AminetGuide

1.1 Welcome to Aminet CD 14

                                     WELCOME TO AMINET CD 14 ←
                                                    Deutsch
                    Copyright 1996
                Urban Müller
                 Welcome to the 14th CD in the Aminet series. This time, we have ←
                    more new
material than ever
                before
                which left us with hardly any room for other
software. The contents are:
840M of
                  new stuff
                out since the making of
                Aminet CD 13
                110M of   business   software for serious applications
 70M of   top downloads   used to complete the charts
  8M of   commercial   software: TurboCalc 2.1 with manual

For the following types of data we have special guides:
     Games   A list of all games sorted by quality
     Demos   An index of compatible demos, sorted by quality
    Pictures   A database with scaled down versions of the images
      Mods   A list of all mods by style and rating

 Information is also available on:

             New features
             What the previous CDs didn't have

             Access software
             Find, Prefs, and all the other tools

             Customizing
             How to adapt Aminet CD to your taste

             Troubleshooting
             What to do if problems occur

1.2 About the author

The guy who selected, arranged, documented and sorted the contents of
this CD for you is me, Urban Müller, the main administrator of Aminet.
All the support software is from me, too. You can reach me at
umueller@wuarchive.wustl.edu if you have any feedback about this CD.

Of course this CD would not have been possible without the help of
the countless people involved in the administration of Aminet, not
to mention the thousands of uploaders. Special thanks go to:

```
  Robert Michl     - for the German descriptions
  Matthias Scheler - for co-moderating Aminet
  Lars Eilebrecht  - for beta-testing.
  Martin Schulze   - for beta-testing
```

If you ever wanted to know what my job at Aminet is: juggling gigs
Well illustrated by an MPEG animation of me juggling harddisks at a
meeting. Also available a still image at better resultion. Not
shown: Lots of even shorter runs :)

Yours truly....

Urban Müller

1.3 Subscriptions

Subscriptions

If you'd like the Aminet CD sent to you every two months and save money
at the same time, then ask your dealer about subscriptions. If you order
from Fred Fish's "Cronus" in the USA, the subscription price is $59.95
for 4 issues, which means about $15 per issue instead of about $20.
The price does not include shipping ($4 anywhere worldwide). The address:

CRONUS

```
  1840 East Warner Road #105-265
  Chandler, AZ 85284
  U.S.A.

  FAX:    (602) 491-0048
  Voice:  (800) 804-0833 or (602) 491-0442
```

Stefan Ossowski's Schatztruhe GmbH in Germany also offers subscriptions.
See this

                    order information
                .

You may want to ask you local dealer if he offers subscriptions, too.

1.4 Previous Aminet CD's

                                    Previous Aminet CDs

As you probably know, the Aminet archive has much more material than fits
on a single CD. If you want all of it, you all Aminet Sets plus Aminet 13
and up.

CD	Date	Contents	Set	Date	Contents

                    The newest, the best, and 9000 pictures           (Aug 95)
```

1.5 Aminet CD 13

```
                         Aminet CD 13 - The newest, the best, and 200 anims

    Aminet CD 13 contains about 1 gigabyte of freely distributable
    software. The newest archive included is from Jul 1st. Apart from
    the new software, the CD concentrates on animations and animating.
    The space is used as follows (uncompressed):

    780M of software newer than Aminet CD 12 (410M newer than Set 3)
    200M of integrated animations
     20M of top downloads
      2M of registered shareware: The animation editor MainActor

    MainActor is probably the best animation editor for the Amiga; it
    knows many formats including MPEG.

    The freely distributable part is composed as follows:

    450 mods
    300 utilities
    300 communications programs
    250 pictures
    200 animations
    900 archives of other categories

