Demodex

1.1 The demos on Aminet

```
                            The demos on Aminet CD 11

This time we have a *lot* of great demos on the CD:

        Best demos
     The top demos on this CD, ready to run

        Good demos
     The good demos on this CD, ready to run

     Compatible demos
     The remaining demos that work on an A4000/040

      Other demos
     The demos that cannot be run directly

       Huge demos
     The demos that need special treatment

Make sure you have no unsaved work in memory when starting demos, they
may crash or alter your system configuration. Also, many demos force you
to reboot. The
           BootTool
           can automatically bring up a list of demos you
haven't seen yet at every startup.

And here's the complete list of demos. Some don't work on accelerated
Amigas, others need to be installed, and some are just data files for
other demos.

   demo/40k     40K intros
   demo/aga     Demos requiring AGA chipset
   demo/disk    Demos on diskettes
   demo/euro    Euro demos in file form
   demo/file    Single file demos
   demo/intro   Intros
   demo/mag     Demo coder magazines
```

```
   demo/mega    Euro demos requiring floppies
   demo/slide   Image oriented demos
   demo/sound   Sound oriented demos
   demo/tp95    Demos from The Party 95

     search    for demos on this CD
```

1.2 The Boot Tool

```
                            The Boot Tool
```

Don't you hate demos that have no exit, thereby forcing you to reboot after
every demo viewed? Well, I can't change those demos, but I can make the
rebooting as painless as possible.

If you drag the program 'BootTool' from the Tools drawer to your WBStartup
drawer (OS 2.0 and up), you'll be seeing the list of no-exit demos at
every startup. You can click any of those demos to run it. After the
reboot, that demo and all that were above it will be removed from the
list automatically.

If you want to show all demos again, clock 'Show All' at the bottom of
the list and reboot. If you want to stop viewing demos, click 'Uninstall'
at the bottom of the list. You can, however, drag the BootTool to the
WBStartup drawer again and continue from where you left off.

```
     Install    BootTool in your WBStartup drawer
  Run BootTool  for a first go
```

1.3 Best demos on this CD

These are the best demos on this CD, tested on an Amiga 4000/040.

```
ax_head.lha         demo/40k    26K   7 Axis 'Headcase', 2nd placed 40k-intro at  ←
   ThE ParTy
str_gale_mix.lha    demo/aga   1.1M   4 Galerie Re-Mix 1/1 *AGA* (Released at Juhla ←
   '96)
S_fIVE.lha          demo/aga   632K   6 Sonik clique: 5th anniversary intro.
tbl_spe.lha         demo/aga   962K   3 'Spectral' by TBL. Feb'96.
dw__main.lha        demo/tp95  214K   7 DATAWORLD - Main files (important!)
Essence_CrazyS.lha  demo/tp95  754K   6 Crazy Sexy Cool 1/1 *AGA* (5th place demo  ←

1.7 Huge Demos

These are two very big demos on Aminet CD 11. The first you've already
seen in the list of best demos: The UnderWorld demo from The Party 95.

It needs to be started from a harddisk, where you need to have 14M of
free space. To extract it to there, use the following steps:
 1. Click on tp5_dld.lha
 2. In the upcoming window, type a partition name or directory in the
    string requester and press RETURN. Decompression takes a while.
 3. Check the indicated path from the Workbench, you'll see a directory
    called 'UnderWorld', and inside a program called UnderWorld. Start
    it. Enjoy. Note: This demo expects a PAL Amiga, patch your system
    accordingly.
 4. After completion (or after reboot) you can remove the UnderWorld
    directory. Unless you have plenty of spare HD space.

tp5_dld.lha   demo/tp95 9.2M   3 Under World 1/1 *AGA* (5th in the WiLD ←
    compo at Th

 Now if you thought that a 14M demo was big, how about a 76M one? Try
 this one if you have that space. I've written a small frontend for it
 that takes care of extracting everything to harddisk. You need AGA
 and at least 4M of RAM. Indicate an existing directory to extract to
 (for example a partition name), see the demo (it is started automatically)
 and delete it yourself when appropriate. Before you start unpacking,
 disable your screen blanker since it inteferes with the demo.

dw__main.lha   demo/tp95 214K   8 DATAWORLD - Main files (important!)

 Enjoy...
