### 1.2 DISCLAIMER:

DISCLAIMER:

-----

The program contained in this archive is copyrighted by Donald T. Becker and is available as Public Domain Software. It may be distributed only under the following conditions:

- No charge is made to any of the files in this archive.
- Programs and Documentation are not modified in any way.
- The Package is always distributed in its complete form consisting of 5 files: "RipKickROM", "RipKickROM.a", "RipKickROM.ReadMe", "RipKickROM.guide" (this file), and "RipKickROM.guide.info".
- Every form of public distribution is allowed and encouraged, but no fee can be charged for this program except for, possibly, the cost of magnetic media and/or disk duplication and shipping.

---

- Inclusion in PD software libraries such as Fish Disks and AmiNet CD's is allowed (and encouraged), provided the fees charged for these disks are comparable with current charges for Public Domain Software.
- This program cannot be distributed in any commercial product without the written consent of the author.

By copying, distributing, and/or using these programs, you indicate your acceptance of the above rules.

THE PROGRAM IS SUPPLIED 'AS IS' : THE ENTIRE RISK AS TO THE QUALITY OF THE PROGRAM IS TO THE USER. IN NO EVENT WILL THE AUTHOR BE LIABLE FOR DIRECT OR INDIRECT DAMAGE OR LOSS RESULTING FROM THE USE/MISUSE OF THIS PROGRAMo.

P.S.

The only thing I will guarantee is that this program performed to expectation whenever I made use of it. If it doesn't work for you,

IT ISN'T MY FAULT....

But if it doesn't work for you or you run into any problems, I would appreciate being notified of the situation so that I may correct it in a future update.

## 1.3 DESCRIPTION:

DESCRIPTION

-----

This program will create a file which is an exact image of the Kickstart ROM in your Amiga. The Filename will default to RAM:KickStart.ROM if no filename entered.

There is not any Output from this program other than the 512K KickStart ROM Image file upon successful completion.

## 1.4 REQUIREMENTS:

REQUIREMENTS

-----

--- An Amiga (with 512K KickROM) and someplace to store the 512K File. ---

## 1.5 Usage

## USAGE

-----

RipKickROM OutputFile (optional)

## 1.6 Compatibility

vv

## COMPATIBILITY

-----

This program was written and compiled on an A3000 w/Kickstarts 2.04/3.1 and WorkBenches 2.1/3.1 with 8MB Fast 2MB Chip, 2MB ZorroII, Various Hard drives and "Magic Kick ROMS".

Tested on:

A500 KickStarts 2.05/3.1  
A600 KickStarts 2.06/3.1  
A2000 KickStarts 2.05/3.1  
A3000 KickStarts Magic Kick ROMS

## 1.7 History:

## HISTORY

-----

BUGS/UpGrades for RipKickROM:

Version 1.0 - Written in SAS C, Executable size > 5K, Worked fine.  
Version 2.0 - Rewritten in Assembly, Executable size = 316 bytes.  
Version 2.1 - Optimized code a little bit, Executable size = 224 bytes.

## 1.8 TO DO...

## TODO

-----

--RipKickROM--

I already made it as small and as fast as I could.  
What else is there to do to it?????
