Demodex

1.1 The demos on Aminet

                                    The demos on Aminet CD 27

            Best demos
          The top demos on this CD, ready to run

            Good demos
          The good demos on this CD, ready to run

          Compatible demos
          The remaining demos that work on an A4000/040

            Other demos
          The demos that cannot be run directly

Make sure you have no unsaved work in memory when starting demos, they
may crash or alter your system configuration. Also, many demos force you
to reboot. The
                BootTool
                can automatically bring up a list of demos you
haven't seen yet at every startup.

And here's the complete list of demos. Some don't work on accelerated
Amigas, others need to be installed, and some are just data files for
other demos.

```
demo/40k     40K intros
demo/aga     Demos requiring AGA chipset
demo/bse     Belgian Scene Event files
demo/euro    Euro demos in file form
demo/file    Single file demos
demo/intro   Intros
demo/mag     Demo coder magazines
demo/sound   Sound oriented demos
demo/ta97    The Assembly 1997 demos

  search     for demos on this CD
```

1.2   The Boot Tool

```
                              The Boot Tool

 Don't you hate demos that have no exit, thereby forcing you to reboot after
 every demo viewed? Well, I can't change those demos, but I can make the
 rebooting as painless as possible.

 If you drag the program 'BootTool' from the Tools drawer to your WBStartup
 drawer (OS 2.0 and up), you'll be seeing the list of no-exit demos at
 every startup. You can click any of those demos to run it. After the
 reboot, that demo and all that were above it will be removed from the
 list automatically.

 If you want to show all demos again, clock 'Show All' at the bottom of
 the list and reboot. If you want to stop viewing demos, click 'Uninstall'
 at the bottom of the list. You can, however, drag the BootTool to the
 WBStartup drawer again and continue from where you left off.

     Install    BootTool in your WBStartup drawer
  Run BootTool  for a first go
```

1.3   Best demos on this CD
