## 1.1   AmigaWriter-FAQ

```
              AmigaWriter-FAQ
     Stand: 28 May 1999

            How do I get support?

            The English dictionary does not work!

            I have problems to start the demo version. I get a crash with the  ←
               number

            8000000B.

            The StormScreenManager blocks switching the screenmode of the  ←
               Workbench

            screen.

            I have problems when starting AmigaWriter 1.2 demo version.

            How do I create a manual page break?

            How can I make smart (up and down) quotes?

            How to create a 'tilde' for instance on the 'n' and the accent  ←
               circonflex

            (^)?

## 1.2   AmigaWriter-FAQ

```
How do I get support?

You can get support most easily and quickly using the Internet. To get
support from us you have to be a registered user. Please do never send
your serial number over the internet unless you use PGP encrypted mail.

Info:      http://www.haage-partner.com/aw_e.htm
Support:   http://www.haage-partner.com/aw-support-e.htm

Mailinglist:    http://www.haage-partner.com/aw_mlist.htm

Email support: Helge Schwarz <amigawriter-support@haage-partner.com>
```

## 1.3   AmigaWriter-FAQ

```
The English dictionary does not work!

There was a problem with the English dictionary so it did not function at
all, but this is fixed and there is a new version on our ftp server.
Download it.
```

## 1.4   AmigaWriter-FAQ

```
I have problems to start the demo version. I get a crash with the number
8000000B.

Most certainly these problems are due to problems with hard disk access.
This problem didn't show up while betatesting and we couldn't reproduce
it.
In most cases the problem could be solved by updating the SetPatch
command:
File Area http://www.amiga.de
We also created a new demo version that should avoid this problem. Please
load this demo version update from our ftp server.
```

## 1.5   AmigaWriter-FAQ

```
The StormScreenManager blocks switching the screenmode of the Workbench
screen.

There is a new SSM that doesn't have this problem available on our FTP
server.
```

## 1.6   AmigaWriter-FAQ

I have problems when starting AmigaWriter 1.2 demo version.

When you notice problems when starting the current demo version 1.2
please download the archive ExeOnly-1_2-Demo.lha from our ftp.

## 1.7  AmigaWriter-FAQ

How do I create a manual page break?

A manual page break can only happen at the beginning of a paragraph. Set
the according attribute in the paragraph dialog ('new page'). Admittedly,
there should be a menu entry for this tough.

## 1.8  AmigaWriter-FAQ

How can I make smart (up and down) quotes?

Because they are not implemented on the keyboard, AW doesn't have them at
the moment. We are working on automating this.

## 1.9  AmigaWriter-FAQ

How to create a 'tilde' for instance on the 'n' and the accent circonflex
(^)?

Alt-H and then press the 'u'. Standard procedure on the Amiga.
