROUND SERIES** ▶ From sculpted metal to hand paintings. Versatile and aesthetic.

**FINE ART SERIES** ▶ Some of the best-known American and European fine art.

**OBJECT SERIES** ▶ From the essential to the quirky: transparent backgrounds and clipping paths offer great versatility.

**SIGNATURE SERIES** ▶ Evocative and beautiful. Each features the work of one photographer

**VOLUMES** ▶ Includes themes such as business, sports, food and travel.

**ANIMATION SERIES** ▶ Images come alive with motion and sound. Debut discs include *Metaphorically Blinking* and *Everyday Objects Live*.

See the entire PhotoDisc collection online at [www.photodisc.com](http://www.photodisc.com). (**ONLINE INFORMATION** ▶)

## The Background Series

Sculpted metal, hand paintings, magical plays of light and shadow—these are backgrounds that set the scene, ready for layering, typography and your ingenuity. Each disc features 100 backgrounds created by one artist or studio. As an added bonus, PhotoDisc has included tiling capabilities for additional seamless backgrounds.

### **BS14 Earth in Focus** *by InterNetwork Media*

Remote sensing technology from satellites captures some of the most captivating views of Earth ever documented.

### **BS13 Natural Patterns** *by Kaz Chiba*

Sand, kelp, conch, leaf veins—each detail a discovery. Chiba traveled the globe to document patterns of the natural world.

### **BS12 Museum Finishes** *by Joe Ginsberg*

An elegant, etched, marbled, muted, swirled, smooth, telling, timeless collection from a New York-based painter and set builder.

### **BS11 Studio Backdrops** *by Arthur S. Aubry*

Infinitely useful backdrops—draped fabric, taut surfaces, silk-drenched walls. From rich solids to funky prints.

## The Fine Art Series

A brushstroke of genius. Spectacular creations from the masters of European and American art in a digital format. Tour a magnificent collection assembled from such venerable showcases as the Louvre, the Uffizi Gallery and the British Museum. Each image is given the respect it's due: we don't crop edges and the color is exactly as it looks in the original. The result? A gallery of images so real you'll feel as if you're standing behind red velvet ropes.

### FA08 Business and Industry Illustrated

Highlights of America's industrial growth spurt are captured here through original, vintage illustrations.

### FA07 Storybook Children

Illustrations pulled from the pages of time, spanning centuries and continents with universal myths and memories.

### FA06 Religious Illustrations

Includes Christians, Buddhists, Moslems and Jews—and their evolving visions of virtue.

### FA05 Myths and Legends

Memorable legends, all beautifully rendered in oil and line drawings.

## FA04 American Fine Art and Illustration

PhotoDisc scanned original turn-of-the-century watercolors, illustrations and etchings for this disc. They feature “modern” people, from well-to-do ladies in a Model T to pioneering trappers on horseback.

