Media Rack Overview

Media Rack gives you control over your PC audio functions through a user interface as simple to use as a home stereo system.

For detailed information on a Media Rack component, refer its own Online User Guide (Help file).

Click on the picture below for more information.

Media Rack Components

Media Rack consists of several major components:

Control Center: Controls the display of Media Rack components.

Alarm Clock: Speaks aloud the time and date, and plays your wave files as reminder alarms at times you set. [For English; otherwise use alternate paragraph below]

<u>Alarm Clock</u>: Displays the time and plays your wave files as reminder alarms at times you set. [Modified for international versions]

MIDI Player: Plays MIDI music files. Lets you create song playlists and use MIDI editors to modify the song files.

WavePlayer: Records and plays digital audio (wave) files. Lets you create wave file playlists and use editors to modify the wave files.

<u>CD Player</u>: Plays standard audio CDs. Allows you to create playlist collections of CD tracks (songs).

System Mixer: Sets the volume level of your audio inputs and outputs.

For detailed information on a Media Rack component, refer to its Online User Guide (Help file).

Showing or Hiding Media Rack Components

To remove or add a component from display, click on the component button on the <u>Control Center Button Bar</u> or toggle it off using the Select Menu menu.

Button Bar:

🗣 ۹	° 拜	•	ិ ស្រែ	۰
-----	-----	----------	--------	---

Showing a Media Rack Component Menu

The left-most menu item changes to be that of the active component. For example, when using the MIDI Player, the left-most menu item will be MIDI. To make a component active, either click on the face of the component, or select the component from the Select Menu menu.

Selecting Full or Condensed View

Media Rack has a Full view, which covers a large portion of your PC screen, and a Condensed view, which uses less space but still gives you access to most capabilities. To switch between them, click on the leftward- or rightward-pointing arrow button on the <u>Button Bar</u>.
