Monet Clock Information

Introduction

This is version 0.99b of Monet Clock. This is probably the final version but I don't like the hands and so we might modify them.

The picture is part of a Monet picture I found, as it is, somewhere on the Internet. I have checked in the UK for a Copyright owner but cannot find one.

Installation

This distribution of Monet Clock is designed for delivery over the Internet. As such no installation routine is included in the package. To install the file just unzip the file and double click the program.

Corporate clocks come with a full installation routine but this is over 300K zipped and so increases the download time required for Internet Distribution.

Release Information

Version 0.99b is the first public release.

Distribution and Licences

Monet Clock is copyrighted Freeware which you can distribute as you desire without request or notification apart form as part of a magazine or CD-ROM package. If you wish to supply it as part of such a package please contact me in advance.

The program is first of a series of clocks designed to promote our new Corporate Logo Clocks, full details of which can be found below.

The software is distributed as is and we offer no warranty or guarantee on the suitability of it. The author does not accept any liability for any faults that the program may contain or cause either directly or indirectly with the system.

Art Work

We are currently looking for Art Work for future versions of the clock. We cannot offer money only a small piece of fame and a shockwave version for your web page. For details of what we require please email us at the address below.

Corporate Logo Clocks

Our Corporate Logo Clocks allow you to advertise your company and products on computer screens while they are being used rather than when the coffee is being made. As with Monet Clock the clock will sit quietly in the background with your logo in full view.

Each clock is individually made and comes with a full installation and de-installation routine. With prices starting from $100 for 100 licences it is the cheapest custom built program available.

Licences	Price	Price per copy
100	$100	$1.00
250	$200	$0.80
500	$350	$0.70
1000	$500	$0.50
2,500	$1000	$0.40
5,000	$1500	$0.30
Unlimited use[*]	$2500	

The Unlimited use Licence allows you to distribute your Clock as part of shareware CD-ROM compilations, the Internet and other Online services. This licence also provides a Shockwave clock for use on your web site.

Licences can be upgraded at any time by paying the difference in price between the current licence and the one required.

We can also provide Shockwave clocks for other web sites although prices have not as yet been determined.

How to order

To create your customised clock all that we require is a copy of the logo in an electronic format and a check for the licence you require. On receipt of this we will convert the logo into the required format (150 by 150 pixels and a depth of 64 colors) and send a copy of it back to you for checking. After this approval we will create your clock and send a version back to you.

On average the process outlined above takes about a week. If, however, you submit the logo in the required format we can usually deliver the finished clock within 48 hours.

Checks (Cheques) should be made payable to Ben Thompson (most major currencies are acceptable) and should be sent to:

Ben Thompson
93 Balmoral Road,
Gillingham,
Kent,

---

[*] This includes a free Shockwave version of the clock for use on your web site.