 Aminet CD 13 costs US $19.95 or DM 25.
                Order info
                    Index
 Also check the
                other CDs
```

.

1.6 Aminet CD 12

                          Aminet CD 12 - The newest, the best, and 900 mods

   Aminet CD 12 contains, again, about 1 gig of freely distributable
   software. The newest archive included is from May 1st. Apart from
   the new software, the CD concentrates on music and music making.
   The space is used as follows (after decompression):

     760M of software newer than Aminet CD 11 (yet another record)
     300M of music modules, many of them multichannel
      75M of music software, the complete mus/ directory
      10M of instruments for composing
      10M of top downloads from Aminet
       5M of commercial software: OctaMED 5, Symphonie 2.4 and SoundFX

   OctaMED V5 is a very popular editor for music modules with up to 8
   tracks. It has no restrictions but is not the latest version. The
   tracker Symphonie has a built-in 14-bit playing routine that achieves
   a high sound quality. The version on CD is restricted to 8 tracks.
   Finally there is the excellent sample editor SoundFX (registered
   version) in its 68000 version only.

   The freely distributable part is composed as follows:

   900 mods from Aminet and other sources
   400 music related programs
   300 utilities
   300 communications programs
   900 files from other categories

   plus 700 instruments in large archives with a separate index.

 Aminet CD 12 costs US $19.95 or DM 25.
                 Order info
                    Index
 Also check the
                 other CDs
               .

1.7 Aminet CD 11

                          Aminet CD 11 - The newest, the best, and 700 maps

   Aminet CD 11 contains, you already guessed it, about 1 gig of freely
   distributable software. The newest archive included is from March 2nd.
   Apart from the new software, the CD concentrates on maps collected from
   various sources. The space is used as follows (after decompression):

     670M of software newer than Aminet CD 10 (all time high!)

      150M of high resolution maps covering most areas of the world
       80M of top downloads
       20M of commercial software: XiPaint 3.2, full version

    XiPaint is a nice 24-bit paint program that works gfx boards and just
    about any image format. It is licensed to the buyer of the CD only,
    and not freely distributable. Check the upgrade offer that comes with
    it.

    The freely distributable part is composed as follows:

    500 mods, most of them new
    200 utilities
    200 communcations programs
    800 programs of other categories

    plus 700 maps in 24-bit JPEG format, covering most areas of the
    world. The maps have an index that is sorted by continent, and
    a search facility.

 Aminet CD 11 costs US $19.95 or DM 25.
                Order info
                   Index
 Also check the
                other CDs
                   .

1.8 Aminet CD 10

                          Aminet CD 10 - The newest, the best, and 2000 fonts

    Aminet CD 10 contains, once more, over 1 gig of freely distributable
    software. The newest archive included is from January 3rd. Apart from
    the new software, the CD concentrates on fonts collected from
    various sources. The space is used as follows (after decompression):

      520M of software newer than Aminet CD 9
      330M of fonts, each font in several formats
      170M of top downloads

    ... plus two special highlights:

      PageStream 2.2, unrestricted, with manual+upgrade deal
      TypeSmith 2.5 (latest), slightly restricted, with similar deal

    These two excellent programs give you an absolutely top of the
    range DTP combination. They are licensed to the buyer of the CD
    only, and not freely distributable.

    The freely distributable part is composed as follows:

     650 mods, most of them new
     300 utilities
     300 communications programs
     700 programs of other categories

    plus 2000 fonts in Postscript, Intellifont and bitmap format, stored
    in large archives but easy to preview and extract. All fonts are
    hinted for better appearance, and most fonts are available in all
    formats.

Aminet CD 10 costs US $19.95 or DM 25.
                  Order info
                    Index
Also check the
                  other CDs
                .

1.9   Aminet CD 9

                              Aminet CD 9 - The newest, the best, and 900 games

Aminet CD 9 contains, as usual, over 1 gig of freely distributable
software. The newest archive included is from November 4th. Apart
from the new software, the CD concentrates on games from various
sources. The space is used as follows (after decompression):

  500M of software newer than CD 8 (280M newer than Set 2)
  330M of games
  100M of electronic books
  100M of top downloads

These consist of:

   930 games (directly startable)
   640 mods
   300 docs
   140 pictures
    90 demos

   ...plus 2400 utilities of all kinds.

Aminet CD 9 costs US $19.95 or DM 25.
                  Order info
                    Index
Also check the
                  other CDs
                .

1.10   Aminet CD 8

                              Aminet CD 8 - The newest, the best, and 2000 mods

Aminet CD 8 contains over 1 gigabyte of freely distributable software.
The newest file included is dated Nov 4th. Besides the the new
software, the CD concentrates on pictures and modules. The space on
the CD is used as follows:

