1.2   Age selection help

This the index of all files on Aminet sorted by age.

This version of the complete Aminet index is sorted by age, which means newest
file on top and oldest on the bottom. Please select the month to display by
clicking it.

Help on the format of the file lists, and on what will happen when
you click the archive name or description, is available
                 here
                   .

Press 'Retrace' to get back.

1.3 File view help

In all the index files in Lists/, you can click the archive name to
unpack that archive to the directory selected in 'Prefs' (default is RAM:),
where a new directory will be created for it so you can clean up easily.

The top level 'Index', the 'Readme' and the various Guides are different.
There, clicking the archive name will:

  – View the graphics inside an archive (directory pix/ and gfx/anim/)
  – Play the sounds inside an archive   (directory mods/ and mus/smpl/)
  – Display the texts inside an archive (directory docs/)
  – Extract the archive to RAM: (all other directories)

Also, you can click the description of the archive to view the .readme of
the same archive. Note that entries with a * in front of the description
are not present on this CD (for example in the complete Aminet index).
However if you click them anyway, you will be informed what other CDs
this file can be found on.

Press 'Retrace' to get back.
