1.1 The demos on Aminet

                              The demos on Aminet CD 13

            Best demos
          The top demos on this CD, ready to run

            Good demos
          The good demos on this CD, ready to run

          Compatible demos
          The remaining demos that work on an A4000/040

            Other demos
          The demos that cannot be run directly

Make sure you have no unsaved work in memory when starting demos, they
may crash or alter your system configuration. Also, many demos force you
to reboot. The
              BootTool
              can automatically bring up a list of demos you
haven't seen yet at every startup.

And here's the complete list of demos. Some don't work on accelerated
Amigas, others need to be installed, and some are just data files for
other demos.

```
  demo/40k     40K intros
  demo/aga     Demos requiring AGA chipset
  demo/disk    Demos on diskettes
  demo/ecs     Demos for the ECS chip set
  demo/file    Single file demos
  demo/intro   Intros
  demo/mag     Demo coder magazines
  demo/slide   Image oriented demos
  demo/sound   Sound oriented demos
  demo/sp96    Saturne Party 1996 demos
  demo/tg96    The Gathering 1996 demos
  demo/tp95    Demos from The Party 95
```

```
    search    for demos on this CD
```

1.2 The Boot Tool

```
                        The Boot Tool
```

Don't you hate demos that have no exit, thereby forcing you to reboot after
every demo viewed? Well, I can't change those demos, but I can make the
rebooting as painless as possible.

If you drag the program 'BootTool' from the Tools drawer to your WBStartup
drawer (OS 2.0 and up), you'll be seeing the list of no-exit demos at
every startup. You can click any of those demos to run it. After the
reboot, that demo and all that were above it will be removed from the
list automatically.

If you want to show all demos again, clock 'Show All' at the bottom of
the list and reboot. If you want to stop viewing demos, click 'Uninstall'
at the bottom of the list. You can, however, drag the BootTool to the
WBStartup drawer again and continue from where you left off.

```
    Install    BootTool in your WBStartup drawer
 Run BootTool  for a first go
```