```
   650M of software newer than Aminet CD 7
   500M of mods
    50M of top downloads
```

The mods were collected from various sources besides Aminet and
were not found on earlier Aminet CDs.

Aminet CD 8 costs US $19.95 or DM 25.
                 Order info
                   Index
Also check the
                 other CDs
                   .

1.11 Aminet CD 7

                              Aminet CD 7 - The newest, the best, and 9000 pictures

Sorry, no detailed information available. Check the
                 other CDs
                   .

1.12 Aminet CD 6

                              Aminet CD 6 - The newest, the best, and 1800 demos

Sorry, no detailed information available. Check the
                 other CDs
                   .

1.13 Aminet CD 5

                              Aminet CD 5 - The newest, the best, and 1000 games

Sorry, no detailed information available. Check the
                 other CDs
                   .

1.14 Aminet CD 4

                              Aminet CD 4 - The newest, the best, and 1700 mods

Sorry, no detailed information available. Check the
                 other CDs
                   .

1.15   Aminet CD 3

                          Aminet CD 3 – The newest and the best from Aminet

 Sorry, no detailed information available. Check the
                other CDs
                      .

1.16   Aminet CD 2

                Sorry, no detailed information available. Check the
                other CDs
                      .

1.17   Aminet CD 1

                Sorry, no detailed information available. Check the
                other CDs
                      .

1.18   Aminet Set 1

                          Aminet Set 1 – The complete Aminet on 4 new CDs

As you probably know, there is a big archive behind all those Aminet CDs.
Aminet Set finally brings you the complete archive on four newly created
CD-ROMs.

If you already have several Aminet CDs, buying the Aminet Set still makes
sense for the following reasons:

1. Even if you have all Aminet CDs, you still lack a lot of software
   from Aminet. And the less CDs you already have, the more additional
   software you get from the set:

   If you already have   The set gives you an additional

   Aminet CD 1,2,3,4,5   467M of Aminet software
   Aminet CD   2,3,4,5   512M of Aminet software
   Aminet CD   3,4,5   851M of Aminet software
   Aminet CD   4,5   1191M of Aminet software
   Aminet CD   5   1681M of Aminet software

2. Aminet Set 1 presents its data more nicely than the previous CDs.
   As you can see on this CD, all games and demos can be started
   directly, the images are in a nice image data base, and the modules
   are presented in a list that is sorted by style. Also, there are a
   lot of German descriptions as well as a Fish and a SaarAG index.
   This is missing on the older CDs but present on Aminet Set, so buying

           some of the same data a second time can make sense.

3. Aminet Set 1 is better organized than the previous CDs. Until now,
   the Images from Aminet have been scattered on all the Aminet CDs.
   Aminet Set brings them all on the same CD, just as all other types
   of data. Also, using Aminet Set you can search the complete Aminet
   very quickly and easily, including a very fast full text search of
   all the .readme files.

Aminet Set costs US $39.95 or DM 59.
                 Order info
                   Index (huge!)
Also check the
                 other CDs
                 .

1.19   Aminet Set 2

                             Aminet Set 2 - The new Aminet on 4 more CDs

As you probably know, there is a big archive behind all those Aminet CDs.
Aminet Set 2 brings you the complete new archive on four CD-ROMs.

If you already have several Aminet CDs, buying the Aminet Set still makes
sense for the following reasons:

1. Aminet Set 2 completes Aminet Set 1 to give a complete snapshot
   of the Aminet archive.

2. Aminet Set 2 presents its data more nicely than the previous CDs.
   As you can see on this CD, all games and demos can be started
   directly, the images are in a nice image data base, and the modules
   are presented in a list that is sorted by style. Also, there are a
   lot of German descriptions as well as a Fish and a SaarAG index.

3. Aminet Set 2 is better organized than the previous CDs. Until now,
   the Images from Aminet have been scattered on all the Aminet CDs.
   Aminet Set brings them all on the same CD, just as all other types
   of data. Also, using Aminet Set you can search the complete Aminet
   very quickly and easily, including a very fast full text search of
   all the .readme files.

Aminet Set 2 costs US $45 or DM 59.
                 Order info
                   Index (huge!)
Also check the
                 other CDs
                 .

1.20   Aminet Set 3

                         Aminet Set 3 - The new Aminet on 4 more CDs, plus Imagine ←
                  4

   Aminet Set 3 contains close to 4 gigabytes (when uncompressed) of
   freely distributable Amiga software on 4 newly mastered CDs. There
   are 9000 archives from the following categories:

   2000 Mods   (directly playable)
   1500 Images   (directly viewable)
   1300 Games   (directly startable)
    800 Communications programs
    400 Demos   (directly startable)
   3000 Utilities and applications

   Aminet Set 3 contains all the Aminet data found on Aminet CD 9 to 12
   plus 250M of other software that was on none of these: 170M of
   integrated modules and 80M of 3D objects to go with Imagine. This
   software will not appear on any subsequent CD. Only 150M of the
   software on Set 3 were found on Set 2 already. Also, 400M of
   material newer than Aminet 12 are included.

   Included in Aminet Set 3 is a completely unrestricted version of