## FA03 Antique Maps and Heraldic Images

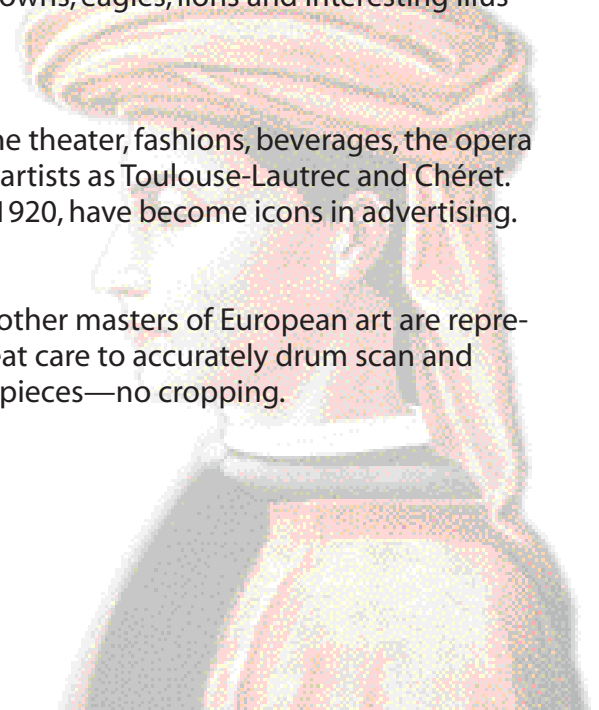

From the 1500s to the early 1800s come these incredibly detailed maps. Equally intricate are the heraldic images, adorned with shields, crowns, eagles, lions and interesting illustrated textures.

## FA02 European Posters

You’re likely to recognize illustrations used for the theater, fashions, beverages, the opera and many other temptations of the day by such artists as Toulouse-Lautrec and Chéret. These colorful, bold designs from Europe, 1880-1920, have become icons in advertising.

## FA01 European Paintings

Leonardo da Vinci, Botticelli, Raphael and many other masters of European art are represented in all their magnificence. We’ve taken great care to accurately drum scan and correct for any color migration. You’ll see entire pieces—no cropping.

## The Signature Series

PhotoDisc presents an evocative, astoundingly pure collection of images as individual as the signatures of the professionals who captured them. Each disc contains the work of one carefully selected photographer or studio whose work projects powerful moods. These images are strong enough to carry a cover concept, yet subtle and versatile enough to serve as rich backdrops. The aesthetic quality of the Signature Series sets PhotoDisc apart.

### **SS20 Form and Figure** *by Suza Scalora*

More than studies in anatomy, these images are rich human allegories, capturing what it means to be comfortable in one's own skin.

### **SS19 International Eye** *by Mark Downey*

International scenes documenting contemporary life with intimacy, intensity, poignancy—a California child, a Thai farmer, the Taj Mahal—connecting the viewer with a larger world.

### **SS18 Technology Perspectives** *by Steve Cole*

A visual collection highlighting the basic beauty of 20th-century gadgetry, from paperclips to network cables. Science and technology whittled to an elemental simplicity.

### **SS17 Everyday Twosomes** *by Barbara Penoyar*

The connections are clear: best friends, siblings, lovers, even business partners—images that celebrate the ties that bind.

### **SS16 Everyday People** *by Barbara Penoyar*

Features cultures, faces, ages and feelings as diverse as the products you design.

## PhotoDisc™ Volumes

Here they are. The tried-and-true cadre of original, award-winning discs that belong in every collection. Timeless, powerful, eminently useful images you can use to punctuate your designs or build an entire concept. All impeccably scanned for the ultimate in quality. Some of our newest releases:

### Volume 42 Everyday Living

People and lifestyles images focusing on those single magic moments that add up to a lifetime of rich memories.

### Volume 41 Education 2

Spanning infancy through college, including continuing education, images depict diverse education issues and perspectives.

