

## MISSION SUMMARY

The object of your quest is to retake your castle and free your betrothed Ecstática from the demonic hordes. These beings are evil, and they have broken the sacred Eldersign which maintained the peaceful world order; they plan to reforge it in another form. This will summon the power of the old gods, changing the world order and resulting in chaos and anarchy.

To stop them, you must defeat the evil Archmage and his four associates – Warlock, Sorceress, Wizard, and Necromancer. Furthermore, you must find the seven pieces of the Eldersign (which are well hidden) and reunite them to recreate the world order. As your mission progresses, you will be able to discover weapons and magic that will help you, and even a wise priestess who will guide you through the game.

But despite this help, you'll need your wits about you to complete the tasks that await. You're up against the forces of evil and nothing less than victory will do...