   the excellent ray tracer Imagine 4.0 (only one version behind the
   current edition). There is also a tutorial for it (in English and
   German) plus additional docs, but no manual.

   Also, there are upgrade discounts for the following programs found
   on the CD:
   - Imagine can be upgraded to the latest version for $125 + shipping
   - XiPaint can be upgraded to the latest version for DM 59 + shipping
   - OctaMED can be upgraded to SoundStudio for UKP 25 to 30 incl. shipping
   - The Imagine PD CD can be obtained for $20.00 incl. shipping, $10 off

 Aminet Set 3 costs US $45 or DM 59.
                  Order info
                    Index   (huge!)
 Also check the
                  other CDs
                    .

1.21 New stuff on this CD

                               New stuff since Aminet CD 13

 Most of the software on this CD is unseen before. But here we're
 exclusively talking about what uploaded to Aminet since the previous
 CD was made, *not* about what was integrated from other sources.

 The best way to browse the new files is looking at the directory sorted
 new files index of this CD. Select your general area of interest, and then
 hit the 'Browse' button in AmigaGuide to hop from directory to directory.
 Another approach is to check the charts of most downloaded files, where
 most of the files listed are new (the very latest have been omitted, tho).
 Finally, check the list of

                   recommendations
                   of the most interesting new
 files.

 And of course you can check the new files index sorted by directory ,
 by name or by age , or search for something in the CD index.

1.22 Recommended new uploads

 The following are, in my opinion, a few highlights among the new software
 on this CD. Not mentioned here are mods, games, pix and demos, since their
 highlights are mentioned in their own index files. Check the mods, though,
 we have loads of good ones once more.

 Communications tools all over the place. If you're not yet connected to
 the Internet, have a look at the new TCP stack: Miami.

 As always, enjoy!

1.23 New features

                    New features of this CD

 - There is a new AmigaGuide alternative on the CD: PowerGuide. If you've
   currently selected AmigaGuide or MultiView as text viewer in 'Prefs',
   you may want to enter PowerGuide there.
 - There's now a quick-install demo version of MagicUserInterface (MUI)

1.24 Access software

 Workbench

 Browsing:

 The first thing you will want to do is browse the contents of the CD.
 The best way to get a quick overview is having a look at the overview
 in this document; the very first links. Another method is to check
 the file Lists/New_Dir (if you already have the previous Aminet CD)
 or Lists/Index_Dir.
 Wherever you see a list of files with descriptions, you can click
 to archive name to start an unpack tool. You will be asked for a
 destination directory (the default can be chosen in 'Prefs'). After
 you hit return, the archive gets unpacked to where you selected.
 For some types of files, you can click a middle button (called
 'Start' or 'Play') to view look at the archive contents directly.
 Some index files play directly without asking (e.g. the Modules
 and the Games index).
 In all index files you can view the .readme file for an archive by
 clicking the description.

Searching:

After you've become familiar with the contents of the CD, you will
often want to search for a specific keyword in the contents of the
CD. Just double click the 'Find' icon on the top level of the CD,
enter the case insensitive sub string or pattern you want to look
for, and you will be presented with a list of files that match your
sub string anywhere on their line. You can also search the New_*
and Index_* files in Lists by clicking them first and then shift-
doubleclicking 'Find'. The resulting document will be of the 'View'
type for the toplevel Find program and of the 'Extract' type for
all other Find programs. The NewFind and AminetFind search the the
list of new files and the list of all Aminet files.

If you drag any of the FindKit drawer in Tools/ anywhere onto your
hard disk, you can do searches without having the CD in your drive.

Using the FullFind program in the Tools directory, you can find any
word in any readme of this CD. If your word is a prefix of a word
in a readme, it will match. To prevent that, append a $ to your
search word. You can enter several search words, separated by
blanks, to see only the documents which contain all of them.

See also the documentation for the tools in question: Inspect ,
 Find , FullFind and Prefs .

CLI/Shell

Using a shell is not the recommended way to access this CD. However you
sometimes have no choice, e.g. when working under UNIX or MSDOS.

To get familiar with the contents of the CD, I recommend having a
look at the file Aminet/INDEX which contains a complete list of
all files on the CD in plain ASCII. More ASCII index files found
in Lists/, they end in .doc. If you find a file you are interested
in, for example, docs/mags/cd32bits-0694.lha , then execute the
following commands:
  cd Aminet/docs/mags
  lha e cd32bits-0694.lha ram:
to unpack the contents of that archive to RAM. If you don't have
the archiver LhA yet, you can obtain it from the Tools/ directory
on the CD.

To locate all files that contain foo anywhere in their file name,
directory name or description, execute the command
  search NONUM Aminet/INDEX foo
or just use the Aminet find tool:
  find foo
which will output an AmigaGuide document and display it. If you want
to find the files on any Aminet CD, use:
  find IN Aminet foo

For further information read the documents on Find, FullFind and
Inspect in Tools/Docs/.