### Volume 40 Health and Medicine 2

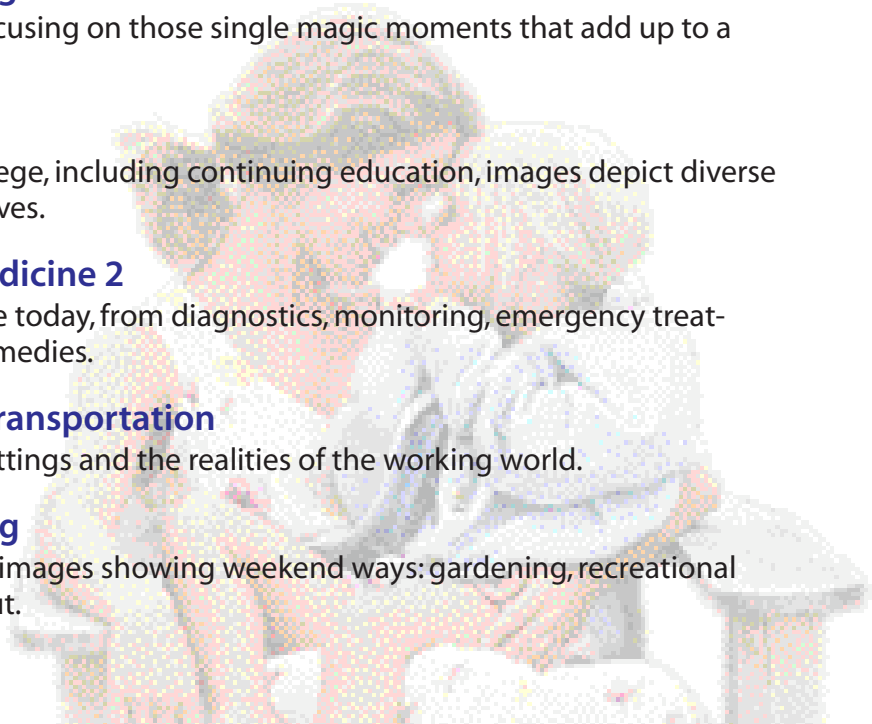

Depicts the reality of healthcare today, from diagnostics, monitoring, emergency treatment and surgery to natural remedies.

### Volume 39 Industry and Transportation

Construction sites, industrial settings and the realities of the working world.

### Volume 38 Weekend Living

Spirited, passionate, fun-loving images showing weekend ways: gardening, recreational sports, relaxing and hanging out.

GLOSSARY

## Volume 37 Beyond Retro

Our newest retro disc, featuring funny, kitschy and authentic images from an ad agency's 1950s archives.

## Volume 36 Nature Scenes

From elemental details to sweeping landscapes: inspiring images of our natural world.

## Volume 35 Business Today

All-new photos illustrating how people really work today. Shot with diverse models and office situations.

## Volume 34 Spacescapes

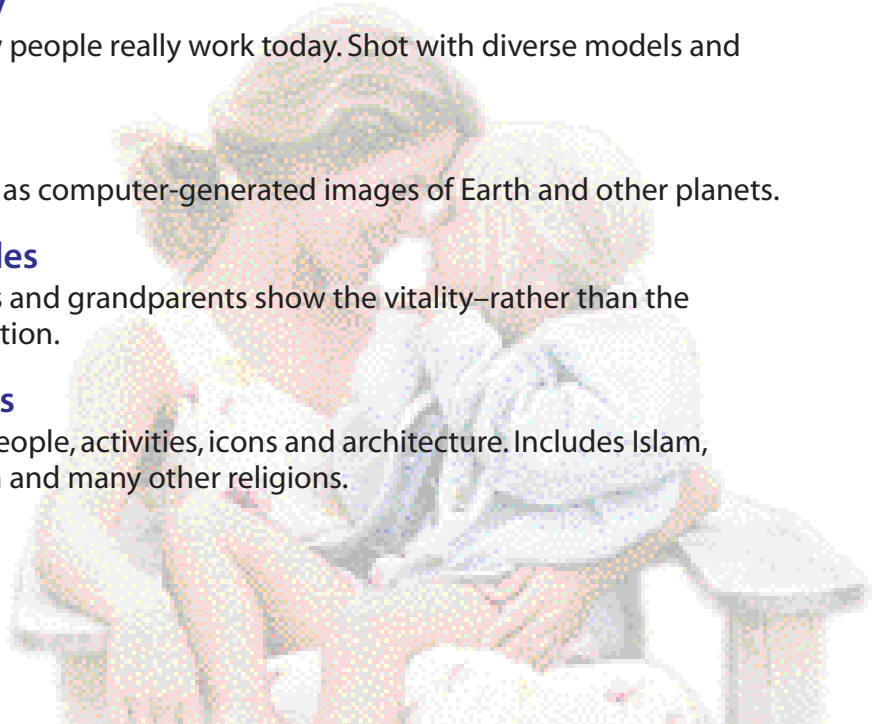

Images shot from space as well as computer-generated images of Earth and other planets.

