There are four files included with this download:

Maya0002.mdt
MQSpa002.lng
MQEng002.lng
MQAddOn.wri

These files will give you new detailed descriptions for all of the items in the Museum at Tikal and new tasks for those items.

These four files must be moved to the folder which contains the MayaQuest application on your hard disk. The new information and tasks will be part of your game the next time you play.