```
Useful stuff
------------
```

All Aminet CDs come with an unpacked and ready-to-install version of
 MagicUserInterface . MUI is a library collection for creating user
interfaces and is required by several programs on this CD. If you
don't have MUI on your system yet, please follow the link above to
activate MUI temporarily or to install it permanently.

There is a very limited number of unpacked utilities on this CD in the
Tools/Useful directory. They are all related to accessing the files on
this CD, and you should think about installing them on your HD.

- AmiCDROM is an excellent CD-ROM file system. In the improbable case
  that your CD filesystem has problems with the Aminet CD, just use this
  one.

- ARCHandler lets you access the Aminet CD (or any other file system)
  as if all the lha files on it were directories, ie you don't need
  to unpack anything. Great stuff.

- Degrader can disable all the advanced features of accelerated Amigas,
  getting many hardware-bashing demos and games to run.

- ToolAlias can map one default tool name to another. This is useful if
  you can't change the default tool of a file but want to use a different
  viewer.

- TrashMaster creates an App-Icon on your Workbench where you can drag
  icons to delete them. Handy to clean up after an archive has been
  extracted to RAM:.

1.25 Customizing Aminet CD

                                        Customizing Aminet CD

As you know all too well, CDs cannot be written to. This CD, however, gives
you a limited possibility to shape it according to your taste. There are
two possibilities, select the links for documentation:

The
                Personal
                index in the Guides drawer is an Aminet CD index like all
the others, with viewing and readme displaying capabilities. The only
difference is that you decide what's listed in it and what not.

                Clones
                are tiny files that pretend to be one of the items on the Aminet
CD. You can create, rename and arrange them as you like, and you can put
them in WBStartup or ToolManager docks. Of course you need the CD in the
drive when you want to use clones.

1.26   Your personal Aminet CD index

                    Your personal Aminet CD index

In the Guides directory you find, among various static index files an index
called 'Personal'. In the beginning it's empty. If you click 'add', you
are asked for a search pattern. You can click any of the shown items
to to add them to your personal Aminet index. However you need to close
your Personal index and open it again in order to make the changes
visible.

If you press the 'sort' button, the index will be sorted by directory and
subsorted by file name. Duplicate lines will be eliminated. Again, you
have to close and reopen the index.

With the 'edit' button, finally, you can make any changes to your
personal index using your favourite editor. setenv EDITOR <your-editor>
to determine the editor. Always use line operation (like deleting lines,
inserting lines from Aminet/INDEX or reordering lines). Again, you need
to reload the index to make the changes visible.

The index looks as if it were stored on the CD. This is not the case, of
course. The contents are stored in the file S:Aminet-PersonalX, where X
is the number of your CD. You can edit or delete it there.

Apart from that, the Personal index behaves like any immediate view index;
ie if you click a mod in the Personal index, it will play immediately.

So have a look at your personal index.

1.27   Clones

                              Clones

There's a few things that you cannot do in a normal Aminet CD index. For
example you cannot put an item from the Aminet CD index in a ToolManager
dock or a Directory Opus gadget. That's what clones were created for.

Clones pretend to be the Aminet file you created them from. You can
move them around, arrange them and delete them as you like. Clones can
be started from CLI or from the Workbench, where they have an icon
that reflects their type. Starting a clone is equivalent to clicking
the according archive name in the Aminet CD index, except for the fact
that the action (playing, game or demo starting) will be performed without
asking for confirmation. Of course you need to have the Aminet CD in the
CD-ROM drive when you start a cloned program.

To create a clone, start the Cloner program. It asks you for a
pattern and displays the files matching that pattern. You then click the
item you would like to see cloned, maybe change the destination path in
the upcoming requester, and hit 'Create' to confirm. Each clone takes about
3K of disk space.

1.28   Some common problems with the Aminet CD