## Volume 33 Mature Lifestyles

Active retirees, business leaders and grandparents show the vitality—rather than the stereotypes—of an older generation.

## Volume 32 World Religions

Spirituality reflected through people, activities, icons and architecture. Includes Islam, Judaism, Christianity, Buddhism and many other religions.

## GLOSSARY

**Bitmap image** - An image with 1 bit of color information per pixel, also known as a bitmapped image. The only colors displayed in a bitmap image are black and white.

**Brightness** - One of three dimensions of color; the other two are hue and saturation. The term is used to describe differences in the intensity of light reflected from or transmitted through an image independent of its hue and saturation.

**CMYK** - The four process colors used in printing: cyan, magenta, yellow and black.

**CMYK** - A four-channel image containing a cyan, magenta, yellow and black channel. A CMYK image is generally used to print a color separation.

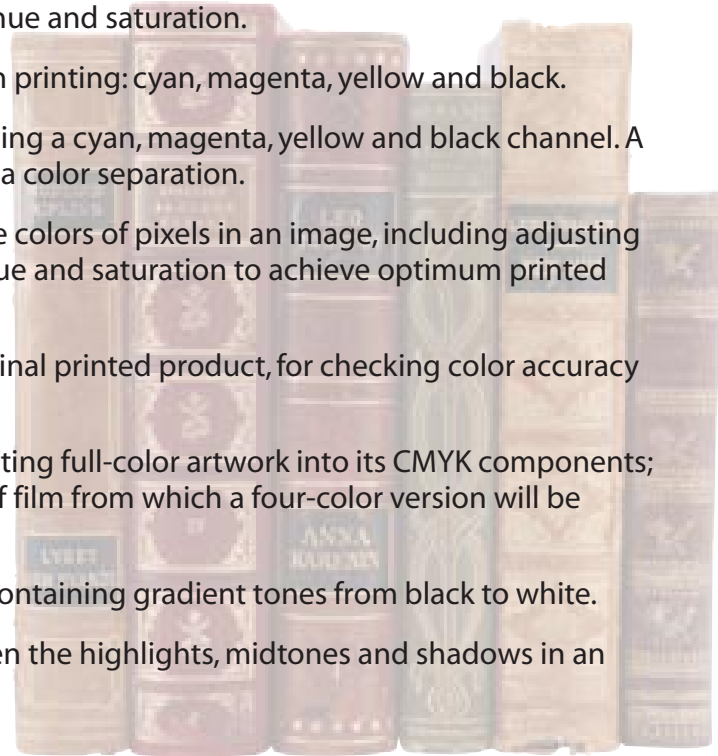

**Color correction** - The changing of the colors of pixels in an image, including adjusting brightness, contrast, mid-level grays, hue and saturation to achieve optimum printed results.

**Color proof** - A representation of the final printed product, for checking color accuracy and other elements.

**Color separation** - The process of splitting full-color artwork into its CMYK components; one or all four of the separate pieces of film from which a four-color version will be printed.

**Continuous-tone image** - An image containing gradient tones from black to white.

**Contrast** - The tonal gradation between the highlights, midtones and shadows in an

GLOSSARY

image.

**DCS (desktop color separation)** - A file format that creates four color separations.

**DPI (dots per inch)** - A measure of image resolution.

**Four-color process printing** - The basic method of recreating a broad spectrum of colors on a printing press.

**Grayscale image** - An image consisting of up to 256 levels of gray, with 8 bits of color data per pixel.

**Halftone** - The reproduction of a continuous-tone image, made by using a screen that breaks the image into various size dots.

**Highlight** - The lightest part of an image, represented in a halftone by the smallest dots, or the absence of dots.

**Hue** - The main attribute of a color that distinguishes it from other colors.

**Image resolution** - The amount of data stored in an image file, measured in pixels per inch (ppi).

**JPEG (Joint Photographic Experts Group)** - This group established a standard method for compressing and decompressing digitized photos or images. The high-resolution images provided by PhotoDisc are compressed according to JPEG standards.

