

## **TINTOOLS FOR CFW**

This is the first release of TINTOOLS.

This release contains a replacement Report Viewer for the standard one supplied with CFW. More routines are planned and will follow so watch for them.

TINTOOLS are free, all we ask if you make a change you send it to us so all may share.

### **Report Viewer:**

1. Register the TINTOOLS templates.
2. In your application select Global, then Extensions. Insert TINTOOLS Global template.
3. Select enable report viewer. If you do not have the printer properties included in your app already enable add printer properties.
4. To have a report use the new viewer, add the TTreportviewer extension template to reports extensions list of templates.

The files included and these instructions are provided as is, free of charge, with no implied or expressed warranty of suitability for a particular purpose. Tinman Software Corp. assumes no responsibility for any adverse circumstances arising from its use. Use at own risk!

Alterations which are made to improve the code are encouraged and should be re-posted in the Topspeed forum on CompuServe to give everyone access.

Acknowledgement is hereby given to the holders of any registered trademarks referenced herein. Also to the writers of the original Clarion template code which was used as a basis for this code.