```
Why are all file names upper case?
----------------------------------
```
For this CD, we have chosen to stick to the ISO CDROM standard. This
means that the CD can be read on any system, but it also means that
all files names are upper case. However, we also used RockRidge
extensions, so file systems that understand them can still use
mixed case. The AmiCDROM file system provided in the Tools/Useful
directory will give you mixed case on the Aminet CD.

```
Why can't I read some of the files with the Commodore CD file system?
---------------------------------------------------------------------
```
Because it's buggy. The solution is the same as before: Install the
AmiCDROM file system. It's works very nicely.

```
Why do I have problems with by Xetec file system?
-------------------------------------------------
```
It seems to have problems with our choice of CD formats. However
version 2.0 was reported to work fine. If not, again, again: Install
the AmiCDROM file system found on this CD.

```
Nothing happens when I try to show that image/play that mod!
------------------------------------------------------------
```
The Aminet extraction software tries to be smart how every pic is
shown or mod is played. However sometimes it fails. In those cases
you can simply extract the archive and look at it by yourself.
Also, you might be running out of memory, see below.

```
I'm running out of memory!
--------------------------
```
Viewing an image or playing a mod by clicking it in the index takes
quite a lot of memory, since the index as well was the extraction
program stay in memory while the picture is viewed. Solutions:
- Set your extraction directory to something different from RAM:,
  e.g. an (existing) directory on your HD. This can be done using
  the 'Prefs' program.
- Don't view the files directly from the index. Click on 'extract'
  first, then close the index, and open the directory your file
  was extracted to.
Of course combining the two saves the most.

```
I want to mount this CD on my BBS
---------------------------------
```
We have Files.BBS index files in every directory, so some BBS programs
can use the CD directly. Others understand our .readme format already.
For MS-DOS BBSes use the index called FILES.MSD. If you would like to
copy the files onto HD, you can use the file Aminet/info/adt/TRANSL.TBL
(which shows origname and CD-name for each file) to restore the original
file names. If you write any additional software or need indices in a
different format, please contact me.

```
I cannot use this CD with my CD32!
----------------------------------
```
This is due to a bug in the CD32 CDROM file system and occurs when you
boot off the Network CD or something similar. You can circumvent this
bug by mounting a small RAD: disk (about 49 tracks), copy the most
important files from a Workbench CD there (c, libs, envarc) and boot
off the RAD:. That should get the Aminet CD (and some other interesting
CDs) to work.

1.29   What is Aminet?

```
                What is Aminet?
---------------
```

Aminet is a library where software authors can place their freely
distributable programs for others to download. The backbone of Aminet
consists of about 40 computers all over the world that are linked to
Internet, a computer network that connects most universities and many
businesses in the world. Many other places, such as 80 BBSes, keep
frequently updated copies of Aminet.

Aminet is moderated. Whatever gets uploaded has to be approved before
it is made available to the public. However there is no censorship;
the only conditions for inclusion in the library are that every file
uploaded has a description file in the correct format, and the archive
itself is okay, virus free and legal.

What is unique about Aminet is that large amounts of data are made
available to a wide audience within a very short time. If a programmer
uploads his latest release to Aminet, he can expect that it will have
been downloaded and tested by one thousand people within a week. If
he finds a bug in his program, he can distribute an update to the
whole world within twenty four hours. In that respect, freely
distributable software works far better than commercial software.

You may want to read about the recent , older and ancient
history of Aminet, or find out where to
                access
                Aminet in your area.

1.30   Getting access to Aminet

```
Where do I access Aminet?
-------------------------
```

If you would like to get updated more often than is possible with a
quarterly CDROM, you have several possibilities. By far the best way
is getting yourself connected to the Internet. Several commercial
networks allow access to the Internet. Some of them are (this is not
an endorsement, just an information):

