

When you need facts, you need The Source CD-ROM. Whether you're looking for the fastest CD-ROM drive, a spreadsheet program or the hottest interactive game, The Source has it all. At the click of a mouse, you can access demos, editorials, glossaries, product information, QuickTime videos, special software and a technical notes section.

This all-in-one product guide features hardware and software from industry-leading manufacturers. Choose from such categories as applications, communications, edutainment, graphics, internetworking, monitors, printers, scanners and more. With more than 200 Windows- and Macintosh-compatible products, you'll find what you need. Plus, The Source includes in-depth articles on such technologies as 3-D animation, remote access and high-speed scanning; Internet topics such as start-up kits and firewalls; and frequently asked RAID questions as well as new products.

It's the easy way to find the solutions you need. We hope the Source helps you find the best solutions for your computing needs.

System requirements:

- 486 or Pentium-based PC with sound card running Windows 3.1 or better.
- 8-MB RAM
- VGA graphics with 256 colors
- Double-speed CD-ROM drive
- QuickTime 2.0.3 for Windows (supplied on CD-ROM)

If QuickTime 2.0.3 for Windows is not installed on your system, open the qtw_203 directory and double-click on qtinstal.exe.

To play The Source in Windows: Double-click on source.exe in the File Manager. For best performance, set your display to 256 colors.
