Demodex

1.1 The demos on Aminet

                                        The demos on Aminet CD 32

          Best demos
        The top demos on this CD, ready to run

          Good demos
        The good demos on this CD, ready to run

        Compatible demos
        The remaining demos that work on an A4000/040

          Other demos
        The demos that cannot be run directly

Make sure you have no unsaved work in memory when starting demos, they
may crash or alter your system configuration. Also, many demos force you
to reboot.

And here's the complete list of demos. Some don't work on accelerated
Amigas, others need to be installed, and some are just data files for
other demos.

```
  demo/aga    Demos requiring AGA chipset
  demo/ecs    Demos for the ECS chip set
  demo/file   Single file demos
  demo/intro  Intros
  demo/mag    Demo coder magazines
  demo/slide  Image oriented demos
  demo/sound  Sound oriented demos
  demo/track  Trackmos

1.2 The Boot Tool

```
                              The Boot Tool
```

Don't you hate demos that have no exit, thereby forcing you to reboot after
every demo viewed? Well, I can't change those demos, but I can make the
rebooting as painless as possible.

If you drag the program 'BootTool' from the Tools drawer to your WBStartup
drawer (OS 2.0 and up), you'll be seeing the list of no-exit demos at
every startup. You can click any of those demos to run it. After the
reboot, that demo and all that were above it will be removed from the
list automatically.

If you want to show all demos again, clock 'Show All' at the bottom of
the list and reboot. If you want to stop viewing demos, click 'Uninstall'
at the bottom of the list. You can, however, drag the BootTool to the
WBStartup drawer again and continue from where you left off.

```
     Install    BootTool in your WBStartup drawer
  Run BootTool  for a first go
```

1.3   Best demos on this CD

1.6   Non startable demos on this CD

```
 These are the demos that cannot be run directly on an Amiga 4000.
 Check the readmes to see why, 'Action: NoA4000' means this crashes,
 'NoStart' means that it needs to be installed first.
