Aminet 1/2

Chapter 1

Aminet

1.1 Complete New files index by date

New files index by age, newest file first

Please choose a directory to view, search all or get

help

This index contains 1026 files and was created on 22-Oct-96.

Oct 96 Sep 96

1.2 Directory selection help

This the new files index of this CD sorted by age.

You are looking at the age sorted version of the new files list, with the newest file on top. New files means everything that was uploaded since the previous Aminet CD was made. Just click the month you would like to see.

Help on the format of the file lists, and on what will happen when you click the archive name or description, is available here

You can also do a search from this page. Matches will be sorted by age. Click 'Retrace' to get back.

1.3 File view help

Every line in the index format shows the following items:

File The name of the archive. An archive is several files compressed and joined into one big file; see the LhA documentation in

Aminet 2/2

Tools/Docs if you are interested. Clicking the file name will extract it to RAM: or wherever selected.

Dir The directory inside 'Aminet' where you'll find the named file.

Size The size in K (1024 Bytes) or M (about 1 million bytes).

Age The age of the file in weeks at the time the index was created.

C (Where present) The CD the file can be found on. Note that uppercase letters (ABCD) mean Set 1, and lowercase (abcd) refer to Set 2. Blank means current CD.

Description The short description of the file If you click it, you'll see a longer description. A + sign in front of the description says that the longer description contains more than just the header lines. A * sign in front of the description says that the file is not on the current CD. Clicking it anyway will tell you what CD it can be found on.

Click 'Retrace' to get back.