```
    USA           Netcom  Voice 1.408.554.UNIX
                  Portal  Voice 1.408.973.9111  Modem 1.408.973.8091
    GERMANY       EUnet   Voice +49.231.972.00  Fax +49.231.972.1111
    SWITZERLAND EUnet     Voice +41.1.291.45.80 Fax +41.1.291.46.42
```

Once you have gotten Internet access you can use the following methods
to access the latest Aminet files:

- Mirrors. The normal way to access Aminet is by FTP, which comes
  with UNIX (program name is ftp). You can use any of the below
  sites. Most keep only recent files, but some have them all.

```
    Location        Name                      IP Address      Path        Files

    USA (MO)        ftp.wustl.edu             128.252.135.4   pub/aminet/   ALL

    Spain           ftp.gui.uva.es            157.88.36.190   pub/aminet/   1500
    Hungary         ftp.iit.uni-miskolc.hu    193.6.4.31      pub/aminet/   3000
    Czech Rep       amiga.chemi.muni.cz       147.251.84.2    pub/aminet/   2000
    Poland          ftp.man.szczecin.pl       193.59.3.9      pub/aminet/   2000
    Croatia         thphys.irb.hr             161.53.129.16   pub/aminet/    500
```

- ADT. This is a front end for FTP that allows easy access to Aminet. Get
  it from misc/unix/adt.c and compile it on your UNIX box by typing
  'sh adt.c'

- WWW. Netscape, Mosaic or Lynx are a very decent way to access Aminet.
  Try the URLs http://ftp.wustl.edu/~aminet/, http://ftp.eunet.ch/~aminet/

or http://www.germany.aminet.org/aminet/ where you can also find pointers
to other Aminet sites with WWW support.

– FSP. Aminet Files can be downloaded from the FSP site ftp.luth.se at
  port 6969. ftp.wustl.edu, ftp.uk.aminet.org, sunsite.auc.dk and
  ftp.giga.or.at have FSP on port 21, but can't be reached from everywhere
  (just try). Uploads are accepted at most of these sites.

– Telnet. ftp.uk.aminet.org strikes again. You can telnet to 155.198.1.40
  and log in as 'sources', which gives you a UNIX account where you can
  download the files on src using commands like 'sz' and 'kermit', or
  just browse around.

– NFS. NFS mounting of the archive is possible at ftp.wustl.edu (see
  ftp://ftp.wustl.edu/README.NFS for details), at sunsite.auc.dk (see
  http://sunsite.auc.dk/SunSITE/access.html for details), at
  ftp.uni-stuttgart.de (path /serv/serv/pub/systems/amiga/aminet) and
  at ftp.cs.tu-berlin.de (path /export/mdd10/ftp/pub/aminet).

– Finger. To find out what's been uploaded to Aminet within the last
  week, enter 'finger aminet@ftp.eunet.ch'

– Gopher. Gopher is specially supported by several Aminet sites. Just
  type 'gopher <sitename>' or 'gopher -p <startpoint> <sitename>'.

  USA (MO)   ftp.wustl.edu   1/pub/aminet/info/goph
  UK   gopher.uk.aminet.org 1/pub/aminet/info/goph

– Samba. Use 'net use x: \sunsite.auc.dk\ftp' to access to sunsite.auc.dk.

If you don't have Internet access, you can use the following methods:

– CD-ROM. Aminet CD 5 and up are available from Stefan Ossowski, Germany
  (stefano@tchest.e.eunet.de) or Fred Fish (orders@amigalib.com). The
  CD costs DM 25 or US$ 20. You can also buy the complete Aminet as of
  Jan 95 on 4 CDs for DM60 or US$ 40. For further details, have a look at
  docs/misc/CD-Orders.txt.

– Aminet mailserver. The Aminet mail server can do various things for you,
  like doing finds and accepting uploads, but it does not send out
  binaries. Send HELP to aminet-server@wuarchive.wustl.edu to find out
  more.

– Bin mailserver. The Aminet site src.doc.ic.ac.uk has an email server
  that sends out uuencoded binaries. Send a message with HELP in the body
  to ftpmail@doc.ic.ac.uk or ftpmail@ftp.luth.se . You can also use
  ftpmail@decwrl.dec.com to retrieve files from any Aminet site, but
  please use an American one to save bandwidth. Send HELP there for
  information, too. Germans try ftp-mail@uni-paderborn.de or
  mail-server@cs.tu-berlin.de, Canadians send HELP to MRCserv@MtRoyal.AB.CA
  and Italias have a look at ftpmail@ftp.unina.it

– Modem. The following BBSes carry up-to-date Aminet files. Most have
  more phone numbers than we can mention here, call to see a list of
  the others. Also, many offer their files in ZConnect format. The list
  is sorted by phone number.

