## 1.2 \*\*\*\*\* Read Me First \*\*\*\*\*

This is a very early BETA version of the Gadtools Source Code  
Creator for Blitz Basic  
v2.1. Its still in the early stages with lots of functions still to be added .(  
See

To Do List  
)

All fucntions should work on thier own except for the requesters. They require  
the  
Regtools.library to be copied to sys:Libs.

## 1.3 Introduction

A while ago now when I was first learning blitz 2.1 I realised how tedious it was  
to  
get the exact positions for the Gadgets in the windows. So i thought 'wouldn't it  
be  
great if you could use the mouse to create a GUI?'

I then started work on the very first version of this program for use for myself.  
It was only designed to get the poistions for me and all tags and extras could be  
added  
afterwards.

Not long afterwards I thought other people could benefit from this program so I  
started work on adding extras to the program itself. A next version was created  
for  
release into the Public Domain as freeware.

## 1.4 Information

This version of GT Code Creator is BETA and has only been tested  
on my computer: -

68030, 40MHz FPU, 16mb FAST RAM, 2.1 GB HDD, WB 3.1, AGA

I need your help if GT Code Creator is going to continue development. I need  
people  
to get registered. To be registered all you need to do is do some testing for me.  
Just  
use the program and tell me what you think. If you find any bugs please tell me  
through

e-mail  
or through a letter (see  
Address  
. You will

then get a registration code from me ok. Just put this in the registration code box in the registration program. You will then be able to get rid of the information window, when you first load the program, through the tooltype located in the icon.

There are a few errors known so far that I am currently fixing. For more information go to the

errors  
page.

There are still lots of functions to be added to the program. Any registered user will automatically get free updates from the aminet. For more information go to the

updates  
screen.

## 1.5 Installation

The program runs from anywhere as long as the directory contents are kept intact.

## 1.6 Requirements

To run GT Code Creator you need:-

- \* Gadtools.library
- \* Reqttools.library
- \* Blitz Basic v2.1
- \* GTMenu shared library
- \* Red Libs app library for the App functions

## 1.7 Usage

### Docs still in development. Sorry ###

You'll have to figure then options out for yourself. Its not really difficult anyway.

I need some help for this. If anyone wants to help please let me know!!!

## 1.8 Errors

\* When saving your project sometimes the "|" does not appear in the window tags. Still haven't figured out why yet.

- \* Crosshair is still a little flickery

Thats all I know from my testing. Thats why I need your help.

---

## 1.9 The Future

Things to be done: -

- \* Fix cross hair flicker
- \* Add support for GMenuLib. (In development now)
- \* Allow Multiple windows.
- \* Update guide for how to use everything.
- \* Allow selection of tags in setting up gadgets. (In development now)
- \* Get support from people
- \* Pass my A-Levels

More will appear all the time.

Registered users are entitled to a free updates. You can have them sent through E ↔  
-Mail or  
you can get them off the aminet. Please tell me when you're are registering.

## 1.10 White Star Software Address

I would prefer it if I could just be e-mailed instead but heres my address just ↔  
instead.

This is the address of White Star Software: -

Lee McCormick  
7 Burnside  
Esh Winning  
Co. Durham  
DH7 9NA  
ENGLAND

E-Mail: -

lee@wssoftwarelee.freemove.co.uk

## 1.11 Disclaimer

If you computer software and hardware have problems with this program and then ↔  
doesn't  
work anymore then don't blame me. I wont take any responsibility for any problems ↔  
that  
have appeared since you have started using this program.

This program is SHARE|EMAILWARE. Please test the program or tell me what you ↔  
think or  
test for bugs to get registered.

## 1.12 Thanx

---

- \* Acid Software for Blitz Basic v2.1
  - \* Amiga International for creating the Amiga computer
  - \* Eyetech for my tower
  - \* David Wilson for his help
  - \* All the people who are going to get registered for helping me.
