- 200 800 X 600 8 Bit Bitmap Images	:\BMP\
- Picture Names File	:\PICNAMES.TXT

INSTRUCTIONS

Insert the CD into your CD-ROM reader. Kudo can be run directly from the CD or for improved performance, install the GLAMOUR.KDB, VINTAGE.KDB catalogs and Kudo onto your hard drive. Run "INSTALL.EXE" to install the KUDO onto your hard drive. To install the GLAMOUR.KDB and VINTAGE.KDB catalogs copy them to the hard drive.

A tryout version of Adobe Photoshop has also been included for you. Run "setup.exe" to install the tryout version of PHOTOSHOP onto your hard drive.

OPENING THE IMAGE CATALOGS

You can open the image catalog by selecting open from the file menu in the Kudo program. There are 2 Image catalogs on this CD. The GLAMOUR.KDB is a catalog of all the images on this CD. The VINTAGE.KDB is a catalog from the complete Vintage CD-ROM collection produced by Seattle Support Group. See Below for more Information. Please call 1-800-995-9777 to order more Seattle Support Group products.

VIEWING THE IMAGE CATALOGS

After opening a catalog, you will see 2 dotted buttons at left below the Kudo Menu bar. These are the Gallery View and List View Buttons which control the way thumbnails are displayed on the screen. You can browse through the catalogs by pressing on the up and down arrows on the right side of the catalog. See the Riffle section below for a rapid browsing tool. The images are displayed in default order, but can be resorted using options under the Sort menu. You can switch between viewing modes by clicking on the buttons or by using the "View" menu.

THE RIFFLE FEATURE

The Riffle tool is the arrow located in the bottom right corner of the catalog. This feature allows you to rapidly scan through the catalog and view individual thumbnails at up to 10 images per second. To use the Riffle control, click on the thin black line inside the blue arrow and move it to the right or the left depending on whether you want to scan forward or reverse from your current location in the catalog. You can adjust the speed of the scan by moving the black line between the center and either the left or right edges of the arrow control. When you see an image you like, simply release the mouse.

VIEWING THE IMAGES

You can either preview the image, or open the actual image file. To preview an image, click on its thumbnail to select the image, pull down the Image menu, and select Preview. The preview window can be resized to display the entire image. This is a quick way to see a full-screen image, but does not allow you to do any manipulation. To open an image file, double click on its thumbnail. Double-clicking the thumbnail will open the image file inside your .bmp-associated application.

KEYWORD SEARCHING

Use the Find Button, or the Find option in the "Image" menu, to search the catalog for thumbnails with specific characteristics. Kudo displays the thumbnails that were identified in the search, and hides all others from view. When you select the Find Feature, Kudo displays a dialog window. Use the far left pull-down menu to tell Kudo to search the Notes (keywords) field. Use the second box to tell Kudo how to search the catalog ("contains" is the default and the one used most often). In the third box, enter the keywords. To view all thumbnails after a search, select Find All from the "Image" menu. Note: All words must be capitalized as they appear in the notes box. This box can be viewed by pressing the Info Button or looking at the image from the List View mode.

Vintage Quality Photographic Image Albums on CD ROM

The Vintage catalog on this CD contains all 1800 thumbnail images from the Vintage Albums 1 through 6. If you would like to find out which album a particular photo comes from, select the photo's thumbnail, then select the "Info" button. The name of the album will be in the "Location" field.

Each album in the Vintage collection contains professional photographic images, color corrected, and usable for any creative purpose, royalty-free. The collections are not just "Digital Stock Catalogs" of images; the pictures are immediately available for use without any additional fees. The images may be used on covers, in advertisements, on calendars or postcards, in-house communications, for presentation, with editorial articles, as backgrounds in TV or multimedia production, or any other creative way, with no additional royalty or fees.

The images are quickly viewed with the Kudo Image Browser, which is included with the albums. Each CD-ROM is usable by both MS Windows and Macintosh users.

The Vintage collection is a stock photo library of natural splendor, lifestyles, business, animals, birds, plants, flowers, transportation, fun, occasions, people, and more. Each individual album is a small digital stock photo library with many subjects to choose from. Many more albums and subjects are being added to the collection to give access to fresh new images for all project needs.

Please call 1-800-995-9777 to place your order for any or all of these quality photographic image albums.