```

- Anonymous UUCP. In Germany, you can access the Aminet files at the
  phone numbers of Brainwave BBS (see above) using the following entry.
  Download the file "Aminet:INFO" for more information.
  anarchy Any SER 38400 ATD<Phone> BBS. ..\c ogin: uanon sword: uanon
  In Switzerland you can use the Alphanet BBS, ~/archives/aminet,
  with the login nuucp.

- FIDO. If you want to file-request Aminet files, you can do so by
  requesting the file INFO from 2:246/2006.0. The BBSes which have
  a FIDO node number mentioned above allow file requests.

- Mailing lists. If you want to get the list of new uploads mailed every
  week, send a mail with 'SUBSCRIBE aminet-weekly Your Name' in the
  body to listproc@mail.wustl.edu or if you want daily updates, just use
  'SUBSCRIBE aminet-daily' instead. Replace 'Your Name' with your real
  name, of course. Keep the welcome mail in case you forget how to
  unsubscribe and for the password you get.

- Usenet. A list of recent uploads is posted every week to the newsgroups
  comp.sys.amiga.misc and de.comp.sys.amiga.archive. The latter also gets
  daily postings.

- EZINFO. This is an internet BBS in Switzerland. Here you can download by
  Kermit or ZMODEM, but you need to be verified to become user. Modem dial
  01 251 20 02, then type 'telnet b050' to connect to EZINFO. Also try
  telnet kometh.ethz.ch and 'call b050' from internet.

- Aminet-on-disk. You can order single Aminet files (3 DM per disk)

or per-directory subscriptions (2 DM per disk) from Martin Schulze,
Parkstr. 14, 66806 Ensdorf, Germany. Phone: +49 (0) 6831 506171,
email masc@coli.uni-sb.de . Send 3 DM in stamps or $2 to get an
index disk with instructions.
Aminet-on-disk is available on Amiga-Floppy (880k: 3DM, 1.76MB: 5DM),
SyQuest 88/105/270MB and 128MB-Magneto-Optical. (DM 0.40 per Megabyte
without media costs)

1.31   Sending software to Aminet

                    How do I submit something to Aminet?

If you are an author of freely distributable software, you may be
interested to get your software onto Aminet. Aminet gets your software
to a lot of people very quickly, and is free of charge for most of
its users.

If you would like to get your piece of freely distributable software
onto Aminet and you don't have access to the Internet, you can check
the BBSes listed
                    here
                    if they forward uploads to Aminet. The
aminet-server@wuarchive.wustl.edu accepts uploads by email, send
HELP there for instructions. If all fails, you can still send a
diskette (that will not be sent back, sorry) with your upload to
Martin Schulze, whose address you find in the access list as well.

Be sure to read the upload instructions very carefully. Faulty
submissions are in danger of being deleted.

1.32   Ordering subsequent CD's

                    Order information

A new Aminet CD appears every two months. You can expect about 500M of
new software on every CD, plus the currently most popular files, plus
enough files from other sources to fill up the CD to its limit. Check
this
                    list
                    of availble CDs. You can order subscriptions or single
CDs from the following companies:

  Company   Offerings

```

1.33 The disclaimer

```
Disclaimer
----------

All files on Aminet have been virus checked.  However, new viruses
that were unknown at the time the CD was made could still have
slipped through, so we cannot make any warranties.  Thus you should
run a virus checker on all programs extracted from the CD to be
absolutely safe.

Note that, although you have paid for the CD, you don't own all the
programs in it. Some of them are distributed as Shareware, which
```

means that you have to pay for its registration if you use it
regularly. Please support the concept of shareware; if a program is
worth using, it's also worth paying for.

You're getting the FD software on this CD is free of charge. The price
of the CD just pays for the collecting and presenting it, and for the
pressing of the CD.
