You probably don't want to listen to all of them, so here's some ways
to find the best of them. (Click any mod name to play the mod immediately)

1.4 Some of my favourite mods

Of the new mods on this CD, I especially liked the ones listed below. You
still can expect little if any techno from me...

First, very the latest mods (those which were included after Aminet Set was
made). One thing I noticed is that the samples in many of the new modules
are excellent... I wonder why that took so long. Maybe converted digitally
from some instrument CDs.

```
 Some new arrivals in my favourite category: Jazz and funk.

 Now for some 8-voice mods. You have to increase to volume of your stereo
```

 a bit for technical reasons. Also, you can hit ? for preferences in the
 player to increase the sound quality (e.g. by increasing the mixing rate).
 You have to quit the S3M player before playing the next song, it doesn't
 terminate by itself.

 It seems like those s3m composers actually, well, compose! Melancholy...

 Various nice 8voice stuff:
earth_orbit.lha   mods/pro   189K   5 Extremely good ambient music!

 Hope you liked my little selection, have fun with browsing the rest of the
 contents.