**LPI (lines per inch)** - A measure of resolution, usually screen frequency in halftones.

GLOSSARY

**Luminance lightness** - The highest of the individual RGB values plus the lowest of the individual RGB values, divided by two; a component of a Hue-Saturation-Brightness image.

**Midtone** - Tonal value of dot, located approximately halfway between the highlight value and the shadow value.

**Moire pattern** - An undesirable pattern in color printing, resulting from incorrect screen angles of overprinting halftones. Moire patterns can be minimized with the use of proper screen angles.

**Pixel** - A single dot on a computer display or in a digital image.

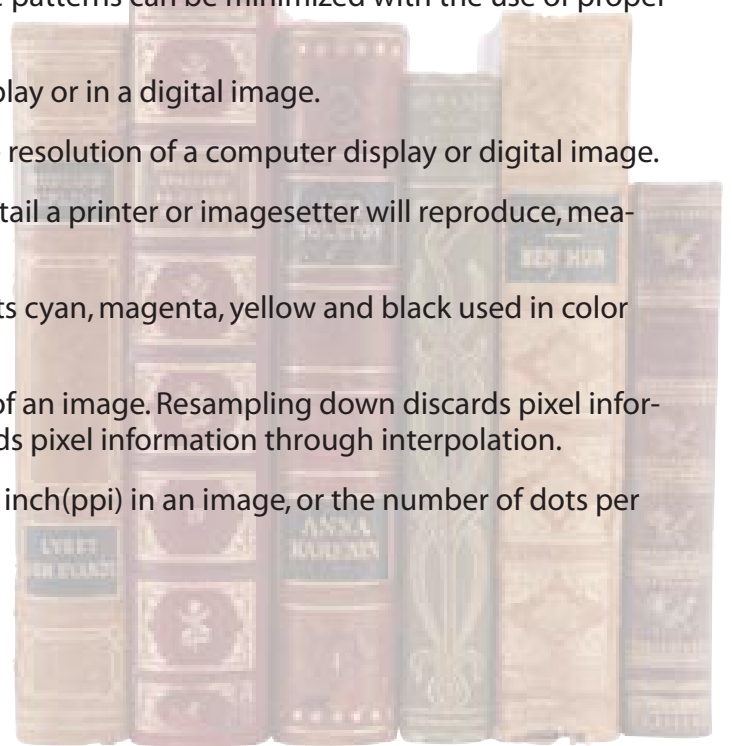

**PICT** - Pixels per inch, a measure of the resolution of a computer display or digital image.

**Printer resolution** - The amount of detail a printer or imagesetter will reproduce, measured in dots per inch (dpi).

**Process color** - The four color pigments cyan, magenta, yellow and black used in color printing.

**Resample** - To change the resolution of an image. Resampling down discards pixel information in an image; resampling up adds pixel information through interpolation.

**Resolution** - The number of pixels per inch (ppi) in an image, or the number of dots per inch (dpi) used by an output device.

GLOSSARY

**RGB** - Red, green and blue, the additive primaries; RGB is the basic additive color model used for color video display, as on a computer monitor.

**Saturation** - The amount of gray in a color. More gray in a color means lower saturation; less gray in a color means higher saturation.

**Screen angle** - The angle at which the halftone screens are placed in relation to one another.

**Screen frequency** - The density of dots on the halftone screen, commonly measured in lines per inch (lpi). Also known as screen ruling.

**Shadow** - The darkest part of an image, represented in a halftone by the largest dots.

**Thumbnails** - Miniature pictures, resembling slides, that the LightBox catalog displays. Each thumbnail contains specific information for each image that comes from PhotoDisc.

**TIFF (tagged image file format)** - a file format for exchanging bitmapped and grayscale images among applications.
